Contents

Part I  Growth of Crystalline Silicon Carbide

Crystalline SiC on Si and High Temperature Operational Devices
By H. Matsunami (With 7 Figures) .............................................. 2

Heteroepitaxial Growth of Cubic SiC on a Si Substrate Using the Si$_2$H$_6$–
C$_2$H$_2$–H$_2$ System
By S. Nishino and J. Saraie (With 6 Figures) ...................... 8

Chemical Vapor Deposition of Single Crystal β-SiC
By J.A. Powell and L.G. Matus (With 4 Figures) ................. 14

β-Silicon Carbide Prepared by Rapid Thermal Chemical Vapor Deposition
By J.C. Liao, J.L. Crowley, and P.H. Klein (With 4 Figures) ...... 20

Single Crystal Growth of 6H-SiC by a Vacuum Sublimation Method, and
Blue LEDs
By T. Nakata, K. Koga, Y. Matsushita, Y. Ueda, and T. Niina
(With 17 Figures) .......................................................... 26

Polytype Change of Silicon Carbide at High Temperatures
By W.S. Yoo, S. Nishino, and H. Matsunami (With 3 Figures) ...... 35

Epitaxial Growth of (SiC)$_x$Ge$_{1-x}$ on Silicon Substrates
By M.G. Spencer, G.L. Harris, S.L. Richardson, M.F. Mahmood,
and A.M. Jones (With 1 Figure) ........................................... 40

One-Dimensional Fluid Mechanics/Kinetics Modeling of the CVD of SiC
in a Vertical Reactor
By M.E. Aluko and C. Mbeledogu ........................................... 42

Part II  Growth of Amorphous, Microcrystalline, and
Polycrystalline Silicon Carbide

Properties of a-SiC:H Films Prepared with a Field-Enhanced RF Glow-
Discharge System
(With 4 Figures) .......................................................... 44

Photoluminescence Imaging of Spatial Distribution of Recombination Centers in Cubic SiC
By S.G. Bishop, J.A. Freitas, Jr., P.E.R. Nordquist, Jr., and M.L. Gipe
(With 3 Figures) ......................................................... 112

Stress-Induced Defects vs Growth Faults in CVD-Grown SiC
By J. Yang, P. Pirouz, and J.A. Powell ................................ 118

Crystalline Defects in $\beta$-SiC as Revealed by a NaOH-KOH Eutectic Etch
By P.E.R. Nordquist, Jr., H. Lessoff, R.J. Gorman, and M.L. Gipe
(With 6 Figures) ......................................................... 119

Ellipsometric Study of Cubic SiC
By S.A. Alterovitz, N.S. Shoemaker, and J.A. Powell ............ 125

Photoluminescence and Transmission Electron Microscopy of Defects in SiC Grown on Si
By W.J. Choyke, J.A. Powell, T.T. Cheng, and P. Pirouz ........... 126

Vibrational and Electrical Properties of n and p Doped a-SiC:H Films

Part IV
Growth and Applications of Diamond Thin Films

Current Status of Diamond Thin Films
By M.N. Yoder .......................................................... 130

New Material and Device Design Considerations for High-Power Electronics
By K. Shenai, R.S. Scott, and B.J. Baliga ............................ 135

Active and Passive Electronic Applications of CVD Diamond Films
By K.V. Ravi, M. Landstrass, and J. Herb ............................ 143

Part V
Surfaces and Interfaces of Silicon Carbide

Surface and Interface Studies of SiC(Buffer-Layer)/Si(100)
By M. Iwami, M. Hirai, M. Kusaka, H. Nakamura, T. Koshikawa,
K. Shibahara, H. Matsunami, and Y. Yokota (With 6 Figures) .... 146

The Influence of Hydrogen on the Transition from Amorphous to Crystalline Structure in Plasma Deposition of Silicon and Alloys
By Chuang Chuang Tsai ................................................ 152

Microstructure of the a-Si$_{1-x}$C$_x$:H/c-Si Interface
By T. Asano, D. Sugianto, K. Tran, M.M. Rahman, C.Y. Yang,
and F.A. Ponce (With 2 Figures) .................................... 153
Atomic Layer Control in Cubic SiC Growth Utilizing Surface Superstructure in Gas Source MBE
By H. Matsunami, M. Nakayama, T. Yoshinobu, H. Shiomi, and T. Fuyuki
(With 7 Figures) ................................. 157

On the Stability of a Cr + C Phase on (100) 3C SiC at Elevated Temperatures
By J.J. Bellina, Jr. ................................. 162

Part VI  Processing and Device Applications of Silicon Carbide

Physics and Applications of Amorphous Silicon Carbide
By Y. Hamakawa (With 6 Figures) .................. 164

β-SiC on Titanium Carbide for Solid State Devices
By J.D. Parsons, G.B. Kruaval, and J.A. Vigil (With 12 Figures) ....... 171

Fabrication of MOSFETs on β-SiC Single Crystalline Layers Grown on Si(100) Substrates
By H. Fuma, A. Miura, H. Tadano, S. Sugiyama, and M. Takigawa
(With 6 Figures) .................................. 178

A High Transconductance β-SiC Buried-Gate Junction Field Effect Transistor
By G. Kelmer, M. Shur, S. Binari, K. Sefler, and H. Kong
(With 5 Figures) ................................. 184

SiC as a Potential FET Gate Insulator
By R.J. Soukup and J.R. Sullivan (With 8 Figures) .................. 191

Applications of High Purity SiC Prepared by Chemical Vapor Deposition
By Y. Chinone, S. Ezaki, F. Fujita, and K. Matsumoto (With 12 Figures) 198

SiC/Si HBT Using Polycrystalline SiC Layers Prepared by Electron Beam Evaporation
By K. Kamimura, Y. Nishibe, and Y. Onuma (With 5 Figures) ......... 207

Thin Film Transistors Using Polycrystalline SiC
By Y. Onuma, S. Miyashita, Y. Nishibe, K. Kamimura, and K. Tezuka
(With 8 Figures) .................................. 212

Mechanisms in Reactive Ion Etching of Silicon Carbide Thin Films
By W.-S. Pan and A.J. Steckl (With 6 Figures) .................. 217

W/SiC Contact Resistance at Elevated Temperatures
By K.M. Geib, J.E. Mahan, and C.W. Wilmsen (With 2 Figures) ....... 224

Application of Excimer Laser Processing in SiC Device Fabrication
By S.Y. Chou, Y. Chang, T.W. Sigmon, and J.D. Parsons ................ 229
