Die Deutsche Nationalbibliothek verzeichnet diese Publikation in der Deutschen Nationalbibliografie; detaillierte bibliografische Angaben sind im Internet über <http://dnb.d-nb.de> abrufbar.

Diese Arbeit hat der Fakultät für Elektrotechnik und Informationstechnik der Technischen Universität Ilmenau als Dissertation vorgelegen.

Tag der Einreichung: 05. Juli 2016
1. Gutachter/-in: Univ.-Prof. Dr.-Ing. Frank Berger
(Technische Universität Ilmenau)
2. Gutachter/-in: Univ.-Prof. Dr.-Ing. Peter Schegner
(Technische Universität Dresden)
3. Gutachter/-in: Dr.-Ing. Michael Anheuser
(Siemens AG, Amberg)
Tag der Verteidigung: 15. Dezember 2017

Contents

Introduction	1
1 Arc faults and protection schemes for residential installations	5
1.1 Series and parallel arc faults in an electrical circuit	5
1.1.1 The series arc fault.....	5
1.1.2 The parallel arc fault.....	6
1.2 Thermal stress due to arc faults	7
1.3 Series arc fault detection technology.....	9
1.4 Installation standards.....	12
1.5 Test standard IEC 62606.....	12
1.5.1 Series arc tests	13
1.5.2 Parallel arc tests.....	15
1.5.3 Masking and unwanted tripping tests.....	16
1.6 Conclusion	16
2 Electrical fires in residential installations	17
2.1 Occurrence of electrical fires.....	17
2.2 Severity of electrical fires	18
2.3 Location of electrical fires	20
2.4 Contribution of arc faults to electrical fires	21
2.5 Conclusion on electrical fire statistics.....	24
3 Arc faults and relationships with other electrical faults	26
3.1 The different types of arcs in terms of physical characteristics	26
3.1.1 Non-contact arcing.....	27
3.1.2 Contact arcing.....	30
3.2 Series arc faults in PVC installation cables.....	31

3.3	Relationship between glowing and series arcing	36
3.3.1	The glowing connection	36
3.3.2	Transition from glowing to arcing and fire ignition	39
3.3.3	Conclusions on the glowing phenomenon	41
3.4	Relationship between the types of arcing and other electrical faults.....	43
3.5	Electrical faults and current dependency.....	45
3.6	Conclusions regarding arc faults and other electrical faults.....	46
4	Basics of arc physics and electrical arc characteristics	47
4.1	Basics of arc physics	47
4.1.1	Energy balance	48
4.1.2	Thermal equilibrium.....	49
4.1.3	Electrical conductivity.....	50
4.1.4	Specific heat capacity and thermal conductivity.....	53
4.1.5	Radiation	56
4.1.6	Energy density.....	58
4.2	The stationary arc.....	60
4.2.1	The different regions of the arc.....	60
4.2.2	The voltage-current characteristic of the arc.....	61
4.2.3	The arc in the electrical circuit.....	63
5	Basics of combustion and considerations on the flammability of electrical cables	65
5.1	Polymers used in low-voltage equipment.....	66
5.2	Decomposition process and residues.....	68
5.3	Combustion reactions	69
5.4	Ignition and burning.....	70
5.5	Steady and unsteady burning.....	71

5.6	Flame power	72
5.7	Requirements and standard tests for electrical wiring	75
5.7.1	Testing the flame resistance of electrical polymers	75
5.7.2	Requirements for the flame resistance of cables and other insulation parts.....	76
5.8	Criteria for estimating the hazards of electrical faults	76
6	Thermal stresses from electrical faults	78
6.1	Series faults	79
6.1.1	Series arc fault	79
6.1.2	Glowing fault.....	96
6.2	Overload2.....	100
6.3	Short-circuit	105
6.3.1	Bolted short-circuit.....	105
6.3.2	Parallel arc fault.....	109
6.4	Earth leakage	113
6.5	Summary of thermal stresses.....	118
6.6	Statistical analysis and evaluation of the safety increase with AFDD	120
7	Investigations on insulation polymers.....	124
7.1	Series arcing at 230 V AC	125
7.1.1	Test setup.....	125
7.1.2	Experimental results.....	125
7.2	Series arcing at 230 V DC.....	127
7.2.1	Test setup.....	127
7.2.2	Experimental results.....	128
7.3	Carbonization at high-voltage.....	131
7.3.1	Test setup.....	131

7.3.2	Experimental results.....	132
7.3.3	Further considerations on the carbonized track	137
7.4	Thermogravimetric analysis.....	142
7.5	Glowing at 230 V AC.....	145
7.6	Conclusions on the relationship between series arcing and insulation polymers...	147
7.7	High-voltage arc-tracking rate.....	149
7.8	Conclusions on the relationship between insulation polymers and thermal stress at electrical faults	150
8	Improvements in the test standard for AFDD and electrical safety.....	151
8.1	Improving and amending test standard IEC 62606.....	151
8.1.1	Series arc tests	151
8.1.2	Parallel arc tests.....	151
8.1.3	Masking and unwanted tripping tests	152
8.1.4	New tests for AFDD with 3 or 4 poles.....	153
8.2	Generation of series arcs for testing	154
8.2.1	Requirements.....	154
8.2.2	Non-contact arcing due to breakdown.....	155
8.2.3	Contact arcing	158
8.2.4	Arcing due to creepage on char.....	159
8.2.5	Alternative methods.....	160
8.2.6	Conclusion on the methods for generating series arcs	161
8.3	Tripping characteristics for series arcing.....	163
8.3.1	Tripping characteristics for AFCI according to UL 1699 [UL13].....	163
8.3.2	Tripping characteristics for AFCI and AFDD 230/240 V AC	164
8.3.3	Electrical simulation and analysis	166
8.4	Other considerations on the test criteria.....	170
