## Contents

2.2.2.1 Methods for Determining the Glass Transition Temperature 42

- Expansion measurements 43
- DTA and DSC Measurements 44

2.2.2.2 The Glass Transition Temperature and Thermal Expansion 46

2.2.2.3 The Glass Transition Temperature and Heat Capacity 50

2.2.2.4 The Glass Transition Temperature and the Melting Temperature 51

2.2.2.5 The Glass-Forming Tendency 52

2.2.3 Thermodynamic Functions and the Glass Transition 54

2.2.3.1 The Kauzmann Paradox 55

2.2.3.2 The Prigogine-Defay Condition 57

2.2.3.3 Thermal Properties at Low Temperatures 58

2.3 Phase Transformation Processes and Glass Formation 60

2.3.1 Separation of Phases from Glass Melts 60

2.3.1.1 Nucleation and Crystal Growth 60

- Homogeneous Steady State Nucleation 61
- Time Dependent Nucleation 62
- Heterogeneous Nucleation 63
- The Velocity of Crystallization 64
- Crystallinity as a Function of Time 65

2.3.1.2 Phase Separation Phenomena 65

- Thermodynamics of Phase Separation 66
- Kinetics of Phase Separation 68

2.3.2 The Critical Cooling Rate and the Glass-Forming Tendency 69

2.4 Structure and Chemical Bonding in Glasses and Amorphous Solids 72

2.4.1 Fundamental Methods for Investigating the Structures of Noncrystalline Solids 73

2.4.1.1 Diffraction Methods 73

- X-Ray Diffraction 73
- Neutron Diffraction 78
- Electron Diffraction 78
- The EXAFS Method 79

2.4.1.2 Infrared and Raman Spectroscopy 80

- Lattice Model for the Vibrational Spectra of Noncrystalline Solids 80
- Molecular model for the Vibrational Spectra of Glasses 84

2.4.1.3 Other Methods of Solid State Analysis 85

- Photoelectron Spectroscopy 85
- Electron Spin Resonance (ESR) Spectroscopy 86
- Nuclear Magnetic Resonance (NMR) Spectroscopy 86
- Mössbauer Spectroscopy 87
- UV/VIS Spectroscopy 88

2.4.1.4 Chemical Methods for Elucidating the Structure of Glasses 88

2.4.2 Structural Theories of Glass Formation 89

2.4.2.1 Prototype Glass-Forming Compounds 90

2.4.2.2 Network Model of Glass Formers 91

2.4.2.3 Cluster Models 94

2.4.2.4 The Role of the Chemical Bond in Glass Formation 95
Contents
