CONTENTS

Preface ix

Introduction: Choosing an Experiment xiii

AN IMPORTANT NOTE TO THE READER xviii

Chapter 1: EQUIPMENT, SAFETY, AND DISPOSAL 1

Equipment and Supplies 1

Safety 8

Disposal of Chemicals 10

Chapter 2: LIGHT SCATTERING FROM DISORDERED SYSTEMS 13

Experiment 2-1: The Tyndall Effect 25

2-2: Dew Point Temperature and Cloud Formation 28

2-3: Spatial Distribution and Polarization of Scattered Light 32

2-4: Aggregation of Latex Microspheres 35

2-5: Emulsions and Microemulsions 40

2-6: Dynamics of the Gel-Formation Process 45

2-7: The Isoelectric Point of Gelatin 50

2-8: Scattering of Light by Optically Active Colloids 55

2-9: Rate of Vesicle Aggregation 62

2-10: Light Scattering and Particle Size 68

Chapter 3: DIFFRACTION: LIGHT SCATTERING FROM ORDERED SYSTEMS 75

Experiment 3-1: Diffraction from a Vernier Caliper 86

3-2: Optical Transforms 91

3-3: Diffraction from a Two-Dimensional Crystal 97

3-4: Kossel Ring Diffraction Patterns from a Colloidal Crystal 100

Chapter 4: REFRACTION OF LIGHT 111

Experiment 4-1: Column Chromatography with a Laser-Based Refractive Index
Detection System 115

4-2: Extraction and Purification of Limonene 122

4-3: Synthesis and Purification of Oil of Wintergreen 124

4-4: Kinetics of the Acid-Catalyzed Conversion of Glycidol to Glycerol 128

Appendix 4-4-A1: Refractive Index of the Reaction Mixture as a Function of the Extent
of Reaction 138

4-4-A2: Beam Displacement as a Function of Refractive Index 140

4-4-A3: Dependence of the Rate Constants on Acid Concentration 142

Chapter 5: THE ELECTRONIC STRUCTURE OF MATTER 143

- Experiment 5-1: Extraction of Chlorophyll from Fresh Spinach 158
5-2: Fluorescence vs. Concentration 162
5-3: Fluorescence Quenching 165
5-4: Fluorescence Depolarization 169
5-5: Magnetic Susceptibility Measurements 173
-

Chapter 6: PHOTOCHEMISTRY 179

- Experiment 6-1: Photobleaching of Methylene Blue 183
6-2: Photoisomerization of Dimethylmaleate 186
6-3: Photoinduced Polymerization of Acrylamide 190
6-4: Photooxidation of Diphenylisobenzofuran 194
6-5: Photochromism of Mercury Dithizonate 199
6-6: Ruthenium-Catalyzed Photoreduction of Paraquat 203
-

Appendix: Chemical Safety 213

Index 227
