## Contents

| LIST OF CONTRIBUTORS | ix |
| PREFACE             | vii |

### Chapter 1  Fundamentals of Epitaxial Growth and Atomic Layer Epitaxy

*H. Watanabe, T. Mizutani, and A. Usui*

| I. Introduction | 1 |
| II. Kinetic and Thermodynamic Comparison of LPE, VPE, MOCVD and MBE | 4 |
| III. Fundamental Growth Parameters in MBE | 23 |
| IV. Atomic Layer Epitaxy of GaAs | 32 |
| References | 50 |

### Chapter 2  Characteristics of Two-Dimensional Electron Gas in III–V Compound Heterostructures Grown by MBE

*S. Hiyamizu*

| I. Introduction | 53 |
| II. Modulation Doping in GaAs/AlGaAs Superlattices | 55 |
| III. Selectively Doped GaAs/n-AlGaAs Heterostructures | 58 |
| IV. Improved Selectively Doped Heterostructures | 82 |
| V. Summary | 100 |
| References | 101 |

### Chapter 3  Metalorganic Vapor Phase Epitaxy for High-Quality Active Layers

*T. Nakanisi*

| I. Introduction | 105 |
| II. Growth and Characterization of High-Quality GaAs and GaAlAs | 106 |
| III. Fabrication of Device Structures | 134 |
| IV. Summary and Future Problems | 150 |
| References | 152 |
Chapter 4  High Electron Mobility Transistor and LSI Applications

*T. Mimura*

I. Introduction .............................................. 157
II. HEMT Structures and Fabrication Process ................. 158
III. Electrical Characteristics .................................. 160
IV. LSI Technology .......................................... 173
V. Summary ..................................................... 183
   Appendix A .............................................. 184
   Appendix B .............................................. 186
   Appendix C .............................................. 187
   Appendix D .............................................. 192
   References .............................................. 192

Chapter 5  Hetero-Bipolar Transistor and Its LSI Application

*T. Sugeta and T. Ishibashi*

I. Introduction .............................................. 195
II. Basic Device Characteristics .............................. 197
III. Fabrication of AlGaAs/GaAs HBTs ....................... 208
IV. High-Frequency Characteristics .......................... 216
V. High-Speed Integrated Circuits ........................... 221
VI. Conclusions ............................................. 226
    References ............................................. 227

Chapter 6  Optoelectronic Integrated Circuits

*H. Matsueda, T. Tanaka, and M. Nakamura*

I. Introduction .............................................. 231
II. Design Considerations .................................... 234
III. Fabrication Processes ................................... 264
IV. High-Speed Transmitter and Receiver .................... 269
V. Conclusions ............................................. 281
    References ............................................. 282

INDEX .......................................................... 285
CONTENTS OF PREVIOUS VOLUMES .............................. 291
