CONTROL IN POWER ELECTRONICS
AND ELECTRICAL DRIVES

Proceedings of the Second IFAC Symposium,
Düsseldorf, Federal Republic of Germany, 3 - 5 October 1977

Edited by
W. LEONHARD
Technical University of Braunschweig, Federal Republic of Germany

Published for the
INTERNATIONAL FEDERATION OF AUTOMATIC CONTROL

by
PERGAMON PRESS
OXFORD · NEW YORK · TORONTO · SYDNEY · PARIS · FRANKFURT
## CONTENTS

Foreword xiii

### Topic 1: CONTROL SYSTEMS EMPLOYING ELECTRONIC POWER CONVERTERS; CONVERTER CIRCUITS

**CONTROL PROCEDURES**

### 1.1 ANALYSIS AND SIMULATION

Contribution to simulation and control procedures of brushless DC-machines
R. Hanitsch, FRG

1.2 CONVERTER CIRCUITS AND CONVERTER CONTROL

Developments in sinusoidal P.W.M. inverters
M. G. Jayne, S. R. Bowes, B. M. Bird, UK

On the ordinary and modified subharmonic control
A. Balestrino, G. De Maria, L. Sciavicco, Italy

Pulse ratio modulation: An interesting technique to implement DC/DC conversion
A. Balestrino, A. Eisenberg, L. Sciavicco, Italy

Design of an inverter with optimum output voltage waveform
H. C. Tanju, Turkey

Power factor and current harmonics with cycloconverters fed by a three-phase supply
G. Möltgen, Th. Salzwann, FRG

Harmonic analysis of practical cycloconverters using a digital simulation
C. lung, P. Therme, France

Modified cycloconverter with minimum blanking between bridges
C. Arıkan, Turkey

Thyristor high-frequency resonance inverter with commutating-margin angle/time control system by means of phase-locked loop
M. Nakaoka, T. Maruhashi, Japan

Commutation modes of a current-source inverter
W. Lienau, FRG

Applicable frequency range of current source converters
K. Möll, D. Schröder, FRG

Analysis and design of a current-fed inverter
M. K. Parasuram, B. Ramaswami, India

Modifications of commutation circuits for a three-phase inverter, connected with the neutral conductor
D. Pohl, FRG

Optimal design of the commutating circuit of forced-commutated 3-phase inverters with sequential commutation
H. Fischler, FRG

A new approach to the design of asymmetrically loaded three phase sinusoidal inverters
P. Miljanić, D. Srajberr, P. Miljanović, Yugoslavia

A comparative investigation of high power pulsewidth modulated inverter circuits
I. Topa, Romania

Steady-state behaviour of a high-frequency thyristor inverter
E. Miklós, I. Nagy, Hungary

Fast response-load commutated choppers
N. T. Nicholson, S. B. Dewan, C. N. Porreili, Canada

High-current transistor choppers
H. Knoll, FRG

A load insensitive DC/DC converter for supply of telephone exchanges
I. Flegar, Yugoslavia
Contents

Rectifying single-phase and three-phase A.C. with forced-commutated converters
H. Kahlen, FRG 323

Reduction of the harmonic content of the load current of three phase inverters
fed by direct current sources
S. Ditteney, FRG 331

A new approach to power converter circuits
F. Mehta, T. Thomson, W. Un, U.K. 335

Surge suppressor's design by means of nomograms
H. Tuitsa, A. Wójciak, Poland 345

Topic 2. BEHAVIOUR OF INVERTER-FED ELECTRICAL MACHINES AND REQUIREMENTS IMPOSED BY CONVERTER OPERATION

Current status of power thyristors and rectifiers
E. Spenke, P. Voss, FRG 355

Dynamic performance of converter-fed synchronous motors
F. Harashima, H. Mutcho, Japan 369

Optimal control of voltage source inverters supplying induction motors
S. Halász, Hungary 379

Experimental and theoretical investigations concerning the design of induction machines, especially machines with high power density with respect to the inverter supply and speed regulation
Ph. K. Sattler, G. Balslemke, FRG 387

A comparison between operating conditions of inverter-fed asynchronous motors
E. Pagano, A. Perfetto, Italy 399

A dimensioning criterion for the shafting of the variable frequency fed induction motor
I. Marongiu, Italy 405

Approximate formulae for the characteristic values of electrical machines
M. Poliestro, V. Torriano, Italy 409

The influence of thyristor control on traction motors
H. Bausberger, FRG 415

Open loop control of a linear vernier reluctance motor in a stepping mode
J. W. Finoch, U.K. 421

Topic 3. CONVERTER-FED AC- AND DC- DRIVES

Inversion of the rotating direction of a current-fed closed-loop controlled asynchronous machine
B. Tramoy, B. de Rormel, M. Grandpierre, France 433

The operational modes of a current source inverter induction motor drive system
J. Ladsdr, Hungary 443

On the utility of signal flow graphs in the analysis of current controlled induction motor
V. Subrahmanyam, D. Subbarayudu, M. V. C. Rao, India 455

Stationary and dynamic behaviour of a speed controlled synchronous motor with cos 6- or commutation limit line control
J. Leinmüber, Switzerland 463

Transient characteristics and limits of a squirrel-cage motor fed from a frequency-converter with D.C. current link
L. Abraham, FRG 475
