QUANTITATIVE MICROBEAM ANALYSIS

A NATO Advanced Study Institute.

Edited by

A G Fitzgerald – University of Dundee
B E Storey – University of Dundee
D Fabian – University of Strathclyde

Series Editor

P Osborne – University of Edinburgh

Copublished by
Scottish Universities Summer School in Physics & Institute of Physics Publishing, Bristol and Philadelphia
Contents

Quantification in AES and XPS ........................................ 1
M P Seah

Surface Analytical Imaging ........................................... 43
M Prutton

Electronic Structure and Electron Spectroscopy .................. 95
G Van der Laan

Auger Electron Spectroscopy in the STEM .......................... 121
P Kruit

Electron Energy-Loss Spectroscopy—EELS ......................... 145
R F Egerton

Light Element Microanalysis and Imaging .......................... 169
D B Williams

A Comparison of Quantification Methods and Analytical Techniques ... 179
A G Fitzgerald

Data Analysis and Processing ........................................ 189
P Trebbia

Microscopy and Microanalysis of Insulating Materials ............ 203
J Cazaux

Electron Specimen Interactions ...................................... 213
D C Joy
