TELECOMMUNICATIONS
DEMAND IN THEORY
AND PRACTICE

by

LESTER D. TAYLOR

Department of Economics, University of Arizona, Tucson, Ariz., U.S.A.

KLUWER ACADEMIC PUBLISHERS
DORDRECHT / BOSTON / LONDON
# TABLE OF CONTENTS

**LIST OF FIGURES**

**LIST OF TABLES**

**PREFACE**

**CHAPTER 1 / INTRODUCTION AND OVERVIEW**

I. Background .......................... 1
II. Recent Methodological Developments .................... 3
III. Conferences and Special Volumes ...................... 6
IV. Plan of Book .......................... 7

**CHAPTER 2 / THE THEORY OF TELEPHONE DEMAND I:**

**BASIC RESULTS** .......................... 8

I. Some Basic Considerations .......................... 8
II. Recent Contributions to the Theory of Telephone Demand .......... 10
III. Consumption Externalities and Communities of Interest .......... 23
IV. A Framework for Analyzing Telephone Demand .................... 24
V. Relationships Between Price and Income Elasticities for Access and Usage .......... 31
VI. Option Demand ................................ 33

**CHAPTER 3 / THE THEORY OF TELEPHONE DEMAND II:**

**EXTENSIONS OF BASIC RESULTS** ............... 36

I. The Duration and Distance Dimensions of Telephone Demand ........ 36
II. Time-of-Day Pricing ................................ 48
III. Operator-Handled Versus Direct-Dialed Calls .................... 50
IV. Some Further Dynamics ................................ 51
V. The Usage of Price Deflated Revenues ........................ 54
VI. Firm vs Market Elasticities ................................ 56
VII. Logistic Approaches to Forecasting .......................... 61
VIII. Concluding Comments ................................ 63

**CHAPTER 4 / BUSINESS TELECOMMUNICATIONS DEMAND** ............. 65
I. Some Basic Considerations 65
II. A General Model of Business Demand 68
III. Some Specific Models of Business Demand 73
IV. Business Demand From the Point of View of the Local Exchange Company 80
V. Wrap-up and Summary 83

CHAPTER 5 / RECENT STUDIES OF RESIDENTIAL ACCESS DEMAND 85
I. The 1983 Perl Study 86
II. Southwestern Bell’s Residential Access Demand Model: Taylor and Kridel (1990) 96
III. Bell Canada’s Residential Access Demand Model 107
IV. Train, McFadden, and Ben-Akiva (1987) 111
V. Evaluation 125

CHAPTER 6 / RECENT STUDIES OF TOLL DEMAND 129
I. Toll Demand in Ontario and Quebec 130
II. Point-to-Point Toll Demand 132
III. The Demand for Interstate Access Minutes 141
IV. The Demand for Bypass of the LEC 145
V. Wrap-up 147

CHAPTER 7 / THE DEMAND FOR LOCAL CALLS AND RELATED LOCAL SERVICES 149
I. Local Calling and the Choice Between Flat-Rate and Measured Service 149
II. Bypass Via EAS: Kridel (1988) 163
III. Results From the GTE Measured-Service Experiment: Park, Wetzel, & Mitchell (1983) 169
IV. The Demand for Custom-Calling Features 174

CHAPTER 8 / BUSINESS TELEPHONE SYSTEM DEMAND, 193
I. Total-Bill and Socio-Demographic Effects 193
II. Business Telephone System Demand 193
III. Total-Bill Effects 200
IV. Socio-Demographic and Other Characteristics of Telecommunications Demand 204
CHAPTER 9 / CONSUMPTION EXTERNALITIES 212

I. The Network Externality and the Optimal Pricing of Telecommunications Services 213
II. An Alternative Measure of the Network Externality 218
III. Distributional Equity 222
IV. Some Remaining Questions 230
V. Call Externalities 231
VI. Empirical Evidence Regarding Consumption Externalities 236
VII. Conclusions 238

CHAPTER 10 / PRICE ELASTICITIES IN THE HEARING ROOM: THE PROMISE AND LIMITS OF ECONOMETRIC ANALYSES OF TELECOMMUNICATIONS DEMAND 241

I. The Structure of an Econometric Study 242
II. Econometrics in the Hearing Room: Some Guiding Precepts 251
III. Some Pitfalls in Using Econometric Models 252

CHAPTER 11 / EVALUATION AND CONCLUSIONS 255

I. What We Appear to Know About the Structure of Telecommunications Demand 256
II. Problem Areas 266
III. Demand Analysis in a Competitive/Partially Regulated Environment 270

APPENDIX 1 / THE PRE-1980 EMPIRICAL LITERATURE ON TELEPHONE DEMAND: ACCESS, LOCAL SERVICE, AND INTERSTATE TOLL 271

I. The Demand for Access 271
II. The Demand for Local Use 283
III. Long-Haul (Interstate) Toll Demand 295

APPENDIX 2 / THE PRE-1980 EMPIRICAL LITERATURE ON TELEPHONE DEMAND: INTRASTATE TOLL, WATS AND PRIVATE LINE, COIN, ETC. 315

I. Intrastate Toll Demand 315
II. WATS and Private Line 328
III. Coin Stations 332
Table of Contents

IV. Vertical Services 334
   V. The Impact of Service-Connection and Other Nonrecurring Charges 336
   VI. International Demand 338
   VII. Yellow-Pages Advertising 341
   VIII. Noneconometric Approaches to Forecasting Telephone Demand 345

APPENDIX 3 / NETWORK EXTERNALITY AND THE DEMAND FOR RESIDENTIAL LONG-DISTANCE TELEPHONE SERVICE: A COMMENT 349
   I. A Model of Toll Demand 349
   II. Isolation of the Network Externality 355
   III. Conclusions 368

BIBLIOGRAPHY 370
