Augusto Visintin

Differential Models of Hysteresis

With 46 Illustrations

Contents

Foreword
Introduction
Reader's Guide
Historical Notes
Part 1. Hysteresis Operators
Chapter I. Genesis of Hysteresis
1. What is Hysteresis?
2. Continuous Hysteresis
3. Catastrophic Hysteresis
4. Mean Field Theory of Ferromagnetism
5. Landau's Theory of Phase Transitions
6. Comments
Chapter II. Rheological and Circuital Models
1. Rheological Models
2. Elementary Rheological Models
3. Models of Damage
4. Circuital Models
5. Comments
Chapter III. Plays, Stops and Prandtl-Ishlinskiĭ Models
1. Hysteresis Operators
2. Plays
3. Stops
4. Prandtl-Ishlinskiĭ Models
5. Damage Operator
6. Memory Sequences
7. Comments
Chapter IV. The Preisach Model
1. The Preisach Operator
2. Geometry of the Preisach Plane

x Contents

4. Inverse Preisach Operator5. Vectorial Preisach Models	119
	122
6. Hysteresis and Laziness	126
7. Comments	128
Chapter V. The Duhem Model	130
1. Standard Duhem Model	131
2. Generalized Duhem Model	141
3. Vectorial Duhem Model	145
4. Comparison of Hysteresis Models	147
5. Comments	149
Chapter VI. Discontinuous Hysteresis	151
1. Completed Delayed Relay Operator	151
2. Weak Formulation of Delayed Relay Operators	161
3. Double Inclusions and Hysteresis	168
4. Differential Plays and Differential Stops	173
5. Discontinuous Hysteresis with Vector Input	176
	184
6. Comments	
Part 2. Partial Differential Equations with Hysteresis	
	186
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186 197
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186 197 204
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186 197 204 208 211
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186 197 204 208
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 186 197 204 208 211 212
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity	186 197 204 208 211 212 225
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties	186 197 204 208 211 212 225 233 241 247
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models	186 186 197 204 208 211 212 225 233 241 247 250
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties	186 186 197 204 208 211 212 225 233 241 247 250
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models	186 186 197 204 208 211 212 225 233 241 247 250
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models 7. Comments	186 186 197 204 208 211 212 225 233 241 247 250 255
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models 7. Comments Chapter IX. Quasilinear P.D.E.s with Memory	186 186 197 204 208 211 212 225 233 241 247 250 255 257
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models 7. Comments Chapter IX. Quasilinear P.D.E.s with Memory 1. Quasilinear Parabolic Equations with Memory	186 186 197 204 208 211 212 225 233 241 247 250 255 257 258
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskii Operator of Stop-Type 2. Prandtl-Ishlinskii Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models 7. Comments Chapter IX. Quasilinear P.D.E.s with Memory 1. Quasilinear Parabolic Equations with Hysteresis 3. Other Quasilinear Equations 4. Asymptotic Results	186 197 204 208 211 212 225 233 241 247 250 255 257 280 287
Part 2. Partial Differential Equations with Hysteresis Chapter VII. P.D.E. Models of Elasto-Plasticity 1. Prandtl-Ishlinskiĭ Operator of Stop-Type 2. Prandtl-Ishlinskiĭ Operator of Play-Type 3. A Problem in Elasto-Visco-Plasticity 4. Comments Chapter VIII. Hysteresis and Semigroups 1. Some Equations with Hysteresis 2. Accretive Operators Related to Hysteresis 3. Space-Structured Systems 4. Another Class of Accretive Operators 5. Order and Approximation Properties 6. Application to Hysteresis Models 7. Comments Chapter IX. Quasilinear P.D.E.s with Memory 1. Quasilinear Parabolic Equations with Hysteresis 3. Other Quasilinear Equations	186 197 204 208 211 212 225 233 241 247 250 255 257 258 272 280

		Co	ontents	S X1
Chapter X. Semilinear P.D.E.s with Memory				. 295
1. Semilinear Parabolic Equations with Memory				. 296
2. Other Semilinear Equations				
3. Minimum and Maximum Solutions				. 312
4. First Order Hyperbolic Equations with Memory				
5. Travelling Waves				
6. Comments				
Chapter XI. P.D.E.s with Discontinuous Hysteresis				. 325
1. Genesis of O.D.E.s with Hysteresis				. 326
2. Genesis of P.D.E.s with Hysteresis				
3. Quasilinear Parabolic P.D.E.s with Discontinuous Hysteresis				
4. Another Estimation Procedure				
5. Semilinear Parabolic P.D.E.s with Discontinuous Hysteresis				
6. Quasilinear Hyperbolic Equations with Hysteresis				
7. Homogenization of the Preisach Model				
8. A Biological Problem with Hysteresis				. 356
9. Summary of Results for P.D.E.s with Memory				. 357
10. Comments				. 359
Appendix				
Chapter XII. Some Tools				. 362
1. Some Function Spaces				
2. Spaces of Functions with Values in Banach Spaces				
3. Some Spaces of Operators				
4. Nonlinear Semigroups of Contractions				
5. Elements of Convex Analysis				
6. Order Preserving Mappings				
7. Strict Convergence in BV(0,T)				
8. Comments				
Conclusion				
Conclusion	•			. 309
