Mathematics Handbook

for Science and Engineering

Fourth Edition

Springer

 Studentlitteratur

Contents

Preface 7

1 Fundamentals. Discrete Mathematics 9

- 1.1 Logic 9
- 1.2 Set Theory 14
- 1.3 Binary Relations and Functions 17
- 1.4 Algebraic Structures 21
- 1.5 Graph Theory 33
- 1.6 Codes 37

2 Algebra 43

- 2.1 Basic Algebra of Real Numbers 43
- 2.2 Number Theory 49
- 2.3 Complex Numbers 61
- 2.4 Algebraic Equations 63

3 Geometry and Trigonometry 66

- 3.1 Plane Figures 66
- 3.2 Solids 71
- 3.3 Spherical Trigonometry 75
- 3.4 Geometrical Vectors 77
- 3.5 Plane Analytic Geometry 79
- 3.6 Analytic Geometry in Space 83

4 Linear Algebra 87

- 4.1 Matrices 87
- 4.2 Determinants 90
- 4.3 Systems of Linear Equations 92
- 4.4 Linear Coordinate Transformations 94
- 4.5 Eigenvalues. Diagonalization 95
- 4.6 Quadratic Forms 100
- 4.7 Linear Spaces 103
- 4.8 Linear Mappings 105
- 4.9 Tensors 110
- 4.10 Complex matrices 111

5 The Elementary Functions 115

- 5.1 A Survey of the Elementary Functions 115
- 5.2 Polynomials and Rational Functions 116

5.3	Logarithmic, Exponential, Power and Hyperbolic Functions	118
5.4	Trigonometric and Inverse Trigonometric Functions	122
6	Differential Calculus (one variable)	129
6.1	Some Basic Concepts	129
6.2	Limits and Continuity	130
6.3	Derivatives	132
6.4	Monotonicity. Extremes of Functions	135
7	Integral Calculus	137
7.1	Indefinite Integrals	137
7.2	Definite Integrals	142
7.3	Applications of Differential and Integral Calculus	144
7.4	Tables of Indefinite Integrals	149
7.5	Tables of Definite Integrals	174
8	Sequences and Series	179
8.1	Sequences of Numbers	179
8.2	Sequences of Functions	180
8.3	Series of Constant Terms	181
8.4	Series of Functions	183
8.5	Taylor Series	185
8.6	Special Sums and Series	188
9	Ordinary Differential Equations (ODE)	196
9.1	Differential Equations of the First Order	196
9.2	Differential Equations of the Second Order	198
9.3	Linear Differential Equations	201
9.4	Autonomous systems	209
9.5	General Concepts and Results	212
9.6	Linear Difference Equations	214
10	Multidimensional Calculus	217
10.1	The Space \mathbf{R}^n	217
10.2	Surfaces. Tangent Planes	218
10.3	Limits and Continuity	219
10.4	Partial Derivatives	220
10.5	Extremes of Functions	223
10.6	Functions $f: \mathbf{R}^n \rightarrow \mathbf{R}^m$ ($\mathbf{R}^n \rightarrow \mathbf{R}^n$)	225
10.7	Double Integrals	227
10.8	Triple Integrals	230
10.9	Partial Differential Equations	235
11	Vector Analysis	242
11.1	Curves	242
11.2	Vector Fields	244

11.3	Line Integrals	249
11.4	Surface Integrals	252
12	Orthogonal Series and Special Functions	255
12.1	Orthogonal Systems	255
12.2	Orthogonal Polynomials	259
12.3	Bernoulli and Euler Polynomials	265
12.4	Bessel Functions	266
12.5	Functions Defined by Transcendental Integrals	283
12.6	Step and Impulse Functions	293
12.7	Functional Analysis	294
12.8	Lebesgue Integrals	299
12.9	Generalized functions (Distributions)	304
13	Transforms	306
13.1	Trigonometric Fourier Series	306
13.2	Fourier Transforms	311
13.3	Discrete Fourier Transforms	320
13.4	The z -transform	322
13.5	Laplace Transforms	325
13.6	Dynamical Systems (Filters)	333
13.7	Hankel and Hilbert transforms	336
13.8	Wavelets	339
14	Complex Analysis	344
14.1	Functions of a Complex Variable	344
14.2	Complex Integration	347
14.3	Power Series Expansions	349
14.4	Zeros and Singularities	350
14.5	Conformal Mappings	351
15	Optimization	360
15.1	Calculus of Variations	360
15.2	Linear Optimization	366
15.3	Non-linear Optimization	370
15.4	Dynamic Optimization	372
16	Numerical Analysis and Programming	374
16.1	Approximations and Errors	374
16.2	Numerical Solution of Equations	375
16.3	Interpolation	381
16.4	Numerical Integration and Differentiation	387
16.5	Numerical Solutions of Differential Equations	395
16.6	Numerical summation	404

17 Probability Theory 407

- 17.1 Basic Probability Theory 407
- 17.2 Probability Distributions 417
- 17.3 Stochastic Processes 422
- 17.4 Algorithms for Calculation of Probability Distributions 426
- 17.5 Simulation 428
- 17.6 Queueing Systems 432
- 17.7 Reliability 435
- 17.8 Tables 442

18 Statistics 462

- 18.1 Descriptive Statistics 462
- 18.2 Point Estimation 471
- 18.3 Confidence Intervals 474
- 18.4 Tables for Confidence Intervals 478
- 18.5 Tests of Significance 484
- 18.6 Linear Models 490
- 18.7 Distribution-free Methods 495
- 18.8 Statistical Quality Control 501
- 18.9 Factorial Experiments 505
- 18.10 Analysis of life time (failure time) data 508
- 18.11 Statistical glossary 509

19 Miscellaneous 513

Glossary of functions 527

Glossary of symbols 528

Index 531
