# CONTENTS

## TO THE READER

### 1 PRELIMINARIES

Steps to Take After Reading This Chapter 3  
How to Use This Book 3  
The Impact of Research 5  
Planning and Control 6  
The Research Process 8  
Research Ethics 9  
Ethical Practices 10  
The Research Proposal 14  
PERT/CPM 17  
Where You Are Now 20

## 2 DETERMINE THE VARIABLES AND OPERATIONAL DEFINITIONS

Steps to Take After Reading This Chapter 23  
How Research Problems Originate 23  
The Decision to Conduct Research 25  
Research Problems 26  
Identify and Label the Variables 27  
Types of Variables 28  
Determine and State the Operational Definitions 34  
Where You Are Now 36

## 3 DETERMINE THE RESEARCH QUESTIONS OR HYPOTHESES

Steps to Take After Reading This Chapter 39  
State the Expected Relationship Between Variables 39  
Decide Whether to Use Hypothesis Testing or Research Questions 42  
Hypothesis Testing 42  
If You Use a Population 44  
State the Preliminary Hypothesis or Research Question 45  
Where You Are Now 48
4 HYPOTHESIS TESTING

Steps to Take After Reading This Chapter 51
Research Hypotheses 51
Null Hypotheses 53
Directional and Nondirectional Hypotheses 53
Decide Whether to State Directional or
  Nondirectional Hypotheses 54
Select the Significance Level 55
Statistical and Practical Significance 62
Where You Are Now 64

5 LEVELS OF MEASUREMENT, VALIDITY AND RELIABILITY

Steps to Take After Reading This Chapter 67
Levels of Measurement 67
Validity and Reliability 74
Validity Estimates 78
Reliability Estimates 83
Where You Are Now 90

6 REVIEW THE RELATED INFORMATION

Steps to Take After Reading This Chapter 93
List the Variables, Population and Theories 94
Determine Sources of Desired Information 96
Determine the Location of the Information 97
Determine How to Retrieve the Information 97
Conduct the Review of Information Available 103
Read the Literature 103
Record the Information 104
Synthesize the Information and Determine the Next Steps 104
Where You Are Now 106
7 DETERMINE THE SAMPLING METHOD AND PROCEDURES

Steps to Take After Reading This Chapter
Define the Population
Determine the Sampling Unit
Determine the Sampling Frame
Determine the Sampling Method
Random Sampling Methods
Nonrandom Sampling Methods
Cluster Sampling
Concepts Related to Sample Size
Determine the Sample Size
List the Sampling Procedures
Where You Are Now

8 SELECT THE RESEARCH DESIGN

Steps to Take After Reading This Chapter
Selecting the Type of Research Design
Experimental Design
Control Mechanisms
Internal and External Validity of Experimental Designs
True Experimental Designs
Extensions of the True Experimental Designs
Quasi-Experimental Designs
Nonexperimental Designs
Historical Designs
Where You Are Now

9 DETERMINE THE DATA COLLECTION METHODS

Steps to Take After Reading This Chapter
The Interviewing Method
Instrument Administration
Observation
Examination of Documents, Materials and Artifacts
Unobtrusive Measures
Where You Are Now
10 DETERMINE THE INSTRUMENTS TO MEASURE THE VARIABLES

Steps to Take After Reading This Chapter 177
Instruments 177
Select or Design an Instrument 180
Selecting an Existing Instrument 180
Designing an Instrument 182
General Categories of Instruments 183
Performance Measures 183
Measures of Attitudes, Opinions, Beliefs and Values 185
Measures of Interests, Intelligence and Personality 186
Demographic Measures 187
Where You Are Now 188

11 DESIGNING QUESTIONNAIRES OR INTERVIEW SCHEDULES

Steps to Take After Reading This Chapter 191
Reminders 192
List the Variables 192
Consider Demographic Variables 192
Specify the Characteristics of the Respondents 193
Select Mail, Telephone or Personal Approach 193
Increasing Response Rates of Mailed Questionnaires 193
Determine the Amount of Structure 197
Determine the Response Format 197
Multiple-Choice Responses 200
Dichotomous Response Format 201
Open-Ended Response Format 202
Write the Items 204
Check the Items for Invalidating Factors 204
Write the Introduction and Ending 204
Determine Placement of the Items 206
Complete the Questionnaire Preparation 206
Train the Questionnaire Administrator or Interviewer 207
Conduct a Pilot Test 211
Where You Are Now 213
12 OTHER TYPES OF INSTRUMENTS

Steps to Take After Reading This Chapter 217
Independent and Nonindependent Responses 217
Rating Scales 224
Summated Rating (Likert-Type) Scales 227
Thurstone Equal Appearing Interval Scale 229
The Semantic Differential 230
The Single Anchor Scale 233
Multidimensional Scaling 233
Guttman Scalogram Analysis 235
Rank Order Methods 236
The Constant Sum Method 237
The Q Technique 238
Paired Comparison Method 239
Checklists 241
The Delphi Method 242
Projective Techniques 244
Content Analysis 246
Observation Instruments 247
Instruments for Existing Documents, Materials and Artifacts 250
Where You Are Now 252

13 SELECT THE STATISTICAL TEST

Steps to Take After Reading This Chapter 255
Descriptive and Inferential Statistics 260
Statistics and Parameters 260
Parametric and Nonparametric Tests 261
The Normal Distribution 262
The Critical Value 265
Degrees of Freedom 265
Determine the Statistical Purpose 267
Significance of Group Differences 267
Degree of Association Among Variables 267
Select the Statistical Procedure 269
The Chi-square Test of Independence 270
t-Test for Two Independent Groups 276
Analysis of Variance 280
The Scheffe Test after an ANOVA 286
Bivariate Regression: The Pearson Product-moment Correlation 289
Prediction: The Regression Coefficient 294
Where You Are Now 297
14 MULTIVARIATE TECHNIQUES
by James T. Brakefield

Steps to Take After Reading This Chapter 301
Two-Way Analysis of Variance 302
Multiple Regression 308
Other Multivariate Techniques 314
Where You Are Now 319

15 DATA HANDLING AND REDUCTION

Steps to Take After Reading This Chapter 323
Preparation for Data Handling 323
Plan for Editing the Data 325
Plan for Data Reduction and Summaries 329
Frequency Distributions 329
Measures of Central Tendency 331
Measures of Variability 334
Contingency Tables and Cross Tabulations 337
Using a Computer 339
Where You Are Now 343

Steps to Take After Reading This Chapter 347
Conduct the Pilot Study 348
How to Conduct a Pilot Study 348
Complete the Proposal 350
Submit the Proposal to the Sponsor 351
Conduct the Research 352
Write the Research Report 353
Sections Which Are Included in Most Research Reports 354
Suggestions for Writing the Report 356
Graphs and Charts 357
Personal Presentation of the Research Report 365
Post Research Blues 366
Where You Are Now 366
APPENDICES

A GLOSSARY OF DEFINITIONS 369

B GLOSSARY OF ABBREVIATIONS AND SYMBOLS 391

C THE GREEK ALPHABET 397

D STATISTICAL TABLES 399

D.1 Random Numbers 399
D.2 Probabilities Associated with Values of z in the Normal Distribution 400
D.3 Critical Values of Chi-square 401
D.4 Critical Values of t 402
D.5 Critical Values of F 403
D.6 Critical Values of the Correlation Coefficient, r 408

E CHECKLIST FOR THE RESEARCH PROPOSAL 409

REFERENCES: INDEX OF RECOMMENDED AND CITED SOURCES 415
