CONTENTS

Light Scattering Theory : a Progress Report .......................... 1
M. Kerker

Mie Scattering Near the Critical Angle ............................. 17
N. Fiedler-Ferrari and H.M. Nussenzveig

Scattering of a Gaussian Beam by a Sphere Using
a Bromwich Formulation : Case of an Arbitrary
Location .................................................. 27
G. Gouesbet, B. Maheu, and G. Gréhan

Effects of Particle Nonsphericity on Light-Scattering ............ 43
P.W. Barber and S.C. Hill

Particle Sizing by Inversion of Extinction Data .................. 55
M. Bertero, C. de Mol, and E.R. Pike

Small Angle Light Scattering Patterns from Micrometer-Sized
Spheroids .............................................. 63
J.C. Ravey

Laser Beam Scattering by Individual Spherical Particles :
Numerical Results and Application to Optical Sizing ............ 63
B. Maheu, G. Gréhan, and G. Gouesbet

Extraction of Polydispersity Information in Photon
Correlation Spectroscopy ........................................ 89
M. Bertero, P. Boccacci, C. de Mol, and E.R. Pike

Particle Size Distributions from Fraunhofer Diffraction ........ 99
M. Bertero, P. Boccacci, C. de Mol, and E.R. Pike

Calculation of Calibration Curves for the Phase Doppler
Technique : Comparison between Mie Theory and
Geometrical Optics ...................................... 107
S.A.M. Al-Chalabi, Y. Hardalupas, A.R. Jones,
and A.M.K.P. Taylor

Particle Sizing of Polydisperse Samples by Mie-Scattering ........ 121
O. Glatter and M. Hofer

Optimal Scaling of the Inverse Fraunhofer Diffraction
Particle Sizing Problem : The linear System
Produced by Quadrature ..................................... 135
E.D. Hirleman
Optimal Filtering Applied to the Inversion of the Laplace Transform .......................... 147
D.A. Ross

Modeling of Multiple Scattering Effects in Fraunhofer Diffraction Particle Size Analysis .................. 159
E.D. Hirleman

LDV-Signals-Analysis for Particle Velocity and Size Detection Using Geometrical Optics .................. 177
T. Börner and L. Zhan

Employment of Light Scattering Information to Lay out Optical Measuring Systems for Measurements of Particle Properties .................. 193
F. Durst

Measurements of Particle Asymmetry Using Cross-Correlation Techniques .................. 217
J.G. Rarity

Lambda Depression/Overlay Histogram Analysis of Poly (Acrylate) as a Function of Added Salt ............ 229
K.S. Schmitz and J-W. Yu

Measurement of Small Polydispersities by Photon Correlation Spectroscopy .................. 241
P.N. Pusey and W. Van Megen

Optical Extinction Spectra of Systems of Small Metal Particles with Aggregates .................. 249
M. Quinten and U. Kreibig

Particle Sizing of Soot in Flat Premixed Hydrocarbon Oxygen Flames by Light Scattering ............ 259

An Instrument to Measure the Size, Velocity and Concentration of Particles in a Flow .................. 271
C.F. Hess and F. Li

The Phase Doppler Method: Analysis and Application .................. 283
W.D. Bachalo

Fraunhofer Diffraction by Random Irregular Particles .................. 301
A.R. Jones

Application of the Shifrin Inversion to the Malvern Particle Sizer .................. 311
L.P. Bayvel, J.C. Knight, and G.N. Robertson

Measurement of Size Distribution in Dense Particle Fields .................. 321
A.A. Hamidi and J. Swithenbank

Particle Sizing by Laser Light Diffraction: Improvements in Optics and Algorithms .................. 335
D. Kouzelis, S.M. Candel, E. Esposito, and S. Zikikout
Shape, Concentration and Anomalous Diffraction Effects in Sizing Solids in Liquids ........................................... 351
D.J. Brown, E.J. Weatherby, and K. Alexander

Scattered Light Particle Size Counting Analysis: Influence of Shape and Structure ................................. 363
M. Bottlinger and H. Umhauer

Visible Infra-Red Double Extinction Measurements in Densely Laden Media, New Progress ....................... 371

Observations of Elastic Angular Scattering from Oriented Single Cylinders .................................................. 385
J.D. Eversole, H.B. Lin, and A.J. Campillo

Effect of Particle Shape on the Response of Single Particle Optical Counters ............................................. 393
J. Gebhart and A. Anselm

Forward Scattering Signature of a Spherical Particle Crossing a Laser Beam out of the Beam Waist ................ 411
J.P. Chevaillier, J. Fabre, P. Hamelin, and J.L. Lesne

Effects of Shape and Orientation to be Considered for Optical Particle Sizing ....................................... 419
R.T. Killinger and R.H. Zerull

Application of Top-Hat Laser Beam to Particle Sizing in LDV System ......................................................... 431
M. Maeda and K. Hishida

Size and Velocity Measurements of Spherical Particles in Multiphase Flows and the Prediction of Absolute Particle Concentrations ......................................................... 443
K. Bauckhage, H-H. Flögel, and F. Schöne

An LDA Gating Technique for Bubble Measurement in Dilute Three-Phase Suspension Flows ..................... 455
S.L. Lee, Y.Z. Cheng, and Z.H. Yang

Light Scattering by Dust Particles: Experimental Results ........................................................................ 465
P. Bliek and P. Lamy

Optical Particle Sizing: Digital Video Image Processing Application ......................................................... 471
G. Lavergne, Y. Biscos, F. Bismes, and P. Hebrard

The Direct Comparison of Three 'In-Flight' Droplet Sizing Techniques for Pesticide Spray Research ............ 483
B.W. Young and W.D. Bachalo

An application of an Optical Particle Sizing Method to the Study of the Evaporation of Droplets Diffusing in a Turbulent Flow .......................................................... 499
H. Burnage and S.J. Yoon
Optical Measurement of Droplet Evaporation Rates
J. Timmler and P. Roth

Study of Condensational Growth of Water Droplets by
Optical Mie Scattering Spectroscopy
K.H. Fung and I.N. Tang

Optical Sizing of Cometary Dust: Tentative Lessons
from Comet Halley Data
J.F. Crifo

Measurements of Absolute Concentration and Size
Distribution of Particles by Laser Small
Angle Scattering
S. Hayashi

Some Aspects of Utilization of Malvern Diffraction
Granulometer
D. Lisiecki, D. Allano, and M. Ledoux

Optical Methods in Submicronic Aerosol Measurement
D. Boulaud and G. Madelaine

The Use of Calibration Techniques for the Development
and Application of Optical Particle Sizing
Instruments
D.J. Hemsley, M.L. Yeoman, C.J. Bates, and O. Hadded

Optical Particle Sizing and Particle Characterization
Based on Polarization Measurements
R.H. Zerull, R.T. Killinger, and R.H. Giese

Optical Calibration of Accurate Particle Sizing
Standards at the U.S. National Bureau of
Standards
T.R. Lettieri

Conclusion and Perspective
A.R. Jones
