Preface to the English edition (B. Krais) v
Preface to the second French edition (P. Bourdieu, J.-C. Chamboredon, J.-C. Passeron) x

Introduction—Epistemology and methodology
Teaching research 3
Epistemology of the social sciences and epistemology of the natural sciences 6
Methodology and the displacement of vigilance 8
The epistemological order of reasons 11

Part One—The break
1 The social fact is won against the illusion of immediate knowledge 13
1.1 Prenotions and techniques for breaking with them 13
1.2 The illusion of transparency and the principle of non-consciousness 15
1.3 Nature and culture: substance and system of relations 19
1.4 Spontaneous sociology and the powers of language 20
1.5 The temptation to prophesy 24
1.6 Theory and the theoretical tradition 26
1.7 Theory of sociological knowledge and theory of the social system 29

Part Two—Constructing the object
2 The social fact is constructed: the forms of empiricist surrender 33
2.1 "The abdications of empiricism" 35
2.2 Hypotheses or presuppositions 38
2.3 The spurious neutrality of techniques: constructed object or artefact 40
2.4 Analogy and the construction of hypotheses 49
2.5 Model and theory 52

Part Three—Applied rationalism
3 The social fact is won, constructed, and confirmed: the hierarchy of epistemological acts 57
3.1 The implication of operations and the hierarchy of epistemological acts 57
3.2 The system of propositions and systematic verification 63
3.3 Epistemological couples 66

Conclusion—Sociology of knowledge and epistemology
Outline of a sociology of the positivist temptation in sociology 69
The sociologist in society 72
The "scientific city" and epistemological vigilance 74
Illustrative Texts

Remarks on the choice of texts
Foreword—An epistemology of composition
   —Text No. 1: Georges Canguilhem, “Sur une épistémologie concordataire”
   The three degrees of vigilance
   —Text No. 2: Gaston Bachelard, Le rationalisme appliqué

Introduction—Epistemology and methodology
   Epistemology and reconstructed logic
   —Text No. 3: Abraham Kaplan, The Conduct of Inquiry

Part One—The break
1.1 Prenotions and techniques for breaking with them
   Prenotions as an epistemological obstacle
   —Text No. 4: Émile Durkheim, The Rules of Sociological Method
   Provisional definition as a means of escaping from prenotions
   —Text No. 5: Marcel Mauss, “La prière”
   Logical analysis as an aid to epistemological vigilance
   —Text No. 6: John H. Goldthorpe and David Lockwood, “Affluence and the British Class Structure”

1.2 The illusion of transparency and the principle of non-consciousness
   Artificialism as the basis of the illusion of reflexiveness
   —Text No. 7: Émile Durkheim, Education and Sociology
   Methodic ignorance
   —Text No. 8: Émile Durkheim, The Rules of Sociological Method
   The principle of determinism as the negation of the illusion of transparency
   —Text No. 9: Émile Durkheim, “Sociology and the Social Sciences”
   The code and the document
   —Text No. 10: François Simiand, “Méthode historique et science sociale”

1.3 Nature and culture: substance and system of relations
   Nature and history
   —Text No. 11: Karl Marx, The Poverty of Philosophy
   Karl Marx, Grundrisse
   Nature as a psychological invariant and the fallacy of inverting cause and effect
   —Text No. 12: Émile Durkheim, The Rules of Sociological Method
   The sterility of explaining historical specificities by universal tendencies

1.4 Spontaneous sociology and the powers of language
   The nosography of language
   —Text No. 14: Maxime Chastaing, “Wittgenstein et le problème de la connaissance d’autrui”
Metaphorical schemes in biology
—Text No. 15: Georges Canguilhem, *La connaissance de la vie* Georges Canguilhem, "Le tout et la partie dans la pensée biologique"

1.5 The temptation to prophesy
The propheticism of the professor and the intellectual
—Text No. 16: Max Weber, *The Methodology of the Social Sciences* 
—Text No. 17: Bennett M. Berger, "Sociology and the Intellectuals"

1.6 Theory and the theoretical tradition
Architectonic reason and polemical reason
—Text No. 18: Gaston Bachelard, *The Philosophy of No*

Part Two—Constructing the object
The method of political economy
—Text No. 19: Karl Marx: *Grundrisse* Karl Marx: *Economy and Society*

The positivist illusion of presuppositionless science
—Text No. 20: Max Weber, *The Methodology of the Social Sciences* 
“Treat social facts as things”

2.1 “The abdications of empiricism”
The epistemological vector

2.2 Hypotheses or presuppositions
The instrument is a theory in action
The statistician needs to know what he is doing
—Text No. 24: François Simiand, *Statistique et expérience*

2.3 The spurious neutrality of techniques: constructed object or artefact
The interview and the forms of organization of experience
Subjective images and objective frame of reference
—Text No. 26: John H. Goldthorpe and David Lockwood, “Affluence and the British Class Structure”
Categories of native language and construction of scientific facts
—Text No. 28: Bronislaw Malinowski, *Argonauts of the Western Pacific*

2.4 Analogy and construction of hypotheses
The use of ideal types in sociology
—Text No. 30: Max Weber, *Economy and Society* 
Max Weber, *The Methodology of the Social Sciences*
2.5 Model and theory
The summa and the cathedral: deep analogies, the product of a mental habit
  —Text No. 31: Erwin Panofsky, *Gothic Architecture and Scholasticism* 191
The heuristic function of analogy
  —Text No. 32: Pierre Duhem, *The Aim and Structure of Physical Theory* 194
Analogy, theory, and hypothesis
  —Text No. 33: Norman R. Campbell, *Foundations of Science* 196

Part Three—Applied rationalism

3.1 The implication of operations and the hierarchy of epistemological acts
  Theory and experimentation
    —Text No. 34: Georges Canguilhem, *La connaissance de la vie* 201
    Georges Canguilhem, “Leçons sur la méthode” 203
  The favoured objects of empiricism
    —Text No. 35: Charles Wright Mills, *The Sociological Imagination* 207

3.2 The system of propositions and systematic verification
  Theory as a methodological challenge
    —Text No. 36: Louis Hjelmslev, *Language* 211
  Circular arguments
    —Text No. 37: Edgar Wind, “Some Points of Contact between History and Natural Science” 214
  Proof by a system of convergent probabilities
    —Text No. 38: Charles Darwin, *The Origin of Species* 218

3.3 Epistemological couples
  Philosophy as dialogue
    —Text No. 39: Gaston Bachelard, *Le rationalisme appliqué* 221
  Neo-positivism: sensualism coupled with formalism
    —Text No. 40: Georges Canguilhem, “Leçons sur la méthode” 225
  Formalism as intuitionism
    —Text No. 41: Émile Durkheim, “Sociology and Its Scientific Field” 229

Conclusion—Sociology of knowledge and epistemology

Science and its worldly audience
  —Text No. 42: Gaston Bachelard, *La formation de l'esprit scientifique* 233
For a reform of sociological understanding
  —Text No. 43: Marcel Maget, *Guide d'étude directe des comportements culturels* 240
Cross-checks and the transitivity of critiques
  —Text No. 44: Michael Polanyi, *Personal Knowledge: Towards a Post-Critical Philosophy* 245
"Meanwhile, I have come to know all the diseases of sociological understanding"
An interview with Pierre Bourdieu,
by Beate Krais 247
