Contents

Preface ................................................................. iii

Chapter 1 The Contribution of Flavor Chemistry to the Food Industry
—D. Richard Ensor ................................................. 1

Chapter 2 Development of Methodology for Flavor Chemistry Past,
Present and Future
—Roy Teranishi .................................................. 13

Chapter 3 Isolation of Food Flavors—Gary A. Reineccius ................. 26

Chapter 4 Gas Chromatography and Gas Chromatography-Mass
Spectrometry of Odor/Flavor Components in Lipid Foods
—Edward G. Perkins ............................................. 35

Chapter 5 Singlet Oxygen Oxidation of Vegetable Oils
—David B. Min, S.H. Lee and E.C. Lee ......................... 57

Chapter 6 How the Lipoxygenase Pathway Affects the Organoleptic
Properties of Fresh Fruit and Vegetables
—Harold W. Gardner ........................................... 98

Chapter 7 Flavor Chemistry of Deep Fat Frying in Oil
—Jan Pokorny .................................................. 113

Chapter 8 Importance of Lipid Derived Volatiles to Vegetable
and Fruit Flavor
—Ron G. Buttery ................................................ 156

Chapter 9 Chemistry of Meat Flavor—Ki Soon Rhee ................... 166

Chapter 10 Flavor Chemistry of Fish Oils—Kenshiro Fujimoto ........ 190

Chapter 11 Flavor Chemistry of Olive Oil
—A.K. Kiritsakis and D.B. Min .................................. 196

Chapter 12 The Flavors of Dairy Products—Earl G. Hammond ........ 222

Chapter 13 Volatile Flavor Compounds Developed During
Hydrogenation of Soybean Oil
—R.R. Allen, C.M. Wu and S.M. Chang ....................... 237
Chapter 14  **Effects of Minor Compounds on the Oxidative Stability of Soybean Oil**  
—D.B. Min and M.Y. Jung .............................................. 242

Chapter 15  **Flavor Chemistry of Phospholipids**  
—Bernard F. Szuhaj and Endre F. Sipos ......................... 265

Chapter 16  **The Flavor Effect that Phospholipids have upon Lipid Food**  
—Alice Nasner ............................................................ 290

Chapter 17  **Natural Antioxidants for the Stabilization of Foods**  
—Jürg Löliger ............................................................. 302

Chapter 18  **Recovery of Flavor Compounds During the Processing of Foods**  
—Stanley J. Kazeniac ................................................... 326

Chapter 19  **Plant Tissue Culture Systems for Flavor Production**  
—Y.C. Hong and S.K. Harlander ...................................... 348

Chapter 20  **Generation of Flavor Components by Microbial Fermentation and Enzyme Technology**  
—Helmut Grueb and J.L. Gatfield ................................. 367

Chapter 21  **Flavor Perception and Binding to Food Components**  
—J.E. Kinsella .............................................................. 376

Chapter 22  **Interaction of Flavor Compounds with Protein**  
—Heasook Kim and David B. Min .................................. 404

Chapter 23  **Correlation of Instrumental and Sensory Analyses of Lipid Foods**  
—Glen A. Jacobson, Denise M. Horsley and J.A. Ford ........ 421

Chapter 24  **Applying Multivariate Statistical Methods to Enhance Information Obtainable from Flavor Analysis Results**  
—John J. Powers ......................................................... 434
