Second Conference on

Recent Advances in Active Control of Sound and Vibration

General Chairman: C. R. Fuller
Technical Chairman: R. J. Silcox
Program Editor: R. A. Burdisso

Virginia Polytechnic Institute and State University
Blacksburg, Virginia

28–30 April, 1993

Sponsored by:
NASA Langley Research Center
Office of Naval Research
U.S. Army Aerostructures Directorate
# Contents

**Preface**

**FEEDFORWARD ALGORITHMS I**

*An Application of Filtered-X Techniques and Neural Networks to the Active Control of Non-Linear Systems* ........................................... 3  
D. E. Brown, Lockheed Engineering and Sciences Co., NASA Langley Research Center, MS 463, Hampton, VA 23681, U.S.A.  
R. Cabell, Department of Mechanical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0238, U.S.A.

*State Space Modeling of Tonal Adaptive Controllers* ........................................... 15  
M. J. Burke, Noise Cancellation Technologies, Inc., 1015 West Nursery Road, Linthicum, MD 21090, U.S.A.

*On the Optimal Design of a Controller for the Active Reduction of Random Noise* .............. 26  
N. J. Doelman, TNO Institute of Applied Physics, P.O. Box 155, 2600 AD Delft, and Laboratory of Acoustics and Seisms, Faculty of Applied Physics, Delft University of Technology, The Netherlands

*Comparison of Two On-Line Identification Algorithms for Active Noise Control* .............. 38  
C. Bao, P. Sas, H. Van Brussel, Department of Mechanical Engineering, Katholieke Universiteit Leuven, Celestijnenlaan 300B, B-3001 Heverlee, Belgium

**INTERIOR NOISE**

*Investigation of Force Distributions for Interior Noise Control Using a Neural Network* ........... 55  
R. H. Cabell, Department of Mechanical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0238, U.S.A.  
H. C. Lester, Structural Acoustics Branch, NASA Langley Research Center, Hampton, VA 23681, U.S.A.

*Active Sound Reduction in an Aircraft by Means of Piezoelectric Sensors and Actuators* ........ 70  
G. Ambrosino, G. Celentano, Dipartimento di Informatica e Sistemistica, Università di Napoli, Via Claudio 21, 80125 Napoli, Italy  
L. Verde, C.I.R.A. (Centro Italiano Ricerche Aerospaziali), Via Maiorise, 81043 Capua (CE), Italy

*Numerical Simulations of a Coupled 3-D Structural Acoustics System* .......................... 85  
R. J. Silcox, R. C. Smith, NASA Langley Research Center, Hampton, VA 23681, U.S.A.

*On Increase of the Insertion Loss of a Double-Panel Partition by Active Noise Control* ........ 98  
P. Sas, C. Bao, J. Van de Peer, W. Desmet, Department of Mechanical Engineering, Katholieke Universiteit Leuven, Celestijnenlaan 300B, B-3001 Heverlee, Belgium  
F. Augusztinovicz, Institute for Transport Sciences, Than K. u. 3-7, 1112 Budapest, Hungary

**MODELING AND SYSTEM IDENTIFICATION**

*Active Behavior of an Elastic Bar Undergoing Phase Transformations* .......................... 117  
Q. Jiang, Department of Engineering Mechanics, University of Nebraska-Lincoln, Lincoln, NE 68588, U.S.A.
## Contents

**A Piecewise Continuous Timoshenko Beam Model for the Dynamic Analysis of Tapered Beam-Like Structures** ................................................................. 128
J. Y. Shen, E. G. Abu-Saba, W. M. McGinley, L. Sharpe, Jr.,
Center for Aerospace Research, School of Engineering,
North Carolina A&T State University, Greensboro, NC 27411, U.S.A.
L. W. Taylor, Jr., Control & Guidance Division, Langley Research Center,
Hampton, VA 23665, U.S.A.

**“Smart” Foams for Active Absorption of Sound** ............................................ 139
J. S. Bolton, E. R. Green, 7077 Ray W. Herrick Laboratory, Purdue University,
West Lafayette, IN 47907-1077, U.S.A.

**Estimation of the Dynamic Behaviour of Complex Structures by Neural Networks** ................................................................. 150
L. Lecce, F. Marulo, Aircraft Design Institute, Engineering Faculty,
University of Naples “Federico II”, Via Claudio 21, 80125 Napoli, Italy
A. Concioio, F. S. Del Gatto, C.I.R.A., Italian Aerospace Research Center,
Via Maioville, 81043 Capua (CE), Italy
M. Savastano, A. Sorrentino, I.R.S.I.P., Parallel Information System Research Institute,
CNR, Via P. Castellino 111, 80128 Napoli, Italy
M. Napolitano, West Virginia University, Morgantown, WV, U.S.A.

**A Model of Organizational Interdependence: Intercommunication between Artificial Neural Nets and Its Relation to Control Systems** ................................................................. 163
W. F. Lawless, Paine College, 1235 15th Street, Augusta, GA 30901-3182, U.S.A.

### ACTUATORS AND SENSORS

**Shaped Vibration Sensors for Feedforward Control of Structural Radiation** .................. 177
S. D. Snyder, C. H. Hansen, Department of Mechanical Engineering,
University of Adelaide, GPO Box 498, Adelaide, South Australia, 5001, Australia
N. Tanaka, Mechanical Engineering Laboratory, MITI, 1-2 Namiki,
Tsukuba Science City, Ibaraki 305, Japan

**Power Consumption of Piezoelectric Actuators in Underwater Active Structural Acoustic Control** ................................................................. 189
S. C. Stein, C. Liang, C. A. Rogers, Center for Intelligent Material Systems
and Structures (CIMSS), Virginia Polytechnic Institute and State University,
Blacksburg, VA 24061-0261, U.S.A.

**Asymmetric Piezoelectric Actuation and Sensing of a Beam** ................................. 204
F. Charette, G. Plantier, C. Guigou, A. Berry, G.A.U.S., Université de Sherbrooke,
Sherbrooke, Québec J1K 2R1, Canada

**Equivalent Forces and Wavenumber Spectra of Shaped Piezoelectric Actuators** .................. 216
S. J. Kim, V. R. Soni, J. D. Jones, 7077 Ray W. Herrick Laboratories,
School of Mechanical Engineering, Purdue University, West Lafayette,
IN 47907, U.S.A.

**Active Vibration Control Using Magnetostrictive Intra-Structural Actuators** .................. 228
W. Webbon, J. Sewell, D. Baker, L. Riddle, Martin Marietta Aero & Naval Systems,
103 Chesapeake Park Plaza, Baltimore, MD 21220, U.S.A.

**A Computer Implementation of the Static and Dynamic Analysis of Induced Strain Actuated Beams** ................................................................. 240
M. K. Subramaniam, C. Liang, C. A. Rogers, Center for Intelligent Material Systems
and Structures (CIMSS), Virginia Polytechnic Institute and State University,
Blacksburg, VA 24061-0261, U.S.A.

### APPLICATIONS I

**Analysis, Design and Evaluation of Active Induction Noise Control** .................. 255
J. White, AC Rochester, Division of General Motors, Flint, MI, U.S.A.
W. Eversman, Mechanical and Aerospace Engineering, University of Missouri-Rolla,
Rolla, MO, U.S.A.

**The Jitter Experiment Conceptual Vibration Control System Design and Evaluation** .................. 265
M. L. Drake, S. E. Olson, G. J. Frank, J. M. Aulds, University of Dayton
Research Institute, 300 College Park, Dayton, OH 45469-0112, U.S.A.
# Contents

**Active Control of Hum from Large Power Transformers—The Real World** ................................................................. 279  
S. E. Craig, Technical Design Corp., P.O. Box 363, Manlius, NY 13104-0363, U.S.A.  
O. L. Angevine, Angevine Acoustical Consultants, Inc., P.O. Box 725, East Aurora, NY 14052-0725, U.S.A.

**Active Cancellation of Diesel Engine Vibration Using Multichannel Hydraulic Adaptive Control System** ...................... 291  
A. Roure, R. Bouc, A. Delinière, A. Livadaris, P. Lucet,  
Laboratoire de Mécanique et d'Acoustique du CNRS, 31 Chemin Joseph Aiguier, 13402 Marseille, Cedex 09, France

**Feedback Algorithms**

**Hybrid Control Using Fuzzy Set Theory** ......................................................... 303  
R. Subramaniam, A. Reinhorn, S. Nagarajaiah, State University of New York at Buffalo, Amherst, NY 14260, U.S.A.

**A Frequency Domain Method for Assigning Variances for the Covariance Control of Linear Dynamical Systems** ............ 315  
W. D. Robinson, Sverdrup Technology, Inc., MSFC Group, 620 Discovery Dr., Huntsville, AL 35806, U.S.A.

**Maximum Entropy Controller Synthesis for Colocated and Noncolocated Systems** ......................................................... 327  
J. H. Friedman, D. S. Bernstein, Department of Aerospace Engineering, The University of Michigan, Ann Arbor, MI 48109, U.S.A.

**An Evaluation of Feedback, Adaptive Feedforward and Hybrid Controller Designs for Active Structural Control of a Lightly-Damped Structure** ................................................................. 339  
W. R. Saunders, H. H. Robertshaw, R. A. Burdisso, Department of Mechanical Engineering, Center for Intelligent Material Systems and Structures, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061, U.S.A.

**Comparison of Various Digital LQ-MIMO Control Laws** ......................................................... 355  
D. G. Cole, H. H. Robertshaw, Department of Mechanical Engineering, Center for Intelligent Material Systems and Structures, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0238, U.S.A.

**Structurally Radiated Sound I**

**Active Structural Acoustic Control of Sound Transmission through a Panel with Vibration and Acoustic Sensors** .................. 369  
G. P. Mathur, B. N. Tran, McDonnell Douglas Corporation, 3855 Lakewood Blvd., MC 36-60, Long Beach, CA 90846, U.S.A.

**Active Control of Structurally Radiated Sound from an Enclosed Finite Cylinder** ................................................................. 380  
R. L. Clark, Department of Mechanical Engineering and Materials Science, Duke University, Durham, NC 27708-0300, U.S.A.  
C. R. Fuller, Department of Mechanical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061, U.S.A.

**Robust Control of Sound Transmission Reduction in Plate by Using Piezoelectric Ceramics** ......................................................... 403  
Y. Mitani, S. Akishita, Department of Mechanical Engineering, Ritsumeikan University, Kita-ku, Kyoto 603, Japan

**A Theoretical Analysis of Active Control of Sound Transmission through an Elastic Plate Backed by a Rectangular Cavity** .......... 415  

**Duct Acoustics**

**Tight-Coupled Type Active Attenuator: Equivalent Circuit Analysis and Its Applications** ......................................................... 429  
M. Taki, Department of Electronics and Information Engineering, Tokyo Metropolitan University, 1-1, Minami-Osawa, Hachioji-shi, Tokyo 192-03, Japan

**Active Noise Cancellation in Ducts in the Presence of Higher Order Modes** ......................................................... 441  
S. D. Goodman, K. G. Burlage, Digisonix, Inc., 8401 Murphy Drive, Middleton, WI 53562, U.S.A.
Feedforward Noise Attenuation in a Short Duct ........................................... 449
D. G. Smith, D. P. Mendat, G. P. Eatwell, Noise Cancellation Technologies, Inc.,
1015 West Nursery Road, Suite 101, Linthicum, MD 21090, U.S.A.

ACTIVE ISOLATION AND ABSORBERS

Analytical Comparison of Active versus Passive Aircraft Engine Suspensions ........... 459
N. Vahdati, J. A. Pike, Lord Corporation, 1635 W. 12th Street, Erie, PA 16514, U.S.A.

Performance Analysis of Active Mounts for Structural Vibration Reduction ............... 471
M. Ahmadian, L. Miller, S. Southward, M. Roemer, Aerospace Products Division,
Lord Corporation, 1635 W. 12th St., PO. Box 10039, Erie, PA 16514, U.S.A.

Active Control for Vibration Isolation Despite Resonant Structural Dynamics:
A Trade Study of Sensors, Actuators and Configurations .................................... 482
G. H. Blackwood, MIT Space Engineering Research Center,
Cambridge, MA 02139, U.S.A.
A. H. von Flotow, MIDE Technology Corporation, 1750 Country Club Road,
Hood River, OR 97031, U.S.A.

An Adaptive Autoparametric Vibration Absorber .............................................. 495
M. P. Cartmell, Department of Mechanical Engineering, University College of Swansea,
Swansea SA2 8PP, U.K.

Control of an Adaptable Dynamic Absorber for Transient Vibration Suppression .......... 506
K. W. Wang, J. S. Lai, Department of Mechanical Engineering,
The Pennsylvania State University, University Park, PA 16802, U.S.A.

FEEDFORWARD ALGORITHMS II

Electronic Design Considerations for Active Noise and Vibration Control Systems .......... 519
S. D. Goodman, Digisonix, Inc., 8401 Murphy Drive, Middleton, WI 53562, U.S.A.

A General Purpose Multichannel Adaptive System for Active Control of
Sound and Vibrations ......................................................................................... 527
G. Mangiante, A. Roure, Laboratoire de Mécanique et d’Acoustique, 31 Chemin
Joseph Aiglier, Centre National de la Recherche Scientifique,
13402 Marseille, Cedex 09, France

A New Adaptive Filter with Orthogonal Second-Order Sections for Active Noise Control .......... 535
J. Thi, A. Claus, AT&T Bell Laboratories, Arlington, VA 22202, U.S.A.

Enhanced LMS Control Algorithm ....................................................................... 543

The Generalized Multichannel Filtered-X Algorithm ........................................... 550
D. C. Swanson, The Applied Research Laboratory, The Pennsylvania State University,
PO. Box 30, State College, PA 16804, U.S.A.

Frequency-Domain Implementation of the Filtered-X Algorithm
with On-Line System Identification .................................................................... 562
State University, PO. Box 30, University Park, PA 16804, U.S.A.

Frequency Domain Adaptive Control Algorithm for Electronic Muffler Applications .......... 574
Kh. Eghtesadi, E. Ziegler, Noise Cancellation Technologies, Inc.,
1015 West Nursery Road, Linthicum, MD 21046, U.S.A.

FLUID STRUCTURE INTERACTION

Active Control for Aerodynamic Vibrations of Tall-Structures through
Boundary-Layer Control Method ..................................................................... 589
Y. Kubo, H. Yasuda, C. Kotsubo, Department of Civil Engineering,
Kyushu Institute of Technology, Tobata, Kitakyushu 804, Japan

Reconstruction and Active Control of Coherent Unstable Flow
on a Two Dimensional Wing ........................................................................... 600
S. Nakashima, K. Otsuta, Central Research Laboratory, Mitsubishi Electric Corp.,
1-1, Tsukaguchi-Honmachi 8-chome, Amagasaki, Hyogo 661, Japan
S. Akishita, Department of Mechanical Engineering, Ritsumeikan University,
Kita-ku, Kyoto 603-77, Japan
Control of Vortical Flows—Part I: Excited Jets ................................................. 612
C. Ding, U. Vandsburger, Department of Mechanical Engineering, Virginia Polytechnic
Institute and State University, Blacksburg, VA 24061-0238, U.S.A.

Boundary Layer Excitation by Periodic Heating of a Thin Ribbon .................. 624
B. A. Haven, Department of Aeronautics, United States
Air Force Academy, CO 80840, U.S.A.
M. E. Franke, Air Force Institute of Technology, Wright-Patterson AFB, OH 45433, U.S.A.

Numerical Studies of Active Control of Boundary-Layer Transition ..................... 636
P. Hackenberg, O. R. Totty, P. A. Nelson, The University of Southampton,
Southampton SO9 5NH, England

The Automatic Control of Boundary Layer Transition via a Double Suction Panel ...... 648
J.-L. Rioual, P. A. Nelson, M. J. Fisher, Institute of Sound and Vibration Research,
Southampton University, Southampton SO9 5NH, England

Stabilization of the Nonlinear Vibration of an Elastic Panel by Boundary Control .......... 660
P-L. Chow, Department of Mathematics, Wayne State University,
Detroit, MI 48202, U.S.A.
L. Maestrello, Acoustic Division, NASA Langley Research Center,
Hampton, VA 23665, U.S.A.

FLEXIBLE STRUCTURES

Active Control of a Vibrating Antenna Structure .............................................. 671
C-S. Chou, C-C. Chou, Institute of Applied Mechanics, National Taiwan University,
Taipei 10764, Taiwan, R.O.C.

Smart Modal Sensors and Actuators for Aeroservoelastic Applications ................ 681
F. Nitzsche, Deutsche Forschungsanstalt für Luft- und Raumfahrt, e.V. (DLR),
Institute for Aeroelasticity, Bunsenstraße 10, W-3400 Göttingen, Germany

Simultaneously Optimal Active and Passive Control Design for a Slewing
Piezoelastic and Viscoelastic Laminate Beam .............................................. 693
T. E. Alberts, H. Xia, J. V. Harrell, Department of Mechanical Engineering
and Mechanics, Old Dominion University, Norfolk, VA 23529-0247, U.S.A.

Trajectory and Vibration Control of a Three-Link Flexible Robot Using Inverse
Joint Controller and Optimal Multiple Stabilizers ........................................ 705
S. Jupudi, Rasna Corporation, 2590 N. First Street, Suite 200, San Jose, CA 95131, U.S.A.
S. N. Singh, M. B. Trabia, University of Nevada, 4505 Maryland Parkway,
Las Vegas, NV 89154, U.S.A.

Control System Design for a Smart Slewing Frame ........................................ 717
D. J. Leo, D. J. Inman, Department of Engineering Science and Mechanics,
Virginia Polytechnic and State University, Blacksburg, VA 24061-0219, U.S.A.

Active Control of Nonlinear Oscillations in a Flexible Rod Slider Crank Mechanism .... 729
S-W. Lee, D. G. Beale, Department of Mechanical Engineering, 202 Ross Hall,
Auburn University, Auburn, AL 36849, U.S.A.

FEEDFORWARD ALGORITHMS III

Multiple-Input, Multiple-Output, Multiple-Error Adaptive Feedforward
Control Using the Filtered-X Normalized LMS Algorithm ................................ 743
S. C. Douglas, Department of Electrical Engineering, University of Utah,
2272 Merrill Engineering Building, Salt Lake City, UT 84112, U.S.A.
J. A. Olkin, Acoustics and Radar Technology Laboratory, Systems Technology Division,
SRI International, 333 Ravenswood Avenue, Menlo Park, CA 94025, U.S.A.

Frequency-Domain Adaptive Algorithms for Multi-Channel Active Sound Control .... 755
Q. Shen, Active Noise and Vibration Technologies, 3811 E. Wier Avenue,
Phoenix, AZ 85040, U.S.A.
A. Spanias, Department of Electrical Engineering, Arizona State University,
Tempe, AZ 85287-5706, U.S.A.

Multiple-Channel Error Path Modelling with the Inter-Channel Decoupling Algorithm ..... 767
S. M. Kuo, J. Luan, Department of Electrical Engineering, Northern Illinois University,
Dekalb, IL 60115, U.S.A.
A Switching Element Adaptive Control Algorithm for Nonlinear Systems .................................. 778
S. P. Rubenstein, Digisonix, Inc., RO. Box 600, Stoughton, WI 53589, U.S.A.
M. C. Allie, Digisonix, Inc., 8401 Murphy Drive, Middleton, WI 53562, U.S.A.

Pole-Position Sensitivity of Adaptive Recursive Filters ............................................................ 790
C. W. Brokish, Advanced Development Group, Digisonix, Inc., 8401 Murphy Drive, Middleton, WI 53562-2543, U.S.A.
R. A. Greiner, Electroacoustics Laboratory, Department of Elec. & Computer Engineering, University of Wisconsin, Madison, WI 53706, U.S.A.

Fast Adaption Algorithms in Active Noise Control ................................................................. 802
S. J. Flockton, Royal Holloway, University of London, Egham, Surrey, TW20 0EX, England

APPLICATIONS II

Parameter Studies of Active Control of Road Noise in Automobiles ........................................ 813
C. M. Heatwole, X. Dian, R. J. Bernhard, Ray W. Herrick Labs, School of Mechanical Engineering, Purdue University, West Lafayette, IN 47907-1077, U.S.A.

Development of an Active Noise Control System for Ducted Fans (without Acoustic Feedback) ................................................................. 825
D. L. Sutliff, R. T. Nagel, Department of Mechanical and Aerospace Engineering, Box 7910, North Carolina State University, Raleigh, NC 27695-7910, U.S.A.

Active Control of Engine Exhaust Noise Using Motional Feedback Loudspeaker ...................... 837
T. Usagawa, H. Furukawa, Y. Nishimura, M. Ebata, Department of Electrical Engineering and Computer Science, Kumamoto University, 2-39-1 Kurokami, Kumamoto 860, Japan

Active Control of Radiated Inlet Noise from Turbofan Engines ............................................... 848
R. A. Burdisso, R. H. Thomas, C. R. Fuller, W. F. O'Brien, Vibration and Acoustics Laboratory, Mechanical Engineering Department, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0238, U.S.A.

VIBRATION CONTROL

Nonlinear Panel Flutter Suppression with Piezoelectric Actuation .......................................... 863
Z. Lai, D. Y. Xue, J.-K. Huang, C. Mei, Mechanical Engineering and Mechanics, Old Dominion University, Norfolk, VA 23529, U.S.A.

Satellite Mass Damper .................................................................................................................. 875
I. Nishimura, T. Kobori, M. Sakamoto, N. Koshika, K. Sasaki, S. Ohruji, Kobori Research Complex, Kajima Corporation, 5-6-30, Akasaka, Minato-ku, Tokyo 107, Japan

Feedback Techniques for Minimizing Bearing Loads in Rotating Machinery ............................ 885
J. H. Kim, W. W. Clark, R. D. Marangoni, Department of Mechanical Engineering, University of Pittsburgh, Pittsburgh, PA 15261, U.S.A.

Active Control of Harmonic Vibration in Beams with Arbitrary End Conditions ....................... 897
C. H. Hansen, A. J. Young, X. Pan, Department of Mechanical Engineering, University of Adelaide, GPO Box 498, Adelaide, South Australia, 5001, Australia

Active Control of Flexural and Extensional Power Flow in Beams Using Real Time Wave Vector Sensors ................................................................................. 909
G. P. Gibbs, C. R. Fuller, Department of Mechanical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061, U.S.A.
R. J. Silcox, M.S. 463, Structural Acoustics Branch, NASA Langley Research Center, Hampton, VA 23665, U.S.A.

STRUCTURALLY RADIATED SOUND II

Active Wavenumber Control of Acoustic Radiation from a Plate ............................................. 929
Contents

Optimization of Control Force Input Positions to Reduce Radiated Noise of Vibrating Structures ................................................................. 941
M. A. Hamdi, S. Dedieu, P. R. Wagstaff, University of Compiègne, BP 649,
60206 Compiègne, France
C. Chassaignon, Acovib SARL, Centre de Transfert, 66 av. de Landshut,
60200 Compiègne, France
G. Leyrat, Straco SA, 20 rue du Fonds-Pernants, Zac de Mercières 3,
60471 Compiègne Cedex, France
J. Vipperman, Acoustics Laboratory, Department of Mechanical Engineering,
Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0238, U.S.A.

SOUND FIELD MODIFICATION

Cancellation of Radiated Sound Fields by the Use of Multiple Secondary Sources ......................... 957
T. A. Beauvilain, J. S. Bolton, Ray W. Herrick Laboratories, Purdue University,
West Lafayette, IN 47907-1077, U.S.A.

Musical Interference Suppression and On-Line Modeling Techniques for Multi-Channel Active Noise Control Systems .................................................. 969
B. M. Finn, Digisonix Inc., 8401 Murphy Drive, Middleton, WI 53562, U.S.A.
S. M. Kuo, Northern Illinois University, Department of Electrical Engineering,
DeKalb, IL 60115, U.S.A.

Multi-Channel Digital Signal Processing in Sound Field Reproduction ......................................... 981
F. Orduna-Bustamante, P. A. Nelson, Institute of Sound and Vibration Research,
The University, Southampton, SO9 5NH, England
H. Hamada, Department of Electrical Communication Engineering,
Tokyo Denki University, Tokyo 101, Japan

Reconstructing a Plane Wave over a Continuous Area Using Monopole Sources ............................... 993
O. Kirkeby, P. A. Nelson, Institute of Sound & Vibration Research,
Southampton University, Southampton SO9 5NH, England

Author Index ................................................................. 1005
