Complex Fluids at Interfaces
A General Discussion on

**Complex Fluids at Interfaces**

18th, 19th and 20th September, 1996

A General Discussion on Complex Fluids at Interfaces was held at Churchill College, University of Cambridge, UK on 18th, 19th and 20th September, 1996

**Contents**

1. Introductory Lecture: Mechanics of soft interfaces
   P-G. de Gennes

9. Measurement of the viscoelastic properties of thin surfactant films
   H. B. Kutzner, P. F. Luckham and J. Rennie

17. Equilibrium and non-equilibrium simulation studies of fluid alkanes in bulk and at interfaces
   C. J. Mundy, S. Balasubramanian, K. Bagchi, J. I. Siepmann and M. L. Klein

37. Surface-field induced organisation at solid/fluid interfaces
   S. D. Evans, H. Allinson, N. Boden and J. R. Henderson

49. Ordering and structure at interfaces of colloidal dispersions under flow
   S. M. Clarke and A. R. Rennie

65. Use of complementary neutron scattering techniques in studying the effect of a solid/liquid interface on bulk solution structures

79. General Discussion

93. Simulation of homogeneous crystal nucleation close to coexistence
   P-R. ten Wolde, M. J. Ruiz-Montero and D. Frenkel

111. Smectic-A ordering in liquid crystal films
   Y. Martinez-Raton, A. M. Somoza, L. Mederos and D. E. Sullivan

127. Neutron specular and off-specular reflection from the surface of aerosol-OT solutions above the critical micelle concentration
   Z. X. Li, J. R. Lu, R. K. Thomas and J. Penfold

139. J-Aggregates and liquid crystal structures of cyanine dyes
   W. J. Harrison, D. L. Mateer and G. J. T. Tiddy

155. General Discussion

167. Statistical thermodynamics of adsorption, micellisation and solubilisation in water–oil–surfactant systems
   N. A. M. Besseling and B. P. Binks

183. Assembly of extended interfaces and micelles: Charge frustrated models of amphiphilic mixtures
   H-J. Woo, C. Carraro and D. Chandler

193. Molecular dynamics simulation of the non-linear optical susceptibility at the phenol/water/air interface
   V. P. Sokhan and D. J. Tildesley
Phase transitions in monolayers of medium-chain alcohols on water studied by sum-frequency spectroscopy and ellipsometry

B. D. Casson, R. Braun and C. D. Bain

Coadsorption of didodecyldimethylammonium bromide and dodecan-1-ol on a hydrophobic surface studied by sum frequency spectroscopy

M. S. Johal, E. W. Usadi and P. B. Davies

Composition of mixed surfactant–charged polymer complexes adsorbed at the air/water interface

Dynamic effects at the interface between two immiscible electrolyte solutions (ITIES)

R. M. Allen and D. E. Williams

Structure of alkyl ammonium solutions in vermiculite clays

G. D. Williams, N. T. Skipper, M. V. Smalley, A. K. Soper and S. M. King

Structure and dynamics of liquid films on solid surfaces

S. Bardon, M. Cachile, A-M. Cazabat, X. Fanton, M-P. Valignat and S. Villette

Bending moduli and spontaneous curvature in one-phase microemulsion systems. A molecular approach

F. A. M. Leermakers, J. van Noort, S. M. Oversteegen, P. A. Barneveld and J. Lyklema

Rupture of thin liquid films from Newtonian and viscoelastic liquids. Bursting behaviour of Newton-black films

L. J. Evers, S. Y. Shulepov and G. Frens

Structure and interactions in black films

D. Sentenac, A. Schalchli, M. Nedyalkov and J. J. Benattar

General Discussion
