U.R.S.I. INTERNATIONAL SYMPOSIUM on ELECTROMAGNETIC THEORY

August 25–29, 1986
Budapest, Hungary

PART B

AKADÉMIAI KIADÓ, BUDAPEST
PART B

August 27, Wednesday - morning

SECTION U1: Field Analysis and Numerical Methods
Session: Waveguides II  Chairman: V. Tysl

FIKIORIS, J.G., TSALAMENGAS, J.L.: Exact and strongly convergent field expansions in rectangularly shielded cylindrical and microstrip conductors 355

HERNÁNDEZ, J.F., TABUYO, J.M., PÉREZ, J.: Experimental and theoretical coupling between a fin-line and a shielded cylindrical dielectric resonator 358

BEYER, A., KÖTHER, D.: Calculation of discontinuities in unilateral finlines 361

REBOLLAR, J.M., PAGE, J.E.: On the limitations of equivalent circuits for waveguide discontinuities 364

JOSEFSSON, L.: Analysis of longitudinal slots in rectangular waveguides including the effect of wall thickness 367

SECTION U2: Scattering and Diffraction
Session: Scattering problems III  Chairman: J. Bach Andersen

MITTRA, R. /Invited Paper/: Some recent developments on iterative techniques for solving electromagnetic scattering problems 370

TATEIBA, M.: A new approach to the problem of wave scattering by many particles 374

RUCKER, W.M., RICHTER, K.R.: The numerical solution of multiple scattering problems using the boundary element method 377

OKUNO, Y.: A numerical method for solving edge-type scattering problems 378

RITT, R.K.: Numerical determination of surface fields at an interior resonance 381
SECTION U3: Antennas
Session: Coated structures and impedance surfaces
Chairman: B. Popovic

HADIDI, A., HAMID, M.: Eigenvalues of a dielectric-coated conducting cone 384

ARVAS, E., SARKAR, T.K.: Analysis of two-dimensional lossy radomes of arbitrary cross section 387

UNO, T., ADACHI, S., SAWAYA, K.: Three dimensional computational analysis of radomes 390

GALKA, M., EDENHOFER, P.: A novel concept of sandwich-loaded dipole grid for reflector antennas in satellite communications 393

ANDO, M., KAGOSHIMA, K., KONDO, A.: Calculation of scattering by a grid reflector 396

SECTION U4: Guided Waves /Posters/
Session: Wave propagation

CHILO, J., RAZBAN-HAGHIGHI, T.: CAD formulas for crosstalk analysis of GaAs IC’s 399

MAGOS, A.: Propagation coefficient of waveguides with inhomogeneous dielectric regarded as a function of the complex frequency 402

MEYEROVA, R.S., POPOV, A.V., HOZIOSKY, S.A.: Low order modes transformation in smooth waveguide couplings 405

SECTION U4: Guided Waves /Posters/
Session: Waveguide analysis

BÉRES, V.: A numerical method for calculating mode conversion’s scattering parameters of circular waveguide junctions 407

DJORDJEVIC, A.R., SOTIROVIC, T.H.: Influence of the conductor shape on microwave filter losses 410

JABLONSKI, T.: Iterative eigenfunction expansion method for monomode graded index fibers with arbitrary cross sections 415

LADANYI-TURÓCZY, B.: Transmission characteristics of a hyper-elliptical waveguide 418

PHAN ANH: On a compound surface-wave structure used in antenna engineering: The disk-on-helical rod structure 421

PIOTROWSKI, J.K.: Second-order solution for fin-line characteristics 424

SACHSE, K., SAWICKI, A.: Analytical modelling of MIS and Schottky contact microstrip lines 427

SHI PING: The excitation of a nonradiated H-guide by a rectangular waveguide 430

UHDE, K., OMAR, A.S.: Analysis of fin-line structures on a double layer insulator semiconductor substrate 433

ZEBROWSKI, A.: The analysis of corrugated circular waveguides 437
SECTION U4: Guided Waves /Posters/
Session: Planar structures

BAUDRAND, H., KAMAL, E., BOUSSOUIS, M., AHMADPANAH, M.:
Hybrid-mode analysis of finline and coupled stripfinline structures 439

DALY, P.: Coupled microwave transmission-line parameters using
the dual finite-element method 442

SEGUINOT, C., KENNIS, P., PRIBETICH, P., VILLOTTE, J.P., AUBOURG, M.:
M.I.S. slow-wave coplanar line: A comparison of theoretical and expe­
riental characteristics 445

TEDJINI, S., RAULY, D., SAGUET, P.: Generalized spectral domain
 technique for integrated planar circuits 447

SECTION U4: Guided Waves /Posters/
Session: Dielectric waveguide

for piezoelectric substrate with in-depth direction inhomogeneity 449

MEDINA, F., HORN, M.: Matrix capacitance determination for a
generalized multistrip line in a multilayered dielectric 451

VAHLDIECK, R., HOFER, W.J.R.: A novel groove guide coupler with
partial dielectric loading and printed tuning septum 454

YONEYAMA, T., OHSHIRO, T., HAYASHI, K.: Improved finite element
analysis of nonradiative dielectric waveguide 457

SECTION U4: Guided Waves /Posters/
Session: Anisotropic waveguide

BUSTAMANTE, E.G., ANABITARTE, E., CALDERÓN, M.A.G., VEGAS, A.,
BLANCO, J., MARCO DE LUCAS, M.C., SAIZ, E.: Electromagnetic wave
interaction with a transversely magnetized plasma waveguide 458

GERENCÉR, A., KALMAN, L., KESZÉI, B., VANDLIK, J.: Investigation
of magnetostatic wave delay lines for microwave circuits 461

HOFFMANN, R.: Tensor Green’s function properties for planar
ferrite waveguides 464

LENKEFI, Zs.: Nonreciprocal effects in multilayer structures at
millimeter wavelengths 467

KARPMAN, V.I., KAUFMAN, R.N.: Whistler wave propagation in magneto-
spheric ducts 470

KNISEVSKAYA, L., LAURINAVIČIUS, A., MALAKAUSKAS, P., POZELA, K.,
SHUGUROV, V.: Microwave propagation in transmission lines
containing gyromagnetic semiconductor material 473

KOTOV, M.N., SHUGUROV, V.: Wave dispersion of circular screened
ferrite waveguide in transverse quadrupole magnetic field 474

MITEVA, V.I., IVANOV, K.P.: Wave propagation along circular guide
containing azimuthally magnetized solid-plasma 477

MODELSKI, J.: Analysis of propagation constant of rectangular
waveguide with longitudinally magnetized ferrite rod 480

MROZOWSKI, M., MAZUR, J.: Full-wave analysis of a rectangular
waveguide containing layers of ferrite media 483

XVII
DE FARO ORLANDO, A.J., TUDE, E.A.P.: Modes in circular waveguides loaded by hollow ferrite cylinders

XU YANSHENG: Low loss high power ferrite devices

SECTION U1: Field Analysis and Numerical Methods
Session: Resonators
Chairman: T. Berceli

KOLESNIKOV, P.M., BORISEVICH, L.E.: Normal modes of annular resonators with nonhomogeneous active medium

HOEFER, W.J.R.: Accelerated spectral domain analysis of E-plane circuits suitable for computer-aided design

RAWAT, B., MILLER, R.: Simplified loss analysis of homogeneous dielectric loaded coaxial resonator with linearly tapered inner conduction

REITER, G.: Single mode coupling between cylindrical TE_{01}l resonators

BERMUDEZ, L.A., GUILLON, P.: Variational improvement for the computation of resonant frequency of dielectric resonator hybrid modes - a microcomputer implementation

SECTION U2: Scattering and Diffraction
Session: Scattering problems IV
Chairman: R. Mittra

VAN DER VEEKEN, R.W.C.: Spectral- and spatial-domain filtering approach to the numerical solution of electromagnetic scattering problems

LINDELL, I.V., NIKOSKINEN, K.: Complex space multipole theory for scattering problems

LEDINEGG, E.: General theory of electromagnetic fields scattered by objects with arbitrary shape

GUO YING JIE, MAO YUKUAN: Generalized image method and its application to scattering problems

ALANEN, E., LINDELL, I.V.: Exact image method of field calculation in layered medium using the Mittag-Leffler expansion

SECTION U3: Antennas
Session: Antenna analysis
Chairman: P. Foldes

GUPTA, G.S., NGUYEN, D.N.: On the evaluation of mutual coupling effects in a planar array

ANGELL, T.S., KLEINMAN, R.E.: Optimal radiation patterns for conformal antennas

GITEL, A., PIATOSA, M.: C.A.D. of antenna arrays and their patterns in the Fresnel's zone and in the far field

DELOGNE, P.: Coupling of antennas to a leaky coaxial cable in a tunnel
SECTION UI: Field Analysis and Numerical Methods
Session: Numerical methods I
Chairman: W.J.R. Hoefer

WEILAND, Th. /Invited Paper/: Numerical solution of Maxwell's
equation for static, resonant and transient problems

FRIDBERG, P.Sh., ROSENBLUM, A.V.: The effective method for the
calculation of the linear functionals of solutions of one class
axially symmetrical problems of electrodynamics

KUZUOGLU, M., HIZAL, A.: A new finite element solution of electro-
magnetic boundary value problems for combined closed and open regions

RÓZANSKI, L.: Numerical analysis of a class of electromagnetic fields

SECTION U2: Scattering and Diffraction
Session: Diffraction problems I
Chairman: V.V. Shevchenko

PRZEZDZIECKI, S., HURD, R.A.: Diffraction by a half-plane in a
gyrotropic medium

CIARKOWSKI, A.: Three-dimensional electromagnetic plane wave
diffraction by a perfectly conducting half-plane placed at the inter-
face of two dielectric media.- Exact and uniform asymptotic solutions

KUPCAK, D.: The uniform asymptotic expansion in the problem of
half-plane diffraction

KUDREWICZ, H.: Plane wave diffraction by an impedance half-plane.
Analysis of the dependence on the impedance parameter

SECTION U4: Guided Waves
Session: Anisotropic waveguides
Chairman: K. Schünemann

AKSENOV, V.: Nonabudent equation system for three-dimensional
ray-tracing in spherically stratified magneto-active plasma

SCHWELB, O.: Design analysis of anisotropic thin film multilayers

JANICZAK, B.J.: Comparative study of the transmission property of
planar microstrip structures containing lossy gyromagnetic layer

SUCHY, K.: Geometric optical methods for mode conversion in
anisotropic media

SECTION UI: Field Analysis and Numerical Methods
Session: Numerical methods II
Chairman: Th. Weiland

GRAGLIA, R.D.: A new technique for the efficient evaluation of self-
term contributions to the moment matrix for uniform and linear source
distributions on polygonal and polyhedral domains

LINDELL, I.V., NIKOSKINEN, K., ALANEN, E., MANNERSALO, K.: Moment
iteration method /MIM/ for electromagnetic problems involving large bodies

GWAREK, W.K.: Two-dimensional circuits analysis by wave simulation

BÁRD, I., IVÁNYI, A., GYIMESI, M.: Modelling negative corona dis-
charge by digital computer
SECTION U2: Scattering and Diffraction
Session: Diffraction problems II
Chairman: Z.H. Czyz

BERNTSEN, S.: Diffraction of an electromagnetic wave by a dielectric circular cone

CHAPLIN, A.F.: The addition method in the problems of diffraction for finite objects

KOBAYASHI, K.: Diffraction of a plane electromagnetic wave by a thick strip grating

SECTION U4: Guided Waves
Session: Dielectric waveguides
Chairman: R. Pregla

TOPUZ, E., FELSEN, L.B.: High frequency pulse propagation in a tapered dielectric waveguide

VESZELY, Gy.: The far-field method to calculate the power loss of weakly guiding fibres

YASUMOTO, K., MURAYAMA, M.: A rigorous analysis of a thin-film dielectric waveguide with a sinusoidal surface corrugation

SOWINSKI, M.: Guided modes of doublecore dielectric waveguides

August 28, Thursday—morning

SECTION U1: Field Analysis and Numerical Methods
Session: General theorems
Chairman: V. Aksenov

CHAMBERS, L.G.: Analysis of arbitrarily time-dependent vector Kirchhoff equations

HAN-GUANG SHAO, WEN-XIN ZHENG: A proving method of symmetries of magnetic dyadic Green's function

WEIGLHOFER, W., PAPOUSEK, W.: Scalar Hertz potentials and dyadic Green's functions for gyrotropic media

BIRÓ, O.: The use of a two-component vector potential in the numerical analysis of 3D electromagnetic fields

KUESTER, E.F., CHANG, D.C.: A unified approach to bivariational principles in electromagnetics and its application for open waveguide discontinuity problems

SECTION U2: Scattering and Diffraction
Session: Scattering problems V
Chairman: G. Fodor

TAMIR, T.: Non-specular phenomena in beam fields reflected by stratified media

ANSORGE, H.: Wave propagation in the presence of a curved dielectric interface with emphasis on polarization properties
CZYZ, Z.H.: On some properties of the bistatic power scattering matrix for the stabile object in its characteristic orthogonal polarisation basis 628

SENGÖR, T.: The influence of origin configuration on high-frequency surface currents 631

BJÖRKBERG, J., KRISTENSSON, G.: E-M scattering by a perfectly conducting elliptic disk with applications to geophysical prospecting 633

SECTION U3: Antennas
Session: Reflector antennas Chairman: M. Kummer

FÖLDES, P.: Antenna designs for small satellite communication earth stations 636

BROWN, R.C., CLARRICOATS, P.J.B., HAI ZHOU: Synthesis of shaped-beams using optimisation 640

RAHMAT-SAMII, Y.: Jacobi-Bessel analysis of reflector antennas with elliptical apertures 642

MAO YUKUAN, SI KO: A new design for high efficient medium and small size reflector antenna 649

SECTION U2: Scattering and Diffraction
Session: Scattering problems VI Chairman: A.B. Shabelnikov

SENIOR, T.B.A., BURNS, J.W.: The backscattered field of a thin wire loop for H polarization 650

SHIMODA, M., ITAKURA, T.: Scattering by finite parallel plates 652

BUTLER, Ch.M.: Scattering of transverse magnetic illumination by a narrow conducting strip located at the interface between two semi-infinite half spaces 655

KRZYSZTOFIK, W.J.: Scattering properties of thin-wire with load 658

MIHÁLY, S., BOZSÓKI, I.: An X-band scatterometer 661

SECTION U3: Antennas
Session: Wire antennas Chairman: D.J. Bem

DOHNAT, T., MACPHIE, R.H.: The effect of gap width on the impedance of dipole antennas 664

KARWOWSKI, A., MICHALSKI, K.A.: A comparative numerical study of several techniques for modelling a horizontal wire antenna over a lossy half-space 666

KOLUNDZIJA, B.M., POPOVIC, B.D.: Analysis and synthesis of a class of broadband symmetrical planar antennas 669

LEAL, R.P., CÁTEDRA, F.: Analysis of wire antennas attached to conductor bodies of revolution 672
SECTION U5: Transient Phenomena

Chairman: J. Detlefsen

WALKOWIAK, M.: Time in transient electromagnetic phenomena 675
KARBOWIAK, A.E.: Transient propagation in non-uniform coaxial cables 678
EHRICH, M.: Transient shielding of a conducting strip 679
KAJFEZ, D., LAZAREVSKI, S.: Transients on transmission lines terminated in lumped impedances 683
DRAGOMAN, M., SAJIN, G.: A time domain technique for transient radiation of arbitrarily shaped microstrip antennas 686

August 28, Thursday - afternoon

SECTION U3: Antennas /Posters/

a/ Aperture antennas

SZEKERES, B., LENÁRT, F., PETRE, P.: Comparison of Monte Carlo and quadrature methods for numerical evaluation of two dimensional phase integrals 691
RIES, G.: Effects of subreflector tolerances in Cassegrain antennas 693
YAZGAN, E.: Radiation pattern of a rim loaded ellipsoidal antenna 696
PINO, A.G., CALVO, M., MONTESSANO, C.E.: Deterministic distortion analysis for satellite reflector antennas 699
BOROVIKOV, V.A., KINBER, B.Ye.: The comparative estimation of various methods of evaluation of side radiation from reflector antennas and nonuniform incident field 702
BOROVIKOV, V.A.: Asymptotic theory of diffraction by the open end of flanged waveguide and junction waveguide-horn /the survey/ 704
ZIOLKOWSKI, R.W.: New electromagnetic effects associated with cavity-backed apertures 707
BROWN, R.C., BERGMANN, J., CLARRICOATS, P.J.B.: Synthesis of reflector antenna radiation patterns 710

SECTION U3: Antennas /Posters/
b/ Horn antennas and feeds

PITKÄÄHO, R.: How to calculate characteristics of circular polarized feed assembly 712
VISHVAKARMA, B.R., THANNOON, W.A.: A new double beam scanning antenna 715
BIELLI, P., MASSAGLIA, P., SAVINI, D., KLOOSTER, K.V.T.: Coaxial horns with corrugated flange 718
SHUMLJANSKY, I.I.: Horn radiation with curve formers 721
SCHNIZER, B., PASCHER, W., WÖHLLEBEN, R.: Theoretical and experimental investigation of a torus as a primary feed in reflector antennas 722
SAWAYA, K., ADACHI, S.: Analysis of a cut-off waveguide aperture antenna with a Faraday shield for ICRF plasma heating

CÁTEDRA, M.F., CALVO, M., BESADA, J.L.: Analysis and optimization of primary feeds with symmetry of revolution using moment method, mode matching and uniqueness theorem

ARNOLD, J.M., DENDANE, A.: Theory of wave propagation in conical horns with anisotropic impedance walls

SECTION U3: Antennas /Posters/ 
c/ Microstrip and millimeter wave antennas

MOSIG, J.R., ROUDOT, B., GARDIOL, F.: An integral equation technique to study coupling between adjacent patch antennas

BEYER, A.: Radiation properties of millimetre-wave antennas in finline technique

KOU TING-YIAO, WU HAI-QING, YANG QI-JI: An accurate analysis of slot antenna fed by a stripline waveguide

BABITS, L., VADÁSZ, F.: Development of aerials for frequencies above 18 GHz

VEGNI, L., CICCHETTI, R.: The radar cross section of rectangular MIC-antennas

DAHELE, J.S., TUNG, H., LEE, K.F.: Broadband electromagnetic-coupled microstrip antenna

LEE, K.F., LUK, K.M., DAHELE, J.S.: On the triangular patch antenna

MALKOMES, M., GRANATKE, H.: Circular polarized microstrip antennas and arrays for millimeter wave applications

NAUWELAERS, B., VAN DE CAPELLE, A., WISLEZ, B., SHE, T.: A broadband square microstrip antenna

DEWACHTERE, J., VAN DE CAPELLE, A.: Improved desegmentation method for the analysis of microstrip antennas

SECTION U3: Antennas /Posters/ 
d/ Antennas in plasma media

ANDRUSHKO, L.M., KARPILYUK, K.S., ORAEVSKY, V.N., PANFILOV, I.P.: The input conductance of the ring aperture antenna in cold homogeneous magnetoplasma

GORBUNOV, S.A., POTAPAeva, T.L., REZNIKOV, A.E.: The influence of non-linear effects upon current antenna radiation in magnetically active plasma

KARPMAN, V.I.: The near zone of an antenna in a magnetized plasma

SECTION U3: Antennas /Posters/ 
e/ Antenna measurements and experimental techniques

D'ELIA, G., LEONE, G., PIERRI, R.: Far field reconstruction from only modulus near field data

CARPITA, F., DE VINCENTI, P., MANONI, G.: Inter-antenna coupling evaluation for Olympus satellite: Theoretical and experimental activities 773

SECTION U3: Antennas /Posters/ f/ Miscellaneous topics

PAVLYUK, V.A., KRIVOSHEEV, E.F.: Cryogenic elementary antennas 775

WIECKOWSKI, T.W.: Active loop antennas functioning as probes for the electromagnetic field 776

BALABANOV, B., NESHEV, N., ALEXANDROVA, E.: Improvement of the electromagnetic compatibility of satellite communication systems by means of satellite antenna beam optimization 779

RAHMAN, F.: Performance evaluation of spacecraft antennas from gain contours 780

KAWAKAMI, H., SATO, G.: Characteristics of a hybrid technique analysis for half-wave dipole antennas near the circular cylinder 783

DAS GUPTA, Ch.: Ferroelectric antenna for mobile communication system 784

SECTION U2: Scattering and Diffraction
Session: Scattering problems VII Chairman: Sz. Markó

NAVASQUILLO, J., SUCH, V.: Reflection and refraction of bounded electromagnetic beams at a dielectric interface 787

SHABELNIKOV, A.V.: The influence of the atmosphere inhomogeneous in three dimensions on the refraction of electromagnetic waves 790

BRUNET, R.M., POPOP, A.V.: Ray structure of the focal spots of round-the-world radio propagation 793

RAHNAVARD, M.H., HABIBZADEH, A.: Millimeter wave attenuation through and reflection coefficient from moving strip illuminated semiconductor panel 795

XU, J.D., CHEN, G.R.: Scattering of periodic structure with arbitrary cross-section 798

SECTION U4: Guided waves
Session: Waveguide analysis Chairman: L.B. Felsen

KUMMER, M., OSWALD, H.: Characteristic impedance of coaxial lines with non-circular cylindrical inner conductor 801

VÁGÓ, I., BÁLDI, I.: Hybrid-mode analysis of inhomogeneously loaded waveguides by finite element method 804

SENSIPER, S.: The use of rational function coefficients in the transmission line equation 807

LYAPIN, V.P., HINKEN, J.H.: Rigorous analysis of the antipodal fin-line with extremely thin isolating layer 810

KLEEV, A.I., MANENKOV, A.B.: Adaptive collocation method 813
