Achieving Software Quality through Teamwork

Isabel Evans
### Contents

Forward xv  
Preface xvii  
Acknowledgments xxiii

**Software Quality Matters** 1  
1.1 Defining software quality 1  
1.2 Fundamental concepts of excellence 5  
1.3 EFQM Excellence Model 7  
  1.3.1 Enablers 7  
  1.3.2 Results 9  
  1.3.3 Excellence, the EFQM Excellence Model, the Malcolm Baldrige model, and other related models 10  
1.5 IT maturity models—CMM® and relations 11  
1.6 Team Software Process and Personal Software Process 12  
1.7 Bringing the models together 13  
References 15  
Selected bibliography 16

**Defining the Software Team** 17  
2.1 Teams in disunity 17  
2.2 Defining the team 19  
  2.2.1 People who are customers and users of software 20  
  2.2.2 People who manage software projects 20  
  2.2.3 People who build software 21  
  2.2.4 People who measure software quality 21  
  2.2.5 People who provide the support and infrastructure for the project and the deployment of software 22
# Contents

## Roles and Quality: Builders

5.1 Introducing the builders ........................................... 77
5.2 Who could be in this group? ...................................... 79
5.3 Quality viewpoint .................................................. 80
5.4 Quality framework using the EFQM Excellence Model ......... 86
  5.4.1 The EFQM Excellence Model and the builders ............... 86
  5.4.2 EFQM Excellence Model enablers for builders ............... 87
  5.4.3 EFQM Excellence Model results for the builders .......... 92
5.5 Communication between the builders and other groups ....... 95
5.6 Summary of the group ............................................ 96
References .......................................................... 97
Selected bibliography ............................................... 98

## Roles and Quality: Measurers

6.1 Introducing the measurers ....................................... 101
  6.1.1 Why do we need QA and QC? .................................. 101
  6.1.2 Just measurers or also improvers of quality? ............... 102
  6.1.3 Defect prevention ........................................... 103
  6.1.4 The Hawthorne effect ...................................... 105
6.2 Who could be in this group? ................................... 106
6.3 Quality viewpoint ............................................... 106
6.4 Quality framework using the EFQM Excellence Model ...... 113
  6.4.1 The EFQM Excellence Model and the measurers .......... 113
  6.4.2 EFQM Excellence Model enablers for the measurers .... 114
  6.4.3 EFQM Excellence Model results for the measurers ..... 123
6.5 Communication between the measurers and other groups .... 125
6.6 Summary of the group ......................................... 128
References .......................................................... 129
Selected bibliography ............................................... 129

## Roles and Quality: Supporters

7.1 Introducing the supporters .................................... 131
7.2 Who could be in this group? ................................... 133
7.3 Quality viewpoint ............................................... 134
7.4 Quality framework using the EFQM Excellence Model ..... 136
  7.4.1 The EFQM Excellence Model and the supporter ........... 136
  7.4.2 Enablers for the supporter .................................. 138
  7.4.3 Results for the supporter .................................. 143
7.5 Communication between supporters and other groups ...... 146
7.6 Summary of the group ......................................... 147
Contents

10.4 SDLC—typical activities 190
  10.4.1 Planning and monitoring 190
  10.4.2 Managing change 191
  10.4.3 Requirements 192
  10.4.4 Design 193
  10.4.5 Build 193
  10.4.6 Testing 194

10.5 Entry and exit points within the SDLC 195

10.6 SDLC models 195
  10.6.1 Waterfall model (big bang or phased) 196
  10.6.2 Spiral, incremental, and iterative models 199
  10.6.3 Evolutionary model 203
  10.6.4 V-model 203
  10.6.5 Advantages and disadvantages of the models 204

10.7 Quality views and the models—why we might wish to combine models 204

10.8 Exit from the SDLC 208
  10.8.1 Exit criteria following a detailed acceptance test 208
  10.8.2 When no exit criteria have been defined 209
  10.8.3 When exit criteria have not been met 210
  10.8.4 Tailoring exit criteria 210
  10.8.5 When no acceptance criteria have been set 210

10.9 Conclusion 211

References 212

Selected bibliography 213

[Q Delivery and Support When Going Live . . . 215

11.1 Delivery—description 215
  11.1.1 Delivery considerations 215
  11.1.2 Identifying the delivery 217

11.2 Delivery viewpoints 218

11.3 Entry criteria for delivery 221

11.4 Delivery—typical activities 221
  11.4.1 Person buys PC and software for self-installation 223
  11.4.2 Single-site delivery of software 224
  11.4.3 Multisite rollout of new software to existing infrastructure 224
  11.4.4 Data migration project software and hardware changes 225

11.5 Exit from delivery 226

11.6 Conclusion 226

References 227

Selected bibliography 227
The Life of a System Postdelivery

12.1 Postdelivery—description
   12.1.1 Postdelivery for different types of software acquisitions

12.2 Delivery viewpoints

12.3 Entry criteria for postdelivery

12.4 Postdelivery—typical activities
   12.4.1 Use of the system
   12.4.2 IT infrastructure and service management activities
   12.4.3 Making changes to an existing system
   12.4.4 Monitoring and evaluation

12.5 Exit from postdelivery

12.6 Conclusion

Selected bibliography

Techniques and Methods

A. 1 Communication, team dynamics, and meeting behavior
   A.1.1 Belbin Team Roles
   A.1.2 De Bono’s Six Thinking Hats

A.2 Communication styles
   A.2.1 Myers-Briggs Type Indicators
   A.2.2 Honey and Mumford Learning Styles
   A.2.3 Kirton adaptors and innovators
   A.2.4 Motivation studies
   A.2.5 Transactional analysis

A. 3 Techniques to identify and classify problems and assess ideas for solutions
   A.3.1 Cause-effect, root cause, and solution analysis
   A.3.2 Prototyping and ideas modeling
   A.3.3 Assessing whether an idea is worth pursuing

A.4 Understanding aims and objectives

A.5 Review techniques

A.6 Improving graphics in reporting

A.7 Useful sources and groups
