Table of Contents

Foreword...........................................................................................................v
Preface........................................................................................................... vii
Program and Organizing Committees, Sponsorship..................................... xiii

Session 1  Models and Designs

Chair: Pietro Schicker

Flexible and Efficient Implementations of Communication
Protocols........................................................................................................ 3
M. Feldhoffer, B. Fröhlich

Generation of Distributed Services with Diogenes................................. 15
M. Mock, A. Müller

A Remote Operations System Tailored to Application
Requirements............................................................................................... 33
I. Chrisment, C. Huijema

Session 2  Security I

Chair: Graham Knight

Performance of the Star-based and Ring-based Conference
Authentication Facilities................................................................................. 51
A. Goscinski, D. De Paoli

Kuperee: An Approach to Authentication using Public Keys................. 65
T. Hardjono, Y. Zheng, J. Seberry

Secure Remote Management in the ESPRIT MIDAS Project............. 77
G. Knight, S. Bhatti, L. Deri

Session 3  Security II

Chair: Hannes Lubich

A Step Ahead in the Directory Authentication Framework..................... 89
F. Jordan, M. Medina, J. Cruellas, I. Gallego

Towards Trustworthy Communication Systems - Experiences
with the Security Toolkit SecuDE................................................................. 107
R. Grimm, J. Lühe, W. Schneider

Private Communication Groups in Packet-Switched Networks............. 121
M. Gupta, D. Verma, M. Gopal
Session 4  Programming Environments and Tools

Chair: J.A. Saras

Automatic Generation of Optimized Code for Marshalling Routines..........................................................135
P. Hoschka, C. Huitema

Programming with ASN.1 Using Polymorphic Types and Type Specialization.............................................151
G. Lavender, D. Kafura, R. Mullins

The ADAPTIVE Service Executive: An Object-Oriented Architecture for Configuring Concurrent Distributed Communication Systems.........................................................167
D. Schmidt, T. Suda

A Semi-Automatic Implementation of ISO Virtual Terminal Protocol ..........................................................183
M. Wong, R. Lai

Session 5  Interconnection and Interoperation

Chair: Richard Carr

Design and Implementation of Personal Computer based OSI Remote Database Access (RDA) Client System ........199
H. Horiiuchi, K. Sugiyama, S. Obana, K. Suzuki

Design of a distributed document system based on ODA: DODS .................................................................215
J. Acebron, J. Delgado

FODATEC: An Open Document Manipulation System ........227
J. Delgado, F. Jordan, X. Pernamon

Session 6  Group Communications

Chair: Encarna Pastor

MPPS - A Multiparty Presentation Service .........................243
U. Schäffler

A Small Conferencing System and Shared Whiteboard as a Testbed for Distributed Multimedia Applications Using OSI Protocols .................................................................257
H. Lubich

Audio support for synchronous Cooperative Work ............269
C. Burkhardt, H. Lubich

Session 7  Invited Talk

To Tunnel or Translate, That is the Question ..................285
F. Stefferud, J. Pliskin
Session 8  Directory Services and Applications

Chair: Erik Huizer

Multi Media Product Selector Using X.500 Directory Service ..........299
A. Al-Sonti, M. O'Brien

Network Management with X.500 distributed services ...............313
D. Seret, X. Zhang

Using Cache Partitioning in X.500 for Faster Name Resolution in X.400 .................................................................327
H. Afifi, J. Bolot

Support for Transactions and Replication in the EAN Directory Service .................................................................341
G. Neufeld, B. Brachman

Session 9  New Directions

Chair: Christian Huitema

A Naming Model for Distributed Group Communication ..........357
S. Benford, O. Lee

Configuring Function-based Communication Protocols for Multimedia Applications .........................................................371
D. Schmidt, B. Stiller, T. Suda, M. Zitterbart

EMail With A Mind of Its Own: The Safe-Tel Language for Enabled Mail .................................................................389
N. Borenstein
Session 10  Results from the Workshop Discussions

Chair: Einar Stefferud

Application Object Exchange Format ........................................... 405
Chairs: Greg Lavender and Douglas C. Schmidt
Report: Greg Lavender and Douglas C. Schmidt

Electronic Mail Gatewaying versus Tunnelling ........................... 407
Chair: Hannes P. Lubich
Report: Hannes P. Lubich

Enabled Mail .................................................................................. 411
Chair: Nathaniel Borenstein
Report: Nathaniel Borenstein

Security ......................................................................................... 413
Chair: Rüdiger Grimm
Report: Alnoor M. Shivji

Author Index ................................................................................... 417

List of Reviewers ........................................................................... 419

List of Session Chairs .................................................................... 421
