Jonathan Rosenberg

Algebraic $K$-Theory and Its Applications

Springer-Verlag
New York Berlin Heidelberg London Paris Tokyo Hong Kong Barcelona Budapest
Contents

Preface v

Chapter 1. $K_0$ of Rings 1
   1. Defining $K_0$ 1
   2. $K_0$ from idempotents 7
   3. $K_0$ of PIDs and local rings 11
   4. $K_0$ of Dedekind domains 16
   5. Relative $K_0$ and excision 27
   6. An application: Swan's Theorem and topological $K$-theory 32
   7. Another application: Euler characteristics and the Wall finiteness obstruction 41

Chapter 2. $K_1$ of Rings 59
   1. Defining $K_1$ 59
   2. $K_1$ of division rings and local rings 62
   3. $K_1$ of PIDs and Dedekind domains 74
   4. Whitehead groups and Whitehead torsion 83
   5. Relative $K_1$ and the exact sequence 92

Chapter 3. $K_0$ and $K_1$ of Categories, Negative $K$-Theory 108
   1. $K_0$ and $K_1$ of categories, $G_0$ and $G_1$ of rings 108
   2. The Grothendieck and Bass-Heller-Swan Theorems 132
   3. Negative $K$-theory 153

Chapter 4. Milnor's $K_2$ 162
   1. Universal central extensions and $H_2$ 162
      Universal central extensions 163
      Homology of groups 168
   2. The Steinberg group 187
   3. Milnor's $K_2$ 199
   4. Applications of $K_2$ 218
      Computing certain relative $K_1$ groups 218
      $K_2$ of fields and number theory 221
      Almost commuting operators 237
      Pseudo-isotopy 240
Chapter 5. The +-Construction and Quillen

*K-Theory* 245

1. An introduction to classifying spaces 245
2. Quillen's +-construction and its basic properties 265
3. A survey of higher *K*-theory 279
   Products 279
   *K*-theory of fields and of rings of integers 281
   The *Q*-construction and results proved with it 289
   Applications 295

Chapter 6. Cyclic homology and its relation to

*K-Theory* 302

1. Basics of cyclic homology 302
   Hochschild homology 302
   Cyclic homology 306
   Connections with "non-commutative de Rham theory" 325

2. The Chern character 331
   The classical Chern character 332
   The Chern character on *K*₀ 335
   The Chern character on higher *K*-theory 340

3. Some applications 350
   Non-vanishing of class groups and Whitehead groups 350
   Idempotents in C*-algebras 355
   Group rings and assembly maps 362
