Preface xv

Websites to Explore History of Psychology xvii

CHAPTER 1

Introduction 1

Problems in Writing a History of Psychology 1
Where to Start 1
What to Include 2
Choice of Approach 3

Why Study the History of Psychology? 3
Perspective 3
Deeper Understanding 3
Recognition of Fads and Fashions 4
Avoiding Repetition of Mistakes 4
A Source of Valuable Ideas 5
Curiosity 5

What Is Science? 5
A Combination of Rationalism and Empiricism 6
The Search for Laws 6
The Assumption of Determinism 7

Revisions in the Traditional View of Science 7
Karl Popper 7
Thomas Kuhn 8
Paradigms and Psychology 10
Popper Versus Kuhn 11

Is Psychology a Science? 11
Determinism, Indeterminism, and Nondeterminism 12

Persistent Questions in Psychology 14
What Is the Nature of Human Nature? 14
How Are the Mind and the Body Related? 14
Nativism Versus Empiricism 15
Mechanism Versus Vitalism 16
Rationalism Versus Irrationalism 16
How Are Humans Related to Nonhuman Animals? 16

What Is the Origin of Human Knowledge? 17
Objective Versus Subjective Reality 18
The Problem of the Self 19

Summary 19
Discussion Questions 20
InfoTrac College Edition 21
Suggestions for Further Reading 21
Glossary 21

CHAPTER 2

The Early Greek Philosophers 24

The World of Precivilized Humans 24
Animism and Anthropomorphism 24
Magic 24

Early Greek Religion 25
The First Philosophers 25
Thales 26
Anaximander 27
Heraclitus 27
Parmenides 28
Pythagoras 28
Empedocles 30
Democritus 31

Early Greek Medicine 32
Alcmaeon 32
Hippocrates 33

The Relativity of Truth 34
Protagoras 34
Gorgias 35
Xenophanes 35
Socrates 36

Plato 37
The Theory of Forms or Ideas 37
The Analogy of the Divided Line 38
The Allegory of the Cave 38
## Contents

**Descartes's Contributions to Psychology** 104  
**Descartes's Fate** 105  
**Summary** 106  
**Discussion Questions** 107  
**InfoTrak College Edition** 107  
**Suggestions for Further Reading** 107  
**Glossary** 108

### Chapter 5

**Empiricism, Sensationalism, and Positivism** 110  
**British Empiricism** 110  
Thomas Hobbes 111  
John Locke 114  
George Berkeley 119  
David Hume 122  
David Hartley 128  
James Mill 131  
John Stuart Mill 132  
Alexander Bain 136  
**French Sensationalism** 139  
Pierre Gassendi 140  
Julien de La Mettrie 141  
Étienne Bonnot de Condillac 143  
Claude Helvétius 145  
**Positivism** 146  
Auguste Comte 146  
A Second Type of Positivism 149  
**Summary** 150  
**Discussion Questions** 151  
**InfoTrac College Edition** 152  
**Suggestions for Further Reading** 152  
**Glossary** 153

### Chapter 6

**Rationalism** 156  
**Baruch Spinoza** 157  
Nature of God 158  
Mind-Body Relationship 158  
Denial of Free Will 159  
Self-Preservation as the Master Motive 159  
Emotions and Passions 159  
Spinoza's Influence 160  
**Nicholas de Malebranche** 161  
**Gottfried Wilhelm von Leibniz** 161  
Disagreement with Locke 161  
Monadology 162  
Mind-Body Relationship 163  
Conscious and Unconscious Perception 164  
**Thomas Reid** 165  
Common Sense 165  
Direct Realism 166  
Faculty Psychology 166  
**Immanuel Kant** 167  
Categories of Thought 168  
Causes of Mental Experience 169  
The Categorical Imperative 170  
Kant's Influence 170  
**Johann Friedrich Herbart** 171  
Psychology as a Science 171  
Psychic Mechanics 172  
The Apperceptive Mass 172  
Educational Psychology 173  
Herbart's Influence 173  
**Georg Wilhelm Friedrich Hegel** 174  
The Absolute 175  
Dialectic Process 175  
Hegel's Influence 175  
**Summary** 176  
**Discussion Questions** 178  
**InfoTrac College Edition** 178  
**Suggestions for Further Reading** 179  
**Glossary** 179

### Chapter 7

**Romanticism and Existentialism** 181  
**Romanticism** 182  
Jean-Jacques Rousseau 182  
Johann Wolfgang von Goethe 185  
Arthur Schopenhauer 186  
**Existentialism** 189  
Søren Kierkegaard 189  
Friedrich Wilhelm Nietzsche 192  
Kierkegaard and Nietzsche 197  
**Summary** 198  
**Discussion Questions** 199  
**InfoTrac College Edition** 200  
**Suggestions for Further Reading** 200  
**Glossary** 200
Chapter 8
Early Developments in Physiology and the Rise of Experimental Psychology 202

Individual Differences 202
Discrepancy Between Objective and Subjective Reality 202
Bell-Magendie Law 203
Doctrine of Specific Nerve Energies 204

Hermann von Helmholtz 206
Helmholtz's Stand Against Vitalism 206
Principle of Conservation of Energy 207
Rate of Nerve Conduction 208
Theory of Perception 208
Theory of Color Vision 209
Theory of Auditory Perception 210
Theory of Signs 210
Helmholtz's Contributions 211

Ewald Hering 211
Space Perception 211
Theory of Color Vision 212

Christine Ladd-Franklin 212
Early Research on Brain Functioning 214
Phrenology 214
Pierre Flourens 216
Paul Broca 217
Gustav Fritsch, Eduard Hitzig, and David Ferrier 218

The Rise of Experimental Psychology 219
Ernst Heinrich Weber 219
Gustav Theodor Fechner 221

Chapter 9
Voluntarism, Structuralism, and Other Early Approaches to Psychology 230
Voluntarism 231

Wilhelm Maximilian Wundt 231
Psychology's Goals 233
Wundt's Use of Introspection 237
Elements of Thought 234
Perception, Apperception, and Creative Synthesis 235
Mental Chronometry 236
Psychological Versus Physical Causation 237
Völkerpsychologie 238
The Historical Misunderstanding of Wundt 238

Edward Bradford Titchener 239
Psychology's Goals 241
Titchener's Use of Introspection 242
Mental Elements 242
Law of Combination 243
Neurological Correlates of Mental Events 243
Context Theory of Meaning 243
The Decline of Structuralism 243

Other Early Approaches to Psychology 244
Franz Clemens Brentano 244
Carl Stumpf 246
Edmund Husserl 247
Oswald Külpe 248
Hans Vaihinger 251
Hermann Ebbinghaus 252

Summary 253
Discussion Questions 255
InfoTrac College Edition 256
Suggestions for Further Reading 256
Glossary 256

Chapter 10
The Darwinian Influence 258
Evolutionary Theory Before Darwin 258
Jean Lamarck 258
Herbert Spencer 259

Charles Darwin 262
The Journey of the Beagle 262
Back in England 263
Darwin's Theory of Evolution 264
Darwin's Influence 265

Sir Francis Galton 266
The Measurement of Intelligence 267
The Word-Association Test 268
Mental Imagery 269
Anthropometry 269
The Concept of Correlation 270
Galton's Contributions to Psychology 270

Intelligence Testing After Galton 270
James McKeen Cattell 270
Alfred Binet 272
Charles Spearman and the Concept of General Intelligence 277
Cyril Burt 277

The Binet–Simon Scale in the United States 278
Lewis Madison Terman 280
Leta Stetter Hollingworth 284

Intelligence Testing in the Army 285
Robert M. Yerkes 285

The Deterioration of National Intelligence 287
Summary 289
Discussion Questions 291
InfoTrac College Edition 292
Suggestions for Further Reading 292
Glossary 293

CHAPTER 11
Functionalism 295

Early U.S. Psychology 295
Stage One: Moral and Mental Philosophy (1640–1776) 295
Stage Two: Intellectual Philosophy (1776–1886) 296
Stage Three: The U.S. Renaissance (1886–1896) 296
Stage Four: U.S. Functionalism (1896 to Present) 296

Characteristics of Functionalistic Psychology 297

William James 297
James's Crisis 299
Opposition to Wundt's Approach to Psychology 300
Stream of Consciousness 301
Habits and Instincts 302
The Self 303
Emotions 304
Free Will 304
Pragmatism 305
James's Contributions to Psychology 306

Hugo Münsterberg 306
Münsterberg's Applied Psychology 308

Münsterberg's Fate 309
Mary Whiton Calkins 309

Granville Stanley Hall 312
President of Clark University 313
Recapitulation Theory 313
Francis Cecil Sumner 315
Psychology at Clark University 317

Functionalism at the University of Chicago 318
John Dewey 318
James Rowland Angell 320
Harvey Carr 321

Functionalism at Columbia University 322
James McKeen Cattell 322
Robert Sessions Woodworth 323
Edward Lee Thorndike 325

The Fate of Functionalism 331
Summary 331
Discussion Questions 333
InfoTrac College Edition 334
Suggestions for Further Reading 334
Glossary 335

CHAPTER 12
Behaviorism 337

The Background of Behaviorism 337

Russian Objective Psychology 338
Ivan M. Sechenov 338
Ivan Petrovitch Pavlov 340
Vladimir M. Bechterev 346

John B. Watson and Behaviorism 348
Watson's Objective Psychology 354
Watson's Influence 361

William McDougall: Another Type of Behaviorism 362
McDougall's Definition of Psychology 363
Purposive Behavior 363
The Importance of Instincts 364
The Battle of Behaviorism 365

Summary 366
Discussion Questions 368
InfoTrac College Edition 369
Suggestions for Further Reading 369
Glossary 369
CHAPTER 13
Neobehaviorism 371
Positivism 371
Logical Positivism 371
Operationism 372
Physicalism 373
Neobehaviorism 373
Edward Chace Tolman  374
Purposive Behaviorism 375
Tolman's Use of Rats 376
The Use of Intervening Variables 377
Tolman's Position on Reinforcement 378
Learning Versus Performance 378
Tolman's Influence 379
Clark Leonard Hull  380
Hull's Hypothetico-Deductive Theory 382
Hull's Influence 383
Edwin Ray Guthrie  384
Major Theoretical Concepts 385
Breaking Habits 387
Drives and Intentions 387
The Formalization of Guthrie's Theory 387
Burrhus Frederic Skinner  388
Skinner's Positivism 390
Functional Analysis of Behavior 390
Operant Behavior 391
The Nature of Reinforcement 391
The Importance of the Environment 392
The Positive Control of Behavior 392
Skinner's Attitude Toward Theory 393
Applications of Skinnerian Principles 394
A Tribute to Skinner 395
Behaviorism Today 395
Summary 397
Discussion Questions 398
InfoTrac College Edition 399
Suggestions for Further Reading 399
Glossary 400

CHAPTER 14
Gestalt Psychology 402
Antecedents of Gestalt Psychology 402
Immanuel Kant 402
Ernst Mach 403
Christian von Ehrenfels 403
William James 403
Act Psychology 404
Developments in Physics 404
The Founding of Gestalt Psychology 404
Max Wertheimer 404
Kurt Koffka 405
Wolfgang Köhler 406
Isomorphism and the Law of Prägnanz 409
Application of Field Theory 409
Psychophysical Isomorphism 410
Opposition to the Constancy Hypothesis 410
Analysis: Top Down, Not Bottom Up 411
The Law of Prägnanz 411
Perceptual Constancies 412
Perceptual Gestalten 412
The Figure–Ground Relationship 412
Gestalt Principles of Perceptual Organization 413
Subjective and Objective Reality 415
The Gestalt Explanation of Learning 415
Cognitive Trial and Error 415
Insightful Learning 415
Transposition 417
Productive Thinking 419
Memory 420
Memory Processes, Traces, and Systems 420
Lewin's Field Theory 421
Aristotelian Versus Galilean Conception of Science 421
Life Space 422
Motivation 423
Conflict 423
Group Dynamics 424
The Impact of Gestalt Psychology 425
Summary 425
Discussion Questions 426
InfoTrac College Edition 427
Suggestions for Further Reading 427
Glossary 427

CHAPTER 15
Early Diagnosis, Explanation,
and Treatment of Mental Illness 430
What Is Mental Illness? 430
Harmful Behavior 430
Contents

Unrealistic Thoughts and Perceptions 430
Inappropriate Emotions 431
Unpredictable Behavior 431

Early Explanations of Mental Illness 431
Biological Explanations 431
Psychological Explanations 431
Supernatural Explanations 432

Early Approaches to the Treatment of Mental Illness 432
The Psychological Approach 433
The Supernatural Approach 433
The Biological Approach 434
The Return of the Supernatural Approach 436

Gradual Improvement in the Treatment of Mental Illness 437
Philippe Pinel 438
Benjamin Rush 440
Dorothea Lynde Dix 441
Emil Kraepelin 441
Lightner Witmer 442

The Tension Between the Psychological and Medical Models of Mental Illness 444

The Use of Hypnotism 446
Franz Anton Mesmer 446
Marquis de Puysegur 448
John Elliotson, James Esdaile, and James Braid 448
The Nancy School 449
Charcot's Proposed Explanation of Hypnosis and Hysteria 449

Summary 452
Discussion Questions 453
InfoTrac College Edition 454
Suggestions for Further Reading 454
Glossary 454

Chapter 16
Psychoanalysis and Its Early Alternatives 456

Antecedents of the Development of Psychoanalysis 456
Sigmund Freud 458
The Cocaine Episode 460

Early Influences on the Development of Psychoanalysis 461
Joseph Breuer and the Case of Anna O. 461
Freud's Visit with Charcot 463
The Birth of Free Association 464

Studies on Hysteria 464
Project for a Scientific Psychology 465
The Seduction Theory 465
Freud's Self-Analysis 467
Analysis of Dreams 467
The Oedipus Complex 468

The Psychopathology of Everyday Life 470
Freud's Trip to the United States 471

A Review of the Basic Components of Freud's Theory of Personality 471
The Id, Ego, and Superego 472
Anxiety and the Ego Defense Mechanisms 474
Psychosexual Stages of Development 475

Freud's View of Human Nature 477
Freud's Fate 478

Revisions of the Freudian Legend 479
The Reality of Repressed Memories 479

Evaluation of Freud's Theory 483
Criticisms 483
Contributions 484

Anna Freud's Contributions to Psychoanalysis 485

Early Alternatives to Psychoanalysis 488
Carl Jung 488
Alfred Adler 491
Karen Horney 493

Summary 496
Discussion Questions 500
InfoTrac College Edition 501
Suggestions for Further Reading 501
Glossary 501

Chapter 17
Humanistic (Third-Force) Psychology 505

The Mind, the Body, and the Spirit 505

Antecedents of Third-Force Psychology 506
Phenomenology 507
Existential Psychology 508
Martin Heidegger 508
