TELLURIUM-CONTAINING HETEROCYCLES

MICHAEL R. DETTY and (in Part) MARIE B. O'REGAN

Office Imaging Research and Technical Development Kodak Imaging Group Eastman Kodak Company Rochester, New York

AN INTERSCIENCE® PUBLICATION
JOHN WILEY & SONS, INC.
NEW YORK • CHICHESTER • BRISBANE • TORONTO • SINGAPORE
## Contents

I. Tellurium-Containing Heterocycles: Reviews, Distinguishing Features, and Utility ............................ 1

II. Tellurophenes, Dihydrotellurophenes, and Tetrahydrotellurophenes and Their Benzo and Dibenzo Analogs 31

III. Telluranes, Tellurins, and Other Six-Membered Rings Containing One Tellurium Atom 147

IV. Telluropyrylium Compounds ........................................................................................................... 219

V. Tellurium-Containing Heterocycles with at Least One Group Va Element (Nitrogen, Phosphorus, or Arsenic) 293

VI. Tellurium-Containing Heterocycles Composed of Group IVa (Carbon, Silicon, Germanium, and Tin) and Group VIA Elements (Tellurium, Selenium, Sulfur, and Oxygen) 325

VII. Tellurium-Containing Heterocycles as Donor Molecules .................................................................. 363

VIII. Tellurium-Containing Heterocycles with Hypervalent or Coordination Bonds to Tellurium 425

MARIE B. O'REGAN

INDEX ...................................................................................................................................................... 491
