CONTENTS

Preface ix

Note to the Instructor xiii

Chapter 1
A Survey of Superconductivity 1
1.1 Introduction 1
1.2 Basic Properties of Superconductors 2
1.3 Models of Superconductivity 7
1.4 Simple Superconducting Systems 9
References 14

Chapter 2
Perfect Conductivity 17
2.1 Introduction 17
2.2 Circuits and Time Constants 18
2.3 Field Theory and Time Constants 26
2.4 Magnetoquasistatics 41
2.5 The First London Equation 53
2.6 Fields Inside a Perfect Conductor 61
2.7 Summary 68
References 69
Problems 70

Chapter 3
The Classical Model 77
3.1 Introduction 77
3.2 The Second London Equation 78
3.3 Superconducting Lumped Circuits 87
3.4 The Two-Fluid Model 94
3.5 Electromagnetic Power 105
## Chapter 7
### Vortex Interactions and Dynamics  329

7.1 Introduction  329  
7.2 Vortex Interactions  330  
7.3 The Vortex Lattice  344  
7.4 Transport Currents and Flux Flow  353  
7.5 Pinning and the Critical State  368  
7.6 Summary  384  
    References  385  
    Problems  386

## Chapter 8
### Basic Josephson Junctions  393

8.1 Introduction  393  
8.2 Josephson Tunneling  398  
8.3 Basic Lumped Junctions  405  
8.4 Superconducting Quantum Interference  410  
8.5 Short Josephson Junctions  420  
8.6 Long Josephson Junctions  431  
8.7 Summary  438  
    References  440  
    Problems  441

## Chapter 9
### Generalized Junctions and Devices  449

9.1 Introduction  449  
9.2 Junction Resistance and Capacitance  450  
9.3 Response to DC Driving Sources  458  
9.4 Response to AC Driving Sources  466  
9.5 The DC SQUID  471  
9.6 Time Constants for Digital Circuits  474  
9.7 Summary  483  
    References  485  
    Problems  486

## Chapter 10
### Beyond the Macroscopic Quantum Model  489

10.1 Introduction  489  
10.2 The Ginzburg-Landau Theory  490
Contents

10.3 The Ginzburg-Landau Equations 500
10.4 Microscopic Interactions 514
10.5 Characteristic Lengths 528
10.6 Summary 545
   References 547
   Problems 548

Appendix A
Vector Identities 557

Appendix B
Differential Operations in Various Coordinates 559

Appendix C
Modified Bessel Functions 563

Appendix D
Index Notation 567

Appendix E
Fourier Transforms 571

Appendix F
Properties of Typical Superconductors 575

Index 579

Front Endpaper
Basic Relations

Rear Endpaper
Physical Constants
