CONTENTS

CHAPTER 1

ORIENTATION TO PERSONALITY

What Is Personality Psychology? 1
Stable, Coherent Individual Differences 1
Describing, Predicting, Understanding 2
Defining Personality 3
Theory and Levels of Analysis in Personality Psychology 4
Early “Big Picture” Theory 4
From Grand Theories to Levels of Analysis 5
Levels of Analysis: Organization of This Book 6
In Focus 1.1 The Personal Side of the Science 7
The Trait-Dispositional Level 8
The Psychodynamic-Motivational Level 8
The Phenomenological Level 9
The Behavioral-Conditioning Level 10
The Social Cognitive Level 11
The Biological Level 12
Levels of Analysis Applied to Understand Unexpected Aggression:
  The Texas Tower Killer 12
Integration of Levels: The Person as a Whole 15
Practical Applications: Coping and
  Personal Adaptation 16
Summary 17
Key Terms 18

CHAPTER 2

DATA, METHODS, AND TOOLS

Why a Science of Personality? Beyond
Hindsight Understanding 19
In Focus 2.1 Gary W., the Text’s Case—
  Gary’s Self-Description 21
The Range of Personality-Relevant Measures 21
Interviews 22
Tests and Self-Reports 22
In Focus 2.2 Early Personality Measurement 23
Projective Measures 23
Naturalistic Observation and Behavior Sampling 23
Remote Behavior Sampling: Daily Life Experiences 26
Physiological Functioning and Brain Imaging 27
Conceptual and Methodological Tools 29
  Constructs and Operational Definitions 29
  An Example: Defining the Construct of Aggression 30
Establishing Relationships Among Observations 31
  Correlation: What Goes with What? 31
  Interpreting Correlations 33
Reliability and Validity of Observations and Measures 34
  Reliability: Are the Measurements Consistent? 34
  Validity: What Is Being Measured? 34
    Content Validity 34
    Criterion Validity 35
    Construct Validity: Elaborating the Meaning of the Construct 35
The Experimental Approach 36
  Independent and Dependent Variables 36
  Experimental and Control Groups 36
  Double-Blind Designs 37
Ethics in Personality Research 37
Summary 39
Key Terms 40

PART I
THE TRAIT-DISPOSITIONAL LEVEL 41

PRELUDE TO PART I: The Trait-Dispositional Level 41

CHAPTER 3
TYPES AND TRAITS 43

Types and Traits 44
  Types 44
    Traits: Individual Differences on Dimensions 44
      Traits Defined 44
      In Focus 3.1 An Example: Type A Personality 45
        Describing and Explaining 46
    Trait Attributions 47
    Gordon Allport 47
    Raymond B. Cattell 49
    Hans J. Eysenck 51
  Common Features of Trait Theories 53
    Inferring Traits from Behavioral Signs 53
    Generality and Stability of Traits 54
    Traits and States Distinguished 54
    Search for Basic Traits 54
    Quantification 55
    Aggregating Across Situations to
      Increase Reliability 55
CHAPTER 4

THE EXPRESSIONS OF DISPOSITIONS 69

Traits, Situations, and the Personality Paradox 70
Individual Differences in Behavior Tendencies 70
The Intuitive Assumption of Consistency 70
The 1968 Challenge 70
The Paradox Defined 71
Incorporating Situations Into Traits 71
In Focus 4.1 The Person versus Situation Debate 72
If . . . Then . . . Situation–Behavior Signatures 73
Evidence for Signatures Indicative of
Personality Types 74
Gary W's Behavioral Signatures 75
Behavioral Signatures of Different Personality Types 75
The Narcissistic Signature 76
The Signature of Rejection Sensitivity 77
Two Types of Consistency 78
Uses of the Two Types of Consistency 78
Interactionism in Personality Psychology 80
The Meaning of Person × Situation Interaction 80
An Example: Uncertainty Orientation 80
Definition of Triple Typology 81
In Focus 4.2 A Triple Typology for Hostility 82
Interaction as a Rule in Science 83
Resolution of the Personality Paradox 83
Summary: Expressions of Consistency in
Traits-Dispositions 84

Summary 86
Key Terms 86

Taking Stock Part I: The Trait-Dispositional Level 87
Overview: Focus, Concepts, Methods 87
Enduring Contributions of the
Trait-Dispositional Level 88
PART II

THE PSYCHODYNAMIC-MOTIVATIONAL LEVEL  91

PRELUDE TO PART II: The Psychodynamic-Motivational Level  91

CHAPTER 5

PSYCHODYNAMIC THEORIES: FREUD’S CONCEPTIONS  93

Basic Assumptions: Unconscious Mental Determinism  95
The Unconscious  95
The Roads to the Unconscious  96
  Dreams  96
  Free Association  97
In Focus 5.1 Encouraging Free Association  97
Psychic Structure: Anatomy of the Mind  97
The Id: At the Core  98
  The Pleasure Principle  98
  Sexual and Aggressive Instincts  98
  Primary Process Thinking  98
The Ego: Tester of Reality  99
  The Reality Principle  99
The Superego: High Court in Pursuit of Perfection  99
Conflict, Anxiety, and Psychodynamics  100
  Conflict  100
  Defense: Denial and Repression  101
  Libido  102
Neurosis  102
  When Defenses Fail: Neurotic Anxiety and Conflict  102
  Development of Neurotic Anxiety  102
  The Meaning of Neurotic Acts  103
Origins of Neuroses  103
The Psychopathology of Everyday Life: “Mistakes”
  That Betray  104
Motivational Determinism: Unconscious Causes  104
Personality Development  105
  Stages of Development  106
    Oral  106
    Anal  106
    Phallic  106
    Latency  106
    Genital  107
In Focus 5.2 How Oral Is the Infant?  107
Fixed and Regression  108
Freud’s Theory of Identification  108
Impact of Freud’s Theories  109
  Image of the Person  109
  The Healthy Personality  110
  Behaviors as Symptoms  110
Summary  111
Key Terms  112
CHAPTER 6
POST-FREUDIAN PSYCHODYNAMICS AND MOTIVES 113

Toward Ego Psychology and the Self 114
Anna Freud and the Ego Defense Mechanisms 114

Transformation of Motives 115
Projection 116
Reaction Formation 116
Rationalization 117
Sublimation 117

Carl Jung 118
Alfred Adler 121
Erich Fromm 123
Erik Erikson 123

Object Relations Theory and the Self 125

“Good–Bad Splitting” 126
The Development of Self 127

Attachment: The Roots of Object Relations 127

Attachment Theory 128
Early Attachment Relations: Secure/Insecure Attachment Patterns 128
Attachment in Adult Relationships 129
Kohut's Theory 131

Murray, the Harvard Personologists, and Higher Motives 134
Higher Order Motives 134
Competence Motivation 135
Need for Achievement 136

In Focus 6.1 The Thematic Appreciation Test (TAT) 136
Need for Power 137
Need for Intimacy 138
Implicit Methods for Assessing Motives 138

Summary 139
Key Terms 140

CHAPTER 7
PSYCHODYNAMIC PROCESSES 141

Anxiety and Unconscious Defenses 142
The Concept of Unconscious Repression 142

Repression versus Suppression 143
Studying Repression 143

Perceptual Defense 144
The Long History of Perceptual Defense 144
Limitations of Early Laboratory Studies 145

The Cognitive Unconscious 145
Experimental Evidence for Unconscious Processes 146

The Repressed Memory Debate 146
Return of the Repressed 147
Did It Really Happen? 147
The Power of Suggestion 147

The Risk of Excessive Skepticism 148
Optimistic Prospects for the Future of the Unconscious 148
Patterns of Defense: Individual Differences in Cognitive Avoidance 148
Repression–Sensitization 148
In Focus 7.1 Person–Situation Interaction in Repressive Tendencies 149
Selective Attention 150
Blunting versus Monitoring Styles 151
The Role of Control: When Don't You Want to Know? 152
Matching the Medical Information to the Patient's Style 153
Personality Assessment 154
The Core Beneath the Mask 154
Relying on the Clinician 154
Projective Methods 154
The Rorschach Test 155
Assessment with the TAT 156
In Focus 7.2 Gary's TAT Stories 156
Studying Lives in Depth 157
Assessment Strategy: Diagnostic Council 157
Selecting U.S. Spies: The OSS Assessment Project 158
From Situational Tests to Psychodynamic Inferences 158
Treatment and Change 159
Free Association and Dream Interpretation 159
In Focus 7.3 Today's View of Freud's Theory of Trauma 160
The Transference Relationship and Working Through 161
Relational Therapy and Restoration of the Self 162
Alternative Psychodynamic Interpretations of Gary W. 163
Summary 163
Key Terms 164
Taking Stock Part II: The Psychodynamic-Motivational Level 165
Overview: Focus, Concepts, Methods 165
Enduring Contributions of the Psychodynamic-Motivational Level 166

PART III
THE PHENOMENOLOGICAL LEVEL 169

PRELUDE TO PART III: The Phenomenological Level 169

CHAPTER 8
PHENOMENOLOGICAL CONCEPTIONS 171

Sources of Phenomenological Perspectives 173
Allport's Functional Autonomy 173
Lewin's Life Space 173
Phenomenology and Existentialism: The Here and Now 176
George Kelly's Psychology of Personal Constructs 177
The Person's Constructs 177
A Personal Construct Conceptualization of Gary W. 179
Rationality–Emotionality 179
Power and Control versus Dependence and Weakness 179
Defeat–Success 179
Security–Liberty 179
| Behavior Referents for Personal Constructs | 180 |
| Exploring the Meaning Underlying Puzzling Behavior Patterns | 181 |
| People as Scientists | 182 |
| Constructive Alternativism: Many Ways to See | 183 |
| Roles: Many Ways to Be | 183 |
| People Are What They Make of Themselves: Self-Determination | 184 |
| Carl Rogers' Self Theory | 184 |
| Unique Experience: The Subjective World | 184 |
| Self-Actualization | 185 |
| The Self | 185 |
| In Focus 8.1 Self-Actualization as a Need (Maslow) | 186 |
| Consistency and Positive Regard | 187 |
| Client-Centered Therapy | 189 |
| Rogers Reflects on His Own Work | 190 |
| Common Themes and Issues | 191 |
| Potential for Growth and Change | 191 |
| Summary | 192 |
| Key Terms | 193 |

**CHAPTER 9**

**THE INTERNAL VIEW** 194

Exploring Internal Experience 194

- Why Self Matters: Consequences of Self-Discrepancies 195
- In Focus 9.1 Effects of Self-Discrepancy: Anorexia 198
- The View Through the Person's Eyes 198
- Uses of Self-Assessment 199
- The Q-Sort Technique 200
- Interviews 201
- The Semantic Differential 201
- Nonverbal Communication 202
- Studying Lives from the Inside 203
  - The Whole Person: Psychobiography 203
  - Life Stories: Personal Narratives 203

Enhancing Self-Awareness: Accessing One's Experiences 204

- Group Experiences 204
- Meditation 206
- The Person's Experience and the Unconscious 207
- Accessing Painful Emotions: Hypnotic Probing 208
- Peering into Consciousness: Brain Images of Subjective Experiences 209
- The Value of Self-Disclosure about Subjective Experiences 209
- In Focus 9.2 Caution: Rumination Can Increase Depression 210

Change and Well-Being 210

- The Meaningful Life, the Healthy Personality 210

Summary 212

Key Terms 213

_Taking Stock Part III: The Phenomenological Level_ 214

- Overview: Focus, Concepts, Methods 214
- Enduring Contributions of the Phenomenological Level 215
PART IV

THE BEHAVIORAL-CONDITIONING LEVEL 217

PRELUDE TO PART IV: The Behavioral-Conditioning Level 217

CHAPTER 10  BEHAVIORAL CONCEPTIONS 220

The Behavioral Approach to Psychodynamics: Dollard and Miller 221
  Primary Needs and Learning 221
    Drive 222
    Cue 223
    Response 223
    Reinforcement 223
    Conflict 223
  Neurotic Conflict: The Core 225
    Anxiety and Repression 225
    Psychodynamic Behavior Theory 225
Classical Conditioning: Learning Emotional Associations 226
  How Classical Conditioning Works 226
  Higher-Order Conditioning 227
  In Focus 10.1 A Behavioral Challenge to the Psychodynamic Theory of Neurosis 230
  From Trauma to Anxiety 231
Instrumental (Operant) Conditioning: Learning from Response Consequences 232
  How Instrumental or Operant Conditioning Works 232
  Summary of Two Types of Conditioning 233
B. F. Skinner's Influence on Personality 233
  Importance of the Situation 234
  Rejection of Inferred Motives 235
  Identifying Stimuli (Situations) Controlling Behavior 236
  Conditioned Generalized Reinforcers 238
  Discrimination and Generalization in Everyday Life 238
  Shaping Behavior by Successive Approximations 240
  The Patterning of Outcomes: Schedules of Reinforcement 240
  Superstitions: Getting Reinforced into Irrationality 241
  Punishment 241
Summary 242
Key Terms 243

CHAPTER 11  ANALYZING AND MODIFYING BEHAVIOR 244

Characteristics of Behavioral Assessments 245
  Case Example: Conditions "Controlling" Gary's Anxiety 245
Direct Behavior Measurement 246
  Situational Behavior Sampling 246
  Verbal Behavior 248
Finding Effective Rewards 248
Assessing Conditions Controlling Behavior 249
Functional Analyses: Case Example 250

Changing Emotional Reactions 252
Desensitization: Overcoming Anxiety 252
Conditioned Aversion: Making Stimuli Unattractive 255
An Example: Treating Cocaine Dependency 255

Changing Behavior 256
Case Example: Hyperactivity 256
In Focus 11.1 Rewards May Backfire 257
Contingency Contracting 258
Symptom Substitution? 258
Evaluating the Consequences of Behavior, Not the Person 259
Does Changing Behavior Change Personality? 260
Unexpected Similarities: Behavior Theory and Existentialism 261
In Focus 11.2 Depression: More than Insufficient Reinforcement 263

Summary 264
Key Terms 265

Taking Stock Part IV: The Behavioral-Conditioning Level 266
Overview: Focus, Concepts, Methods 266
Enduring Contributions of the Behavioral-Conditioning Level 266

PART V

THE SOCIAL COGNITIVE LEVEL 269

PRELUDE TO PART V: The Social Cognitive Level 269

CHAPTER 12

SOCIAL COGNITIVE CONCEPTIONS 271

Development of the Social Cognitive Perspective 271
Historical Roots 271
Cognitive Processes Underlying Behavior 272
Observational Learning (Modeling): Albert Bandura 273
Learning through Observation 273
Observing Other People's Outcomes: What Happens to Them Might Happen to You 275
Rules and Symbolic Processes 275
New Directions 276
Social Cognitive Person Variables 276
Encodings (Construals): How Do You See It? 277
Expectancies and Beliefs: What Will Happen? 278
In Focus 12.1 Self-Efficacy and Its Implications 279
The Role of Self-Efficacy 279
Affects: Feelings and "Hot" Reactions 280
What Can You Do? Overcoming Stimulus Control 281
In Focus 12.2 On the History of Person Variables 282
The Cognitive–Affective Personality System (CAPS) 283
Structure and Dynamics 283
View of the Person: Gary W. 284
Assessing Person Variables and Dynamics 284
Gary's Ways of Encoding Experience and Himself 285
Affect and Distress Reactions 285
Gary's Rejection Sensitivity Dynamics (Interpersonal Domain) 285
Expectancies, Values, and Goals 286
Common Themes 287
Summary 289
Key Terms 290

CHAPTER 13
SOCIAL COGNITIVE PROCESSES 291

The Self 292
The “I” and the “Me” 292
The Self as a Basic Schema 292
Self-Schemas 293
The Relational Self and Transference 293
The Relational Self 293
Transference Reconsidered 294
Perceived Stability of Self and Potential for Change 295
Multiple Self-Concepts: Possible Selves 296
Self-Esteem and Self-Evaluation 297
Costs of Self-Esteem Pursuit 299
Features and Functions of the Self: Overview 299
Causal Attributions, Helplessness, and Mastery 300
Causal Attributions Influence Emotions and Outcomes 300
Pride and Shame 300
Learned Helplessness and Apathy 300
In Focus 13.1 The Perception of Control and Meaningfulness 301
Pessimistic Explanatory Styles 303
Learned Optimism 303
In Focus 13.2 The Illusory Warm Glow of Optimism 304
Helpless versus Mastery-Oriented Children 305
Incremental versus Entity Theories: Your Own Personality Theory Matters 306
Personality Assessment 307
Measuring Self-Efficacy Expectancies 308
Individual Differences in If . . . then . . . Signatures 309
The Implicit Association Test (IAT) 310
Personality Change and Therapy 311
Social Cognitive Influences 312
Cognitive Behavior Therapy 313
Beck's Cognitive Therapy 314
Summary 315
Key Terms 316
Taking Stock Part V: The Social Cognitive Level 317
Overview: Focus, Concepts, Methods 317
Enduring Contributions of the Social Cognitive Level 318
PART VI
THE BIOLOGICAL LEVEL  321

PRELUDE TO PART VI: The Biological Level  321

CHAPTER 14  HEREDITY AND PERSONALITY  323

Genetic Bases of Personality  323
The Human Genome: The Genetic Heritage  323
The Twin Method  324
Results of Twin Studies  325
  The Big Five  325
  Temperaments  326
  Attitudes and Beliefs  328
  Aggressive and Altruistic Tendencies  328
  Romantic Love  329
Twins Reared Apart  329
Beyond Self-Report Measures  330
In Focus 14.1 Understanding Heritability and the Heritability Index  331
Heredity versus Environment: Another False Dichotomy  332
Summary  333
Gene-Environment Interplay  333
The Unique (Nonshared) Psychological Environment of Each Family Member  334
  Environmental Influences Within the Family  334
  Environmental Influences Outside the Family  335
Interactions Among Nature-Nurture Influences  336
Genes Also Influence Environments  337
Search for Specific Gene–Behavior Connections  338
Causal Mechanisms: The Role of Neurotransmitter Systems  339
Genetic and Environmental Influences on Person × Situation Interactions  341
Social Environments Change the Expression of Genes, the Brain, and Personality  341
Stress is Bad for Your Brain  341
Summary  343
Key Terms  343

CHAPTER 15  EVOLUTION, BRAIN, AND PERSONALITY  344

Evolutionary Theory and Personality  344
The Evolutionary Approach  344
Implications of Evolution for Personality  346
  Mate Selection  346
  Sexual Jealousy  346
  Explanations Are Not Justifications  347
  Altruism  347
Evolutionary Theory and Inborn Constraints on Learning  347
  Biological Preparedness  348
  Evolution of Fears  348
CHAPTER 17

SELF-REGULATION: FROM GOAL PURSUIT TO GOAL ATTAINMENT 392

Self-Regulatory Processes 393

Why Self-Regulate? 393

Automaticity 393

Beyond Automaticity? 394

Approach (Appetitive) and Avoidance (Aversive) Dilemmas 394

Willpower 394

Motivation and Competence 395

The Biological Level: Executive Functions 395

Brain Mechanisms in Effortful Control 395

Self-Report Measures 396

The Trait-Dispositional Level 396

Ego Control and Ego Resilience 396

The Social Cognitive and Phenomenological Levels 398

Cognitions, Emotions, and Attention in Self-Regulation 398

Emotional Regulation in Approach (Appetitive) Dilemmas 399

Delay of Gratification as a Basic Human Task 399

The Goal-Directed Delay Situation 400

Cooling Strategies: It's How You Think That Counts 401

Strategic Self-Distraction 401

Hot and Cool Construal 402

Flexible Attention 403

Emotional Regulation in Avoidance (Aversive) Dilemmas 403

Cognitive Transformations to Deal with Stress 404

In Focus 17.1 Cooling Unwanted Emotions: Cognitive Reappraisal is Better Than Denying Negative Feelings 405

Interaction Among Levels: Hot and Cool Systems in Self-Regulation 405
The Emotional (Hot) Brain/The Rational (Cool) Brain 406

Bodily Changes: Emotion in Stress 406

Fight or Flight Reactions 406

The Hot Amygdala 407

The Rational Cool Brain 408

Biosocial Model of Self-Regulation: Hot System/Cool System Interaction 408

Attention Control 408

In Focus 17.2 Neural Mechanisms in Impulsive Violence 409

Social Emotions Enable Self-Regulation: Links to Evolution 410

Self-Regulatory Competence 410

A Stable Person Variable 410

Long-Term Stability of Self-Regulatory Competence 410

Long-Term Protective Effects 411

The Down-Side of Self-Regulation 412

Conclusions 413

Potential for Self-Directed Change 413

In Focus 17.3 Gary W's Self-Regulatory System 414

Summary 415

Key Terms 416

CHAPTER 18

PERSONALITY IN ITS CONTEXT AND CULTURE 417

Personality System in Action 417

Personality Dispositions and Dynamics 418

Sources of System Activation 419

Expressions of the System—and Their Consequences 419

Interacting Influences of Biology and Culture 420

Interacting Influences on Personality Development 420

Biology-Trait-Socialization Interactions: Shyness 421

Gender and Sex Differences 422

Overview and Issues 422

Neonatal Sex Differences 422

Gender Concepts 423

Expression of Gender-Relevant Behavior 423

Interactions of Biology, Sex, and Culture in Response to Threat 423

In Focus 18.1 Adult Sex Differences and Their Implications 424

Men Fight or Flee: Women Tend and Befriend 425

Interactions in the Genesis of Gender Roles 426

Culture and Personality 427

The Link Between the Cultural and the Personal
Meaning Systems 427

Culturally Specific Personality Dispositions 428

Cross-Cultural and Intracultural Differences 429

Individualism versus Collectivism 429

Summary: Interacting Influences of Biology—Culture on Personality 429

What Develops? The Evolving Self 430

Taking Charge: Human Agency 430

The Self-Construction Process 430
