Dynamics of Electronically Excited States in Gaseous, Cluster and Condensed Media
A General Discussion on

*Dynamics of Electronically Excited States in Gaseous, Cluster and Condensed Media*

15th, 16th and 17th December, 1997

A General Discussion on Dynamics of Electronically Excited States in Gaseous, Cluster and Condensed Media was held at the University of Sussex, UK on 15th, 16th and 17th December, 1997.

**Contents**

1 Spiers Memorial Lecture: On dynamics. From isolated molecules to biomolecules  
   **J. Jortner**
23 Excited state dynamics of chromophores in glasses and in photosynthetic proteins  
   **Y. Nagasawa, J-Y. Yu, M. Cho and G. R. Fleming**
35 Femtosecond polarisability anisotropy relaxation and solvation dynamics. The cases of aniline and methanol  
   **N. A. Smith and S. R. Meech**
51 Optical properties of solvated molecules calculated by a QMMM method. Chlorophyll a and bacteriochlorophyll a  
   **I. P. Mercer, I. R. Gould and D. R. Klug**
63 Concerted elimination dynamics from highly excited states  
   **Q. Zhang, U. Marvet and M. Dantus**
81 General Discussion
101 Time-resolved studies of dynamics in molecular and cluster anions  
   **B. J. Greenblatt, M. T. Zanni and D. M. Neumark**
115 Excited state dynamics in clusters of oxygen  
   **R. Li, K. A. Hanold, M. C. Garner, A. K. Luong and R. E. Continetti**
131 Direct detection and spectroscopy of O₄⁺  
   **H. M. Bevsek, M. Ahmed, D. S. Peterka, F. C. Sailes and A. G. Suits**
139 Rydberg states in quantum crystals. NO in solid H₂  
   **F. Vigliotti, M. Chergui, M. Dickgiesser and N. Schwentner**
161 Spin–orbit effects in the formation of the Na–He excimer on the surface of He clusters  
   **J. Reho, C. Callegari, J. Higgins, W. E. Ernst, K. K. Lehmann and G. Scoles**
175 Photochemical processes in doped rare gas clusters studied with luminescence spectroscopic methods  
   **R. von Pietrowski, M. Lengen, L. Moussavizadeh, L. Museur, A. V. Kanaev, M. C. Castex and T. Möller**
187 General Discussion
Chemical reaction dynamics when the Born–Oppenheimer approximation fails. Understanding which changes in the electronic wavefunction might be restricted

N. R. Forde, T. L. Myers and L. J. Butler

Photodissociation, electronic relaxation and recombination of HCl in Ar_n(HCl) clusters. Non-adiabatic molecular dynamics simulations

M. Y. Niv, A. I. Krylov and R. B. Gerber

Lattice dynamics from the ‘eyes’ of the chromophore. Real-time studies of I_2 isolated in rare gas matrices

R. Zadoyan, J. Almy and V. A. Apkarian

Photo-predissociation of the N_2(e^1Π_u) state in the presence of a magnetic field

B. Buijsse and W. J. van der Zande

Chemical reaction within the electronically excited B(2s2p^2^2D)-H_2 complex

P. J. Dagdigian and X. Yang

Dynamics of substrate mediated photodesorption. The role of the excited state potential

H. Guo and F. Chen

General Discussion

Adiabatic and non-adiabatic dynamics studies of O(^1D) + H_2 → OH + H

G. C. Schatz, L. A. Pederson and P. J. Kuntz

O(^1D_2) + H_2 → OH | v', N' > + H. The anatomy of a reaction

Reactive scattering of ground-state and electronically excited oxygen atoms on a liquid hydrocarbon surface

D. J. Garton, T. K. Minton, M. Alagia, N. Balucani, P. Casavecchia and G. G. Volpi

Dynamics of desorption of reaction products from reaction on large clusters

J. P. Visticot, M. A. Gaveau, P. Eulry, M. Lengaigne, J. M. Mestdagh and C. Gée

Dynamics of harpooning studied by transition state spectroscopy. Na⋅⋅⋅FH

X. Y. Chang, R. Ehlich, A. J. Hudson, P. Piecuch and J. C. Polanyi

General Discussion

Concluding Remarks

R. M. Hochstrasser and J. P. Simons
