Game Theory for Political Scientists

James D. Morrow

Princeton University Press
Princeton, New Jersey
## CONTENTS

List of Figures and Tables ........................................... xiii
Preface and Acknowledgments ................................. xix

### Chapter 1: Overview

<table>
<thead>
<tr>
<th>Topic</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>What Is Game Theory?</td>
<td>1</td>
</tr>
<tr>
<td>What Can You Do with Game Theory?</td>
<td>2</td>
</tr>
<tr>
<td>Four Problems in Political Science</td>
<td>3</td>
</tr>
<tr>
<td>Why Model?</td>
<td>6</td>
</tr>
<tr>
<td>The Rational Choice Approach to Social Modeling</td>
<td>7</td>
</tr>
<tr>
<td>How to Use This Book</td>
<td>8</td>
</tr>
<tr>
<td>The Plan of This Book</td>
<td>10</td>
</tr>
<tr>
<td>Further Reading</td>
<td>11</td>
</tr>
</tbody>
</table>

*Textbooks; Supplementary Readings; Esoteric Books on Game Theory; Journals*

### Chapter 2: Utility Theory

<table>
<thead>
<tr>
<th>Topic</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Concept of Rationality</td>
<td>17</td>
</tr>
<tr>
<td>How Do Utility Functions Predict Actions?</td>
<td>22</td>
</tr>
<tr>
<td>An Example: Nixon’s Christmas Bombing</td>
<td>25</td>
</tr>
<tr>
<td>Certainty, Risk, and Uncertainty</td>
<td>28</td>
</tr>
<tr>
<td>Utility Theory under the Condition of Risk</td>
<td>29</td>
</tr>
<tr>
<td>Some Common Misconceptions about Utility Theory</td>
<td>33</td>
</tr>
<tr>
<td>Utility Functions and Types of Preferences</td>
<td>34</td>
</tr>
<tr>
<td>A Simple Example: The Calculus of Deterrence</td>
<td>38</td>
</tr>
<tr>
<td>Another Simple Example: The Decision to Vote</td>
<td>43</td>
</tr>
<tr>
<td>Why Might Utility Theory Not Work?</td>
<td>44</td>
</tr>
<tr>
<td>Review</td>
<td>49</td>
</tr>
<tr>
<td>Further Reading</td>
<td>49</td>
</tr>
</tbody>
</table>
Chapter 3: **Specifying a Game** 51

- Formalizing a Situation: Deterrence in the Cuban Missile Crisis 51
- Games in Extensive Form 58
- Games in Strategic Form 65
- Review 71
- Further Reading 72

Chapter 4: **Classical Game Theory** 73

- Defining the Terms of Classical Game Theory 74
- Domination, Best Replies, and Equilibrium 77
- Mixed Strategies 81
- The Minmax Theorem and Equilibria of Two-Person, Zero-Sum Games 89
- Characteristics of Nash Equilibria 91
- Nash Equilibria and Common Conjectures 94
- Rationalizability 98
- Political Reform in Democracies 101
- Candidate Competition in the Spatial Model of Elections 104
- A Very Brief Introduction to Cooperative Game Theory 111
- Review 119
- Further Reading 120

Chapter 5: **Solving Extensive-Form Games: Backwards Induction and Subgame Perfection** 121

- Backwards Induction 124
- Subgame Perfection 128
- Sophisticated Voting 133
- Agenda Control 135
- Legislative Rules and Structure-Induced Equilibria 138
- The Rubinstein Bargaining Model 145
CONTENTS ix

Bargaining in Legislatures 149
Why Might Backwards Induction Yield Counterintuitive Results? 156
Review 158
Further Reading 159

In General; Legislative Studies

Chapter 6: Beliefs and Perfect Bayesian Equilibria 161
Bayes’s Theorem 163
The Preference for Biased Information 166
Perfect Bayesian Equilibria 170
Nuclear Deterrence 180
Review 186
Further Reading 186

In General; Comparative Politics

Chapter 7: More on Noncooperative Equilibrium: Perfect and Sequential Equilibria 188
Elimination of Weakly Dominated Strategies 189
Perfect Equilibrium 192
Sequential Equilibrium 196
Deterrence and the Signaling of Resolve 199
“Why Vote?” Redux 212
Review 216
Further Reading 217

In General; Electoral Politics

Chapter 8: Games of Limited Information and Restrictions on Beliefs 219
Signaling Games 222
The Informational Role of Congressional Committees 227
Bargaining under Incomplete Information 237
Deterrence and Out-of-Equilibrium Beliefs 241
An Introduction to Restrictions on Beliefs 244
“Cheap Talk” and Coordination 250
Review 256
Further Reading 257

In General; International Politics

Chapter 9: Repeated Games 260

Thinking about Repetition: Iterated Prisoner’s Dilemma 262
Folk Theorems 268
Finite Repeated Games: The Chain Store Paradox 279
Stationarity 291
Retrospective Voting and Electoral Control 293
Review 300
Further Reading 300

In General; Administrative Politics

Chapter 10: Conclusion: Where Do We Go from Here? 302

How Do Formal Models Increase Our Knowledge? 302
The Weaknesses of Game Theory 305
How Does One Build a Model? 311
Further Reading 313

Appendix 1: Basic Mathematical Knowledge 315

Algebra 315
Set Theory 318
Relations and Functions 320
Probability Theory 320
Limits 322
Differential Calculus 323
Partial Derivatives and Lagrange Multipliers 327
Integral Calculus 329
The Idea of a Mathematical Proof 331
Appendix 2: Answers to Selected Problems 333
Notes 345
Glossary of Terms in Game Theory 349
Bibliography 355
Index 365
