Contents

Computer Simulation Studies in Condensed-Matter Physics:
An Introduction
By D.P. Landau, K.K. Mon, and H.-B. Schüttler ................. 1

Part I Classical Systems

Application of Finite-Size Scaling to Phase Transitions and Localization-Delocalization Transitions
By Y. Okabe, M. Kikuchi, and K. Niizeki (With 10 Figures) ........ 5

Generically Singular Correlations in a Non-Equilibrium Steady-State System
By R.K.P. Zia, K. Hwang, K.-t. Leung, and B. Schmittmann
(With 2 Figures) ........................................... 18

The Gauge Glass Transition
By J.D. Reger (With 9 Figures) ................................ 31

Sandpile Models: Why We Study Them, What Have We Learned?
By A.B. Chhabra (With 5 Figures) .......................... 44

Part II Quantum Systems

Quantum Monte-Carlo Simulations for Disordered Bose Systems
By N. Trivedi (With 8 Figures) ................................ 61

Dynamics of Two-Dimensional Quantum Spin Systems
By M. Makivic and M. Jarrell (With 8 Figures) .................. 80

Pseudopotential Quantum Monte Carlo for Large-Z Atom Systems
By L. Mitáš (With 1 Figure) .................................. 94

Part III New Environments for Scientific Computing

On the Effectiveness of Cluster Environments for Scientific Computing
By V.S. Sunderam (With 3 Figures) .......................... 109
Part IV  Contributed Papers

Layer-by-Layer Film Growth in the Absence of Surface Diffusion
By Z. Jiang, H.G.E. Hentschel, and C. Ebner (With 2 Figures) ............ 135

From 2 to 3 Dimensions – Crossover in the XY Model
By W. Janke and K. Nather (With 2 Figures) ................................. 140

Multimagnetical Simulations
By U. Hansmann, B.A. Berg, and T. Neuhaus (With 4 Figures) .......... 145

The 2d/3D Classical Heisenberg Ferromagnet
By R.G. Brown and M. Ciftan (With 3 Figures) ............................. 150

Monte-Carlo Simulations in Adiabatic Ensembles
By J.R. Ray and P.J. Fay (With 5 Figures) ................................. 155

Dynamics of Acoustic Phonon Decay: Experiment and Simulation
By X.-J. Wang, W.M. Dennis, and W.M. Yen (With 3 Figures) .......... 162

Roll Pattern Evolution in Molecular Dynamics Studies of Convection
By D.C. Rapaport (With 4 Figures) ................................. 168

Interface Growth with Quenched Randomness
By J.G. Amar and F. Family (With 3 Figures) ............................. 176

Mode-Coupling Theory and Simulations of a Running Sandpile Model
By P.-M. Lam and F. Family (With 4 Figures) ............................. 183

Computer Simulations of Optical Dephasing of Paramagnetic Ions
By R.S. Meltzer and D.P. Landau (With 3 Figures) ........................ 191

Index of Contributors .................................................. 197
