Chapter 1 Circular Dichroism: An Introduction 1
Günther Snatzke
1.1 Introduction 1
1.2 Principles of UV Spectroscopy 24
1.3 Principles of CD Spectroscopy 31

Chapter 2 From Pasteur to Parity Nonconservation: Theories of the Origin of Molecular Chirality 39
Stephen F. Mason
2.1 Introduction 39
2.2 Pasteur on Molecular and Cosmic Dissymmetry 41
2.3 Stereoselective Chiral Synthesis 43
2.4 Symmetry Principles and Chiral Fields 45
2.5 Chance and Necessity in the Evolution of Biochemical Homochirality 47
2.6 Parity and its Nonconservation 50
2.7 Summary and Conclusion 53
Chapter 3  Theoretical Approach to Natural Electronic Optical Activity  59
Andrey Volosov and Robert W. Woody

3.1 From Classical Consideration to Quantum-Mechanical Models: Basic Ideas  60
3.2 Different Approaches to Calculation of Optical Activity  64
3.3 What Is Practically Important in Calculation of Optical Activity  74
3.4 Short Review of Methods  78
3.5 Limitations of Practical Approach and Possible Directions of Development  80

Chapter 4  Circular Dichroism of Oriented Molecules  85
Hans-Georg Kuball and Alfred Schönhofer

4.1 The ACD Method  87
4.2 Description of Polarized Spectroscopy  89
4.3 Results and Discussion  92
4.4 Chromophores—Effect of Exciton Coupling—Outlook  100

Chapter 5  Application of CD to the Study of Some Cholesteric Mesophases  105
Giovanni Gottarelli and Gian Piero Spada

5.1 Validity of CD Measurements on Cholesteric Samples  108
5.2 CD Studies of Some Lyotropic Cholesterics  108

Chapter 6  Circularly Polarized Luminescence: A Probe for Chirality in the Excited State  121
Harry P.J.M. Dekkers

6.1 Introduction  121
6.2 Scope of the CPL Technique  122
6.3 Principles of Measurement and Instrumentation  125
6.4 Relationship of Experimental and Theoretical Quantities  127
6.5 Applications of CPL Spectroscopy: Organic Carbonyl Compounds  138
6.6 Conclusion and Prospects  149
Chapter 7  Chiroptical Luminescence Spectroscopy as a Probe of Electronic Excited-State Structure and Dynamics in Dissymmetric Metal Complexes  153
F. S. Richardson and David H. Metcalf
7.1 Chiroptical Luminescence Measurements  154
7.2 Excited-State Racemization Kinetics  163
7.3 Circularly Polarized Excitation Spectra  168
7.4 Enantioselective Excited-State Quenching  172
7.5 Conclusion  176

Chapter 8  Vibrational Raman Optical Activity: From Fundamentals to Biochemical Applications  179
Laurence D. Barron and Lutz Hecht
8.1 Introduction  179
8.2 Basic Theory of ROA  181
8.3 ROA Instrumentation  195
8.4 Recent Experimental ROA Studies  201

Chapter 9  Circular Dichroism of Inorganic Complexes: Interpretation and Applications  217
Reiko Kuroda and Yoshihiko Saito
9.1 Introduction  217
9.2 Tris-Bidentate Complexes  219
9.3 Cis-bis-Bidentate Complexes  233
9.4 Complexes Involving Multidentate Ligands  234
9.5 Other Complexes: facet(D)-[Co (a) (BC) (DDD)]  242
9.6 Exciton Circular Dichroism  244
9.7 Chiral Tetrahedral Complexes  247
9.8 Concluding Remarks  251

Chapter 10  The Octant Rule  259
David A. Lightner
10.1 Introduction  259
10.2 Description of the Octant Rule  260
10.3 Definition of the Octant Rule  266
10.4 Qualitative Completeness and the Octant Rule  286
10.5 Applications of the Octant Rule  288
10.6 Concluding Comments  296
Chapter 11  Diene Chirality  301  
J. K. Gawronski and H. M. Walborsky

11.1  Introduction  301
11.2  Skewed s-cis Dienes  306
11.3  The 1,3-Cyclohexadiene Chirality Model  313
11.4  Endocyclic s-trans Dienes  319
11.5  Exocyclic s-trans Dienes  321
11.6  Strained Dienes (Dienes with Large Skew Angle)  325
11.7  Interactions with Other Chromophores  326

Chapter 12  Circular Dichroism of Twisted π-Electron Systems: Theoretical Determination of the Absolute Stereochemistry of Natural Products and Chiral Synthetic Organic Compounds  335  
Nobuyuki Harada

12.1  Theoretical Calculation of CD and UV Spectra by the π-Electron SCF-CI-DV MO Method  336
12.2  Absolute Stereochemistry of (+)-1,8a-Dihydro-3,8-Dimethylazulene, a Labile Biosynthetic Intermediate for 1,4-Dimethylazulene  337
12.3  Circular Dichroism and Absolute Stereochemistry of Chiral Troponoid Spiro Compounds  342
12.4  Absolute Stereochemistry of the Halenaquinol Family: Marine Natural Products with a Novel Pentacyclic Skeleton, as Determined by the Theoretical Calculation of CD Spectra  347
12.5  Chiral Spiroaromatics of 9,9'-Spirobiﬂuorene Skeleton  355

Chapter 13  The Exciton Chirality Method  361  
Koji Nakanishi and Nina Berova

13.1  Exciton Coupling between Chromophores  361
13.2  Exciton Coupling between Two Different Chromophores  365
13.3  Additivity Relations in Exciton-Coupled CD Curves  369
13.4  Carbohydrate Analysis  371
13.5  Red-Shifted Chromophores  374

## Chapter 17  Circular Dichroism of Peptides and Proteins  473  
*Robert W. Woody*  
17.1 Peptide Backbone  474  
17.2 Aromatic Side Chains and Disulfides  483  
17.3 Extrinsic Chromophores  488  

## Chapter 18  Vibrational Circular Dichroism Spectroscopy of Peptides and Proteins  497  
*Timothy A. Keiderling*  
18.1 Introduction  497  
18.2 Experimental Techniques  499  
18.3 Peptide VCD Studies  503  
18.4 Protein VCD Spectral Results  508  
18.5 Quantitative Protein VCD Studies in Terms of Structure  511  
18.6 Conclusion  516  

## Chapter 19  CD of Nucleic Acids  523  
*W. Curtis Johnson*  
19.1 Introduction  523  
19.2 Right-Handed Nucleic Acids  527  
19.3 Left-Handed DNA  534  
19.4 Applications of CD to Study Secondary Structure  535  

## Chapter 20  Circular Dichroism Coupled with HPLC: A Powerful Tool for Analytical, Stereochemical, and Spectroscopic Determinations  541  
*Piero Salvadori, Carlo Bertucci, and Carlo Rosini*  
20.1 Introduction  541  
20.2 CD Determinations of Chromatographic Elution Orders  542  
20.3 Analytical Applications of the CD Detection System in HPLC  548  
20.4 The Measurement of Circular Dichroism on Line  554  
20.5 Conclusions and Perspectives  558
