Editors

# Linear Algebra, Markov Chains, and Queueing Models

With 55 Illustrations

Springer-Verlag

New York Berlin Heidelberg London Paris  
Tokyo Hong Kong Barcelona Budapest

## CONTENTS

Foreword .....	xi
Preface .....	xiii

### **Perturbation Theory and Error Analysis**

Error bounds for the computation of null vectors with applications to Markov Chains .....	1
<i>Jesse L. Barlow</i>	
The influence of nonnormality on matrix computations .....	13
<i>Françoise Chatelin</i>	
Componentwise error analysis for stationary iterative methods .....	29
<i>Nicholas J. Higham and Philip A. Knight</i>	
The character of a finite Markov chain .....	47
<i>Carl D. Meyer</i>	
Gaussian elimination, perturbation theory, and Markov chains .....	59
<i>G.W. Stewart</i>	

### **Iterative Methods**

Algorithms for periodic Markov chains .....	71
<i>François Bonhoure, Yves Dallery, and William J. Stewart</i>	
Iterative methods for queueing networks with irregular state-spaces .....	89
<i>Raymond H. Chan</i>	
Analysis of $p$ -cyclic iterations for Markov chains .....	111
<i>Apostolos Hadjidimos and Robert J. Plemmons</i>	
Iterative methods for finding the stationary vector for Markov chains .....	125
<i>Dianne P. O'Leary</i>	
Local convergence of (exact and inexact) iterative aggregation ...	137
<i>Daniel B. Szyld</i>	

## Queueing Theory and Applications

Automated generation and analysis of Markov reward models using stochastic reward nets .....	145
<i>Gianfranco Ciardo, Alex Blakemore, Philip F. Chimento, Jr., Jogesh K. Muppala, and Kishor S. Trivedi</i>	
Means and variances in Markov reward systems .....	193
<i>Winfried K. Grassmann</i>	
A direct algorithm for computing the stationary distribution of a $p$ -cyclic Markov chain .....	205
<i>Daniel P. Heyman</i>	
Approximate analysis of a discrete-time queueing model of the shared buffer ATM switch .....	211
<i>S. Hong, H.G. Perros, and H. Yamashita</i>	
Algorithms for infinite Markov chains with repeating columns .....	231
<i>Guy Latouche</i>	
Cray-2 memory organization and interprocessor memory contention .....	267
<i>Robert W. Numrich</i>
