Second Edition

Introduction to Optics

FRANK L. PEDROTTI, S.J.
Marquette University
Milwaukee, Wisconsin
Vatican Radio,
Rome

LENO S. PEDROTTI
Center for Occupational
Research and Development
Waco, Texas
Emeritus Professor of Physics
Air Force Institute of Technology
Dayton, Ohio

Prentice Hall, Englewood Cliffs, New Jersey 07632
Contents

List of Tables xv

Physical Constants xvii

Preface xix

1 Nature of Light 1
   Introduction 1
   A Brief History 2
   Problems 6
   References 7

2 Production and Measurement of Light 8
   Introduction 8
   2-1 Electromagnetic Spectrum 8
   2-2 Radiometry 10
   2-3 Photometry 13
   2-4 Blackbody Radiation 15
   *2-5 Sources of Optical Radiation 17
   *2-6 Detectors of Radiation 23
   Problems 28
   References 29
18  
**Fresnel Diffraction** 366

Introduction 366
18-1 Fresnel-Kirchhoff Diffraction Integral 367
18-2 Criterion for Fresnel Diffraction 369
18-3 The Obliquity Factor 370
18-4 Fresnel Diffraction from Circular Apertures 370
18-5 Phase Shift of the Diffracted Light 374
18-6 The Fresnel Zone Plate 374
18-7 Fresnel Diffraction from Apertures with Rectangular Symmetry 376
18-8 The Cornu Spiral 378
18-9 Applications of the Cornu Spiral 382
18-10 Babinet's Principle 388
Problems 388
References 390

19  
**Theory of Multilayer Films** 391

Introduction 391
19-1 Transfer Matrix 392
19-2 Reflectance at Normal Incidence 396
19-3 Two-Layer Antireflecting Films 398
19-4 Three-Layer Antireflecting Films 401
19-5 High-Reflectance Layers 402
Problems 405
References 406

20  
**Fresnel Equations** 407

Introduction 407
20-1 The Fresnel Equations 407
20-2 External and Internal Reflections 411
20-3 Phase Changes on Reflection 414
20-4 Conservation of Energy 417
*20-5 Complex Refractive Index 420
*20-6 Reflection from Metals 422
Problems 423
References 425
