A Non-Random Walk Down Wall Street

Andrew W. Lo
A. Craig MacKinlay

Princeton University Press
Princeton, New Jersey
3 The Size and Power of the Variance Ratio Test in Finite Samples: A Monte Carlo Investigation

3.1 Introduction ........................................... 47
3.2 The Variance Ratio Test ............................... 49
   3.2.1 The IID Gaussian Null Hypothesis .......... 49
   3.2.2 The Heteroskedastic Null Hypothesis .... 52
   3.2.3 Variance Ratios and Autocorrelations ... 54
3.3 Properties of the Test Statistic under the Null Hypotheses ... 55
   3.3.1 The Gaussian IID Null Hypothesis ....... 55
   3.3.2 A Heteroskedastic Null Hypothesis ....... 61
3.4 Power .................................................. 68
   3.4.1 The Variance Ratio Test for Large $q$ ..... 69
   3.4.2 Power against a Stationary AR(1) Alternative ... 70
   3.4.3 Two Unit Root Alternatives to the Random Walk .. 73
3.5 Conclusion ............................................. 81

4 An Econometric Analysis of Nonsynchronous Trading ........................................... 85
4.1 Introduction ........................................... 85
4.2 A Model of Nonsynchronous Trading ............... 88
   4.2.1 Implications for Individual Returns ....... 90
   4.2.2 Implications for Portfolio Returns ......... 93
4.3 Time Aggregation .................................. 95
4.4 An Empirical Analysis of Nontrading .............. 99
   4.4.1 Daily Nontrading Probabilities Implicit in Autocorrelations .................... 101
   4.4.2 Nontrading and Index Autocorrelations .... 104
4.5 Extensions and Generalizations .................. 105
Appendix A4: Proof of Propositions .................. 108

5 When Are Contrarian Profits Due to Stock Market Overreaction? 115
5.1 Introduction ........................................... 115
5.2 A Summary of Recent Findings .................... 118
5.3 Analysis of Contrarian Profitability ............. 121
   5.3.1 The Independently and Identically Distributed Benchmark .................. 124
   5.3.2 Stock Market Overreaction and Fads ....... 124
   5.3.3 Trading on White Noise and Lead–Lag Relations 126
   5.3.4 Lead–Lag Effects and Nonsynchronous Trading .... 127
   5.3.5 A Positively Dependent Common Factor and the Bid–Ask Spread .......... 130
5.4 An Empirical Appraisal of Overreaction .......... 132
6 Long-Term Memory in Stock Market Prices 147
   6.1 Introduction 147
   6.2 Long-Range Versus Short-Range Dependence 149
      6.2.1 The Null Hypothesis 149
      6.2.2 Long-Range Dependent Alternatives 152
   6.3 The Rescaled Range Statistic 155
      6.3.1 The Modified $R/S$ Statistic 158
      6.3.2 The Asymptotic Distribution of $Q_n$ 160
      6.3.3 The Relation Between $Q_n$ and $\tilde{Q}_n$ 161
      6.3.4 The Behavior of $Q_n$ Under Long Memory Alternatives 163
   6.4 $R/S$ Analysis for Stock Market Returns 165
      6.4.1 The Evidence for Weekly and Monthly Returns 166
   6.5 Size and Power 171
      6.5.1 The Size of the $R/S$ Test 171
      6.5.2 Power Against Fractionally-Differenced Alternatives 174
   6.6 Conclusion 179

Appendix A6: Proof of Theorems 181

Part II 185

7 Multifactor Models Do Not Explain Deviations from the CAPM 189
   7.1 Introduction 189
   7.2 Linear Pricing Models, Mean-Variance Analysis, and the Optimal Orthogonal Portfolio 192
   7.3 Squared Sharpe Measures 195
   7.4 Implications for Risk-Based Versus Nonrisk-Based Alternatives 196
      7.4.1 Zero Intercept $F$-Test 197
      7.4.2 Testing Approach 198
      7.4.3 Estimation Approach 206
   7.5 Asymptotic Arbitrage in Finite Economies 208
   7.6 Conclusion 212

8 Data-Snooping Biases in Tests of Financial Asset Pricing Models 213
   8.1 Quantifying Data-Snooping Biases With Induced Order Statistics 215
      8.1.1 Asymptotic Properties of Induced Order Statistics 216
      8.1.2 Biases of Tests Based on Individual Securities 219
8.1.3 Biases of Tests Based on Portfolios of Securities 224
8.1.4 Interpreting Data-Snooping Bias as Power 228
8.2 Monte Carlo Results 230
8.2.1 Simulation Results for $\hat{\theta}_p$ 231
8.2.2 Effects of Induced Ordering on $F$-Tests 231
8.2.3 $F$-Tests With Cross-Sectional Dependence 236
8.3 Two Empirical Examples 238
8.3.1 Sorting By Beta 238
8.3.2 Sorting By Size 240
8.4 How the Data Get Snooped 243
8.5 Conclusion 246

9 Maximizing Predictability in the Stock and Bond Markets 249
9.1 Introduction 249
9.2 Motivation 252
9.2.1 Predicting Factors vs. Predicting Returns 252
9.2.2 Numerical Illustration 254
9.2.3 Empirical Illustration 256
9.3 Maximizing Predictability 257
9.3.1 Maximally Predictable Portfolio 258
9.3.2 Example: One-Factor Model 259
9.4 An Empirical Implementation 260
9.4.1 The Conditional Factors 261
9.4.2 Estimating the Conditional-Factor Model 262
9.4.3 Maximizing Predictability 269
9.4.4 The Maximally Predictable Portfolios 271
9.5 Statistical Inference for the Maximal $R^2$ 273
9.5.1 Monte Carlo Analysis 273
9.6 Three Out-of-Sample Measures of Predictability 276
9.6.1 Naive vs. Conditional Forecasts 276
9.6.2 Merton’s Measure of Market Timing 279
9.6.3 The Profitability of Predictability 281
9.7 Conclusion 283

Part III 285

10 An Ordered Probit Analysis of Transaction Stock Prices 287
10.1 Introduction 287
10.2 The Ordered Probit Model 290
10.2.1 Other Models of Discreteness 294
10.2.2 The Likelihood Function 294
10.3 The Data 295
10.3.1 Sample Statistics 297
10.4 The Empirical Specification 307
Contents

10.5 The Maximum Likelihood Estimates .................................. 310
  10.5.1 Diagnostics .................................................. 316
  10.5.2 Endogeneity of $\Delta t_k$ and $IBS_k$ .......................... 318
10.6 Applications .......................................................... 320
  10.6.1 Order-Flow Dependence ...................................... 321
  10.6.2 Measuring Price Impact Per Unit Volume of Trade ........... 322
  10.6.3 Does Discreteness Matter? .................................... 331
10.7 A Larger Sample ...................................................... 338
10.8 Conclusion ............................................................. 344

11 Index-Futures Arbitrage and the Behavior of Stock Index Futures Prices 347
  11.1 Arbitrage Strategies and the Behavior of Stock Index Futures Prices .............................................. 348
    11.1.1 Forward Contracts on Stock Indexes (No Transaction Costs) .................................................. 349
    11.1.2 The Impact of Transaction Costs ............................................. 350
  11.2 Empirical Evidence .................................................. 352
    11.2.1 Data .......................................................... 353
    11.2.2 Behavior of Futures and Index Series ......................... 354
    11.2.3 The Behavior of the Mispricing Series ....................... 360
    11.2.4 Path Dependence of Mispricing ......................... 364
  11.3 Conclusion .......................................................... 367

12 Order Imbalances and Stock Price Movements on October 19 and 20, 1987 369
  12.1 Some Preliminaries ............................................... 370
    12.1.1 The Source of the Data ..................................... 371
    12.1.2 The Published Standard and Poor's Index ................ 372
  12.2 The Constructed Indexes .......................................... 373
  12.3 Buying and Selling Pressure ...................................... 378
    12.3.1 A Measure of Order Imbalance .............................. 378
    12.3.2 Time-Series Results ....................................... 380
    12.3.3 Cross-Sectional Results .................................... 381
    12.3.4 Return Reversals ........................................... 385
  12.4 Conclusion .......................................................... 387

Appendix A12 ............................................................. 389
  A12.1 Index Levels ..................................................... 389
  A12.2 Fifteen-Minute Index Returns ................................ 393

References .............................................................. 395

Index .............................................................. 417
