Preface v
Contributors xvii

Chapter 1 Advances in our Understanding of Neurodegeneration 1
Kurt A. Jellinger

Introduction 1
Basic processes common to neurodegeneration 1
Neuronal death – the final pathway 36
Challenges of apoptosis in neurodegeneration 38
Conclusion 42
References 43

Chapter 2 Mitochondrial Mutagenesis in the Brain in Forensic and Pathological Research 59
Nicole von Wurmb-Schwark

Introduction 59
Mitochondrial DNA damage and repair 60
mtDNA maintenance 70
mtDNA mutagenesis in the brain 73
References 79

Chapter 3 Genetic and Environmental Factors in Neurodegenerative Diseases 89
Fabio Coppede and Lucia Migliore

Causative genes in neurodegeneration 89
Environmental factors and neurodegeneration 92
Susceptibility genes in neurodegeneration 96
Oxidative stress 98
Apoptosis 103
Aging 105
Chapter 4  Nitric Oxide and Cellular Stress Response in Brain Aging and Neurodegenerative Disorders  115  
Vittorio Calabrese, Cesare Mancuso, Carlo De Marco, Anna Maria Giuffrida Stella, and D. Allan Butterfield

Chapter 14 Oxidative Stress and Neuroinflammation in Alzheimer’s Disease and Amyotrophic Lateral Sclerosis: From Biology to Therapeutic Strategies
Molina Mhatre and Kenneth Hensley

Neuroinflammation – a common feature of most age-related neurodegenerative diseases
Neuroinflammation and Alzheimer’s disease
Anti-amyloidogenic properties of NSAIDs – a novel mechanism of action
Mechanism underlying the reduction in Aβ generation by NSAIDs
NSAIDs and clinical trials
Antioxidant treatment and Alzheimer’s disease
Antioxidant clinical trials using Alzheimer’s disease patients
Neuroinflammation, oxidative stress, and ALS
Concluding remarks
Acknowledgments
References

Chapter 15 Oxidative Stress in Stroke
Margarita L. Alexandrova and Petyo G. Bochev

Introduction
Therapeutic strategies with antioxidants in acute and chronic phases after stroke
Concluding remarks
References

Chapter 16 Hyperoxidation of the Two Catecholamines, Dopamine and Adrenaline: Implications for the Etiologies and Treatment of Encephalitis Lethargica, Parkinson’s Disease, Multiple Sclerosis, Amyotrophic Lateral Sclerosis, and Schizophrenia
Harold D. Foster and Abram Hoffer

Dopamine and dopachrome
Adrenaline and adrenochrome
Conclusions
References
Chapter 17  The Role of Metals and their Effect on Oxidative Stress in Amyotrophic Lateral Sclerosis  383
Mauro Cozzolino and Maria Teresa Carri

Introduction  383
Oxidative stress and ALS  384
Copper homeostasis and ALS  387
Iron homeostasis and ALS  390
Copper and iron: the devil's pair?  392
Conclusions  393
References  393

Chapter 18  Neurotransmission, Oxidative Stress, and Coexistence of Neurotransmitters in Parkinson's Disease  399
G. Ali Qureshi

Introduction  399
Material and methods  402
Conclusions  424
References  425

Chapter 19  Manganese-Induced Oxidative Stress  433
Allison W. Dobson and Michael Aschner

Introduction  433
Sources of manganese  434
Essentiality, absorption, and transport  434
Toxicity  438
Manganese-induced oxidative stress  440
References  443

Chapter 20  Prospects for Antioxidant Therapy in Mild Cognitive Impairment and Alzheimer's Disease  451
Akihiko Nunomura, George Perry, and Mark A. Smith

Introduction  451
The early involvement of oxidative stress in the pathogenesis of AD  452
Anti-oxidative strategy for AD: lessons from vitamin E studies  455
Anti-oxidative strategy for AD: targeting modifiable risk factors  458
Conclusion  460
References  460
Chapter 21  An Assessment of the Chances of Antiapoptotic Drug Therapy in Patients with Neurodegenerative Disorders  467
Peter C. Waldmeier

Apoptosis and other modes of cell death  467
Evidence for a role of PCD in ND  473
Development of antiapoptotic drugs for the treatment of neurodegenerative diseases (ND)  481
The first two antiapoptotic compounds failed in clinical trials  481
Conclusions  490
References  492

Chapter 22  Role of Antioxidant Activity of Estrogens in their Potent Neuroprotection  503
Evelyn Perez, Xiaofei Wang, and James W. Simpkins

Introduction  503
Acknowledgments  513
References  513

Chapter 23  Diet, Herbs, and Nutritional Protection against Oxidative Stress in Neurological Diseases  525
Carlos Kusano Bucalen Ferrari

Introduction  525
Conclusions  536
References  536

Chapter 24  Diabetic Neuropathy: Pathogenesis and Treatment  543
Maria Siemionow, Yalcin Kulahci, and Galip Agaoglu

Introduction  543
Treatment of diabetic neuropathy  554
Neurosensory testing in diabetic neuropathy  566
References  572

Chapter 25  Green and Black Tea in Brain Protection  581
Justyna Ostrowska, Wojciech Łuczaj, Agnieszka Augustyniak, and Elżbieta Skrzydlewska

Introduction  581
References  600
Chapter 26 Environmental and Genetic Interactions: Key to Sporadic Parkinson's Disease?
Fai Tsang and Tuck Wah Soong

- Introduction 607
- Concluding remarks 614
- Acknowledgment 615
- References 616

Chapter 27 Prevention and Therapy of Neurodegenerative Disorders: Role of Nutritional Antioxidants
Vincenzo Di Matteo, Massimo Pierucci, Giuseppe Di Giovanni, and Ennio Esposito

- Major neurodegenerative disorders 621
- Natural dietary antioxidants 625
- ROS, NF-κB, and neurodegenerative disorders 633
- Alzheimer's disease, oxidative stress, NF-κB, and antioxidants 635
- Parkinson's disease, oxidative stress, NF-κB, and antioxidants 638
- Amyotrophic lateral sclerosis, oxidative stress, NF-κB, and antioxidants 642
- Conclusions 644
- Acknowledgments 645
- References 646

Chapter 28 Genetics of Parkinson's Disease
Yue Huang, Piu Chan, and Glenda Halliday

- Introduction 663
- Causative genes for familial PD 665
- Susceptibility genes for PD 675
- Genetic implications for PD 687
- Acknowledgment 687
- References 688

Chapter 29 Biomarkers of Hypoxic Brain Injury
Giuseppe Buonocore, Serafina Perrone, Luisa De Marco, and Carlo Valerio Bellieni

- Introduction 699
- Conclusions 710
- References 711
Chapter 30  Role of Selenium, Iron, Copper, and Zinc in Parkinsonism  719

Introduction  719
Patients and methods  721
Results  722
Discussion  723
References  731

Chapter 31  Oxidative Stress in Phagocytic Cells: Changes with Age and Effect of Melatonin  737

Introduction  737
Pinealectomy, bursectomy, and the immune system  744
Conclusions: future horizon  756
References  757

Index  763
