Preface xiii

Introduction
David G. Gorenstein

Text 1
References 3

PART 1. Phosphorus-31 Chemical Shifts and Spin–Spin Coupling Constants: Principles and Empirical Observations

1. Phosphorus-31 Chemical Shifts: Principles and Empirical Observations
David G. Gorenstein

I. Introduction and Basic Principles 7
II. Applications of $^{31}P$ Chemical-Shift Theory and Empirical Observations 9
References 33

2. Phosphorus-31 Spin–Spin Coupling Constants: Principles and Applications
David G. Gorenstein

I. Introduction 37
II. Directly Bonded Coupling Constants: $^{1}J_{PX}$ 38
III. Two-Bond Coupling Constants: $^{2}J_{PX}$ 42
IV. Three-Bond Coupling Constants: $^{3}J_{PX}$ 43
References 51
PART 2. Theory and Applications of Phosphorus-31 NMR to Biochemistry

3. Phosphorus-31 NMR of Enzyme Complexes
   B. D. Nageswara Rao
   I. Introduction 57
   II. Theoretical and Experimental Considerations 59
   III. Experimental Studies of Specific Enzyme Systems 69
   IV. Computer Calculation of NMR Line Shapes under the Influence of Exchange 96
   V. Conclusion 100
   References 102

4. $^{31}$P-NMR Studies of Phosphoproteins
   Hans J. Vogel
   I. Introduction 105
   II. Classification of Phosphoproteins 106
   III. Theoretical and Experimental Considerations 113
   IV. NMR Studies 123
   V. Conclusions 144
   References 149

5. Paramagnetic Probes of Enzyme Complexes with Phosphorus-Containing Compounds
   Joseph J. Villafranca
   I. Introduction 155
   II. General Considerations 156
   III. Properties of Cr(III)– and Co(III)–Nucleotide Complexes 157
   IV. Studies with Co(III)–Nucleotide Complexes 160
   V. Studies with Cr(III)–Nucleotide Complexes 166
   VI. Studies with Cr(III)– and Co(III)–Pyrophosphate Complexes 169
   References 173

6. Use of Chiral Thiophosphates and the Stereochemistry of Enzymatic Phosphoryl Transfer
   Ming-Daw Tsai
   I. Stereochemical Problems Studied with Phosphorothioates 175
   II. $^{18}$O Isotope Shifts in $^{31}$P NMR 178
   III. $^{17}$O Quadrupolar Effects in $^{31}$P NMR 181
   IV. Prochiral Centers: $^{31}$P NMR 185
   V. Pro-Prochiral Centers: $^{31}$P($^{18}$O) NMR or $^{31}$P($^{17}$O) NMR 187
   VI. Pro-Pro-Prochiral Centers: $^{31}$P($^{18}$O) NMR and $^{31}$P($^{17}$O) NMR 190
   References 196
7. Use of Chiral $[^{16}O,^{17}O,^{18}O]$Phosphate Esters to Determine the Stereochemical Course of Enzymatic Phosphoryl Transfer Reactions

John A. Gerlt

I. Introduction 199
II. Syntheses of Oxygen Chiral Phosphate Esters 201
III. Configurational Analyses of Oxygen Chiral Phosphate Esters 210
IV. Selected Examples 220
V. Summary 230
References 230

8. DNA and RNA Conformations

Chi-Wan Chen and Jack S. Cohen

I. Introduction 233
II. Helix-Coil Transitions 234
III. Sequence Dependence of Double-Stranded DNA Conformations 239
IV. Conformational Transitions of Double-Stranded DNA 253
V. Dynamic Behavior of RNA and DNA 255
VI. Nucleosomal DNA 256
VII. Biological and Genetic Significance 259
References 260

9. High-Resolution $^{31}$P-NMR Spectroscopy of Transfer Ribonucleic Acids

David G. Gorenstein

I. Introduction 265
II. Spectral Comparison of Different Acceptor tRNAs 268
III. Mg$^{2+}$ Dependence of $^{31}$P Spectra of tRNA$^{\text{phe}}$ 276
IV. Mn$^{2+}$ Effects on $^{31}$P Spectra of tRNA$^{\text{phe}}$ 280
V. Assignment of $^{31}$P Signals 281
VI. Conformational Transitions 287
VII. Spermine Effects 291
VIII. $^{31}$P NMR of Yeast tRNA$^{\text{phe}}$ · E. coli tRNA$^{\text{Glu}}$ Complex: Spectral Changes 292
IX. Conclusions 294
References 295

10. Phosphorus-31 NMR of Drug–Nucleic Acid Complexes

David G. Gorenstein and Evelyn M. Goldfield

I. Introduction 299
II. Drug–Double-Helical Nucleic Acid Complexes: Intercalation 300
III. Electrostatic Mode of Interaction 310
IV. tRNA-Ethidium $^{31}$P Spectra 311
References 315
11. Phosphorus Relaxation Methods: Conformation and Dynamics of Nucleic Acids and Phosphoproteins
   Phillip A. Hart
   I. Introduction 317
   II. General Considerations 319
   III. The Phosphorus-Proton Nuclear Overhauser Effect 322
   IV. Phosphorus Relaxation Times 328
   V. Summary 344
   References 345

12. Relaxation Behavior of Nucleic Acids: Dynamics and Structure
   Thomas L. James
   I. Introduction 349
   II. Theory 350
   III. Structure and Possible Molecular Motions in Nucleic Acids 368
   IV. Considerations for Nucleic Acid Dynamics and Structure 373
   V. Relaxation Studies of Nucleic Acids 377
   References 398

   Heisaburo Shindo
   I. Introduction 401
   II. Basic Concepts of Solid-State 31P NMR 402
   III. Studies of Oriented DNA Fibers 408
   IV. Studies of DNA Complexes 418
   V. Concluding Remarks 421
   References 421

14. Phosphorus-31 NMR of Phospholipids in Micelles
   Edward A. Dennis and Andreas Plückthun
   I. Introduction and Perspective 423
   II. Spectral Characteristics of Phospholipids in Mixed Micelles with Detergents 425
   III. T1, Nuclear Overhauser Effect, and Quantitative Analysis 431
   IV. Solubilization of Phospholipids by Detergents 433
   V. Critical Micelle Concentration Determinations and Micellization of Monomeric Phospholipids by Detergents 435
   VI. Lysophospholipids: Acyl and Phosphoryl Migration 438
   VII. Phospholipases: Specificity and Kinetics 442
   References 444
15. Phosphorus-31 NMR of Phospholipids in Membranes
Ian C. P. Smith and Irena H. Ekiel

I. Properties of Membranes 447
II. $^{31}$P-NMR Spectra of Ordered Systems 449
III. Obtaining $^{31}$P-NMR Spectra 457
IV. Applications to Biomembranes 461
V. Conclusion 472
References 472

PART 3. Application to Biology and Medicine: Future Directions

16. Two-Dimensional Phosphorus-31 NMR
William C. Hutton

I. Introduction 479
II. General Principles of Two-Dimensional NMR: The Homonuclear, $J$-Correlated Experiment 484
III. Applications of Two-Dimensional Spectroscopy to $^{31}$P NMR 492
IV. Concluding Remarks 509
References 510

17. Identification of Diseased States by Phosphorus-31 NMR
Michael Bárány and Thomas Glonek

I. Introduction 512
II. Skeletal Muscle 513
III. Heart 530
IV. Kidney 533
V. Brain 534
VI. Eye 537
VII. Mammalian Fluids 540
VIII. Perspectives 543
References 544

PART 4. Selected Data

18. Appendixes: Selected Compilation of $^{31}$P-NMR Data
David G. Gorenstein and Dinesh O. Shah

Appendix I. Doubly Connected Phosphorus (P${\subset}$) 550
Appendix II. Triply Connected Phosphorus (P${\subseteq}$) 551
Appendix III. Quadruply Connected Phosphorus (P${\subseteq}$) 563
Appendix IV. Quintuply Connected Phosphorus (>$P<$) 586
Appendix V. Sextuply Connected Phosphorus ($\geq P \leq$) 588
References 589
Index 593
