INTRODUCTION 3

PART I
Arrhythmia

CHAPTER 1
Cellular Rhythms and Their Singularities 11
  Resetting a Circadian Clock 14
  The First Measured Time Crystal 15
  The Resetting Surface Has a Singularity 17
  Singularities in Other Circadian Clocks 22
  The Pinwheel Experiment: A Vortex of Light 25
  Pinwheel Experiments in Diverse Contexts 26
  Box 1.A: A Two-Dimensional Circadian Clock 27
  A Primitive Theory of Circadian Dynamics 28
  So What? 28

CHAPTER 2
The Heart in Life and Death 30
  An Indispensable Oscillator 30
  The Normal Human Heartbeat 33
  Fibrillation 40

CHAPTER 3
A Clue Involving Time 45
  The Vulnerable Phase 45
  Phase Resetting in Electrical Pacemakers 47
  Even Resetting in a Pacemaker Neuron 47
  Resetting the Heartbeat 52
  The Two Distinct Styles of Phase Resetting Revisited 54
  Box 3.A: Are There Discontinuities in Neural Resetting Curves? 58
  A Hidden Consequence 59
  Painting Time in Rainbow Colors 59
  A Proof of Uncertainty 63
  The Essential Diagnostic 65
  Can Neurobiologists Really Find Phase Singularities? 66

## PART III

### Organizing Centers

#### CHAPTER 8

**Patterns of Timing in Three-Dimensional Space**

- Phase Singularities Again                                      | 189  |
- Rotors in Three Dimensions                                     | 191  |
- Idea 1: Vortex Filaments Weaving through Space                 | 195  |
- Idea 2: Vortex Rings of Chemical Timing                        | 196  |
- Box 8.A: Is the Rotor Active, or Only Passively Driven?       | 199  |
- Do Scroll Rings Really Exist?                                  | 200  |

#### CHAPTER 9

**A Bestiary of Organizing Centers**

- Idea 3: Mutual Linking of Two Scroll Rings                     | 205  |
- Idea 4: Scroll Rings Differ in the Number of Twists Locked into the Ring | 217  |
- Quantum Numbers for Organizing Centers                         | 218  |
- Box 9.B: Computer Simulation of Excitable Media in Three Dimensions | 223  |
- Box 9.C: Why Should We Use Continuous Models?                  | 229  |
- A Four-Dimensional Symmetry                                    | 233  |
- Transmutation                                                    | 236  |
- Vortex Atoms and Cosmic Strings                                | 238  |
- Box 9.D: Vortex Rings in Air and Water                         | 239  |
- Summary of Part III                                            | 241  |

## PART IV

### Postlude

#### CHAPTER 10

**What's Next?**

- The Geometric Outlook                                          | 244  |
- Discoveries to Come                                             | 245  |
- Singularities of Purely Spatial Patterns                        | 251  |
- Box 10.A: A Coat of Many Colors                                 | 252  |
