Foreword v
Ken Thompson

Preface vii

Highlights from the 1989 World Computer Chess Championship—following Chapter 3

Part I. Man and Machine 1
1. A Short History of Computer Chess 3
   T.A. Marsland
2. Advances in Man-Machine Play 9
   D. Kopec
3. 1989 World Computer Chess Championship 33
   J. Schaeffer
4. How Will Chess Programs Beat Kasparov? 47
   D.N.L. Levy

Part II. Chess Programs 53
5. Deep Thought 55
   F-h. Hsu, T.S. Anantharaman, M.S. Campbell and A. Nowatzyk
6. Hitech 79
   H.J. Berliner and C. Ebeling
7. Cray Blitz 111
   R.M. Hyatt, A.E. Gower and H.L. Nelson

Part III. Computer Chess Methods 131
8. Tree Searching Algorithms 133
   H. Kaindl
9. Experiments with the Null-Move Heuristic
   G. Goetsch and M.S. Campbell

10. Problematic Positions and Speculative Play
    P. Jansen

11. Verifying and Codifying Strategies in a Chess Endgame
    I.S. Herschberg, H.J. van den Herik and P.N.A. Schoo

12. Learning in Bebe
    T. Scherzer, L. Scherzer and D. Tjaden

13. The Bratko-Kopec Test Revisited
    T.A. Marsland

Part IV. Computer Chess and AI

14. Chess as the Drosophila of AI
    J. McCarthy

15. Brute Force in Chess and Science
    D. Michie

16. Perspectives on Falling from Grace
    M.V. Donskoy and J. Schaeffer

Part V. A New Drosophila for AI?

17. The Design and Evolution of Go Explorer
    K. Chen, A. Kierulf, M. Müller and J. Nievergelt

18. Knowledge Representation and its Refinement in Go Programs
    K. Shirayanagi
