Chemistry and Physics of Molecules and Grains in Space
A General Discussion on Chemistry and Physics of Molecules and Grains in Space was held at the University of Nottingham, UK on 15th, 16th and 17th April, 1998.

Contents

1 Introductory Lecture: Frontiers of astrochemistry
   D. A. Williams

15 Chemical models of hot molecular cores
   T. J. Millar and J. Hatchell

31 What can ISO tell us about gas–grain chemistry?
   E. F. van Dishoeck

47 Electron abundance in dense cloud cores. Implications for star formation
   R. Plume, E. A. Bergin, J. P. Williams and P. Č. Myers

61 Chemical processes in astrophysical radiation fields
   P. C. Stancil and A. Dalgarno

71 Low temperature electron attachment to polycyclic aromatic hydrocarbons

83 General Discussion

109 Electronic spectroscopy of carbon chains and relevance to astrophysics
   D. A. Kirkwood, H. Linnartz, M. Grutter, O. Dopfer, T. Motylewski, M. Pachkov,
   M. Tulej, M. Wyss and J. P. Maier

121 New carbon chains in the laboratory and in interstellar space
   P. Thaddeus, M. C. McCarthy, M. J. Travers, C. A. Gottlieb and W. Chen

137 Current status of the H$_2$ diffuse interstellar bands theory. Assignments of the $\lambda\lambda$5780, 6284, 4428, 4882 large-equivalent-width diffuse interstellar bands
   P. P. Sorokin, J. H. Glownia and W. Ubachs

165 Neutral–neutral reactions at the temperatures of interstellar clouds. Rate coefficients for reactions of C$_2$H radicals with O$_2$, C$_2$H$_2$, C$_2$H$_4$ and C$_3$H$_6$ down to 15 K
   D. Chastaing, P. L. James, I. R. Sims and I. W. M. Smith

183 Combined crossed molecular beams and $ab\;initio$ investigation of the formation of carbon-bearing molecules in the interstellar medium via neutral–neutral reactions
   R. I. Kaiser, C. Ochsenfeld, D. Stranges, M. Head-Gordon and Y. T. Lee

205 Chemical and physical evolution of dark clouds. Molecular spectral line survey toward TMC-1
   M. Ohishi and N. Kaifu

217 General Discussion
