CONTACT ANGLE, WETTABILTY AND ADHESION

Festschrift in honor of Professor Robert J. Good

Editor: K.L. Mittal

///VSP///
Utrecht, The Netherlands, 1993
CONTENTS

Preface xi

Robert J. Good, innovator in colloid and surface chemistry
_C.J. van Oss_ xiii

Part 1: General Papers

Contact angle, wetting, and adhesion: a critical review
_R.J. Good_ 3

Capillary rise of a liquid on a solid grafted with long polymer chains
_F. Brochard-Wyart and P.G. de Gennes_ 37

Roles of molecular interactions in adhesion, adsorption, contact angle, and wettability
_L.-H. Lee_ 45

Spreading, wetting and contact angles
_J.F. Padday_ 97

Sessile drops: do they really stand on solid surfaces?
_M.E. Schrader_ 109

Part 2: Factors Influencing Contact Angle Measurements

Contact angle equilibrium: the intrinsic contact angle
_A. Marmur_ 125

Microscopic studies of static and dynamic contact angles
_P.A. Thompson, W.B. Brinckerhoff and M.O. Robbins_ 139

Effects of surface flaws on the wettability of solids
_M.E.R. Shanahan_ 159

On surface roughness effects in wetting phenomena
_R.D. Hazlett_ 173

Structural interactions in the wetting and spreading of van der Waals fluids
_G.J. Hirasaki_ 183

Local deviation in contact angles on heterogeneous fibrous solids
_M. Tagawa, A. Yasukawa, K. Gotoh, M. Tagawa, N. Ohmae and M. Umeno_ 221
Direct measurement of the contact angle on plates and on thin fibers: some theoretical aspects
B.J. Carroll 235

Pore size distribution in Separon using mercury contact angles in pores and hysteresis in porosimetry
J. Kloubek 247

Determination of contact angles and pore sizes of porous media by column and thin layer wicking
C.J. van Oss, R.F. Giese, Z. Li, K. Murphy, J. Norris, M.K. Chaudhury and R.J. Good 269

Wettability and the evaporation rates of fluids from solid surfaces
K.S. Birdi and D.T. Vu 285

Electric field induced variations in the wettability of stainless steel by ionic surfactant and electrolyte solutions
S. Wahal, C. Owiti and A. Bose 295

Contact angles of binary liquids and their interpretation
D. Li, C. Ng and A.W. Neumann 311

The effects of velocity and viscosity on solid-liquid interfacial behavior during dynamic contact angle measurement
M. Morra, E. Occhiello and F. Garbassi 321

Direct measurement of molten poly(ethylene terephthalate) contact angles on single aminopropylsilane coated glass fibers
B.B. Sauer 335

Some observations on the surface wetting relaxation of latex rubbers
L.W. Schroeder 349

A microtechnique for determining the surface tension of a liquid
B. Miller and I. Tyomkin 361

Part 3: Wettability Behavior and Surface Characterization of Various Materials

Contact angle studies of surface-hydrophilic elastomer films
I. Noda 373

The wetting properties of grafted cellulose films
A.F. Toussaint and P. Luner 383

Contact angle measurements as a way to analyse synthetic rubber surfaces modified by chlorination
J.M. Martín-Martínez, J.C. Fernández-Garcia and A.C. Orgilés-Barceló 397
Dynamic wetting behavior of silicon wafers in alkaline solutions of interest to semiconductor processing
J.-G. Park and S. Raghavan 421

Assessment of the wettability of pharmaceutical powders
G. Buckton 437

Improving the wettability of aluminum foil with oxygen plasma treatments
B.R. Strohmeier 453

Wettability of weathered wood
M.A. Kalnins and M.T. Knaebe 469

Wettability of kraft pulps - effect of surface composition and oxygen plasma treatment
G. Ström and G. Carlsson 475

Analysis of air-corona-treated polypropylene and poly(ethylene terephthalate) films by contact-angle measurements and X-ray photoelectron spectroscopy
M. Strobel, C.S. Lyons, J.M. Strobel and R.S. Kapaun 493

Changes in wettability with time of plasma-modified perfluorinated polymers
X. Xie, T.R. Gegenbach and H.J. Griesser 509

A glow discharge treatment to immobilize poly(ethylene oxide)/poly(propylene oxide) surfactants for wettable and non-fouling biomaterials
M.S. Sheu, A.S. Hoffman and J. Feijen 531

Self-assembled monolayers of alkanethiols on gold: the adsorption and wetting properties of monolayers derived from two components with alkane chains of different lengths
J.P. Folkers, P.E. Laibinis and G.M. Whitesides 547

Control of wettability of polymers using organic surface chemistry
T.G. Bee, E.M. Cross, A.J. Dias, K.-W. Lee, M.S. Shoichet and T.J. McCarthy 561

Effects of hydroxypropyl cellulose and hydroxyethyl cellulose adsorption on the wetting of low energy solid surfaces
E.J. McNally, C.-S. Gau and G. Zografi 575

Modification of the surface free energy components of a polymer by adsorption of poly(oxyethylene)-poly(oxypropylene) block co-polymers
F. Boury and J.-E. Proust 585

Time dependent wettability of mineral and metal surfaces in the presence of thiol surfactants
R.S. Farinato and D.R. Nagaraj 597
Surface properties of some styrene/vinyl pyridine diblock co-polymers  
F. Bosse, A. Eisenberg, M. El Kindi, A. Deng and H.P. Schreiber  
613

Estimation of the dispersive component of surface energy of polymer-grafted lignocellulosic fibers with inverse gas chromatography  
B. Riedl and P.D. Kamdem  
625

Solid surface free energy components determination by the thin-layer wicking technique  
E. Chibowski  
641

Surfactant modification of the surface energetics by hydrophobic polymers and protein adsorption  
E. Ruckenstein and J.H. Chen  
663

Surface tension parameters of ice obtained from contact angle data and from positive and negative particle adhesion to advancing freezing fronts  
C.J. van Oss, R.F. Giese, R. Wentzek, J. Norris and E.M. Chuvilin  
677

Surface free energies of alkylsiloxane monolayers supported on elastomeric polydimethylsiloxanes  
M.K. Chaudhury  
691

Surface properties of an anhydride-epoxy resin cured against different mold surfaces  
T. Chihani, P. Bergmark, P. Flodin and T. Hjertberg  
699

Surface modification of epoxy polymer with different perfluoroacids  
T. Chihani, P. Flodin and T. Hjertberg  
713

Part 4: Wettability and Adhesion, and Applied Aspects of Contact Angle/Wettability

Contact angle data and adhesive performance for smooth surfaces with attached molecular chains  
Y.C. Tsai, C.T. Chou and L.S. Penn  
729

Enhancement of polymer film adhesion using acid-base interactions determined by contact angle measurements  
M.B. Kaczinski and D.W. Dwight  
739

The effect of surface energetics and molecular interdiffusion on adhesion in multicomponent polymer systems  
C. Bonnerup and P. Gatenholm  
753

Wettability and adhesion studies of grafted poly(p-phenylene terephthalamide) fiber surfaces  
V. Ravichandran and S.K. Obendorf  
769
