## 1 The bulk phases of matter  
 1.1 Gases, liquids and solids  
 1.2 Liquid crystals  
 1.3 Phase changes  
 1.4 Thermodynamic equilibrium  
 1.5 Phase rule

## 2 Monolayers: two-dimensional phases  
 2.1 The gas–liquid interface  
 2.2 Monolayer materials  
 2.3 Monolayer stability  
 2.4 Monolayer phases  
 2.5 Monolayer compressibility and viscosity  
 2.6 Electrical effects in monolayers  
 2.7 Mixed monolayers  
 2.8 Chemistry in monolayers

3 Film deposition
   3.1 Deposition principles  39
   3.2 Deposition speed  39
   3.3 Molecular re-arrangement  43
   3.4 First layer effects and epitaxy  43
   3.5 Defects  45
   3.6 Deposition onto rough or porous surfaces  47
   3.7 Equipment for LB deposition  48
   3.8 Experimental techniques  49
   3.9 Post deposition treatments  55
   3.10 Related thin film deposition techniques  58

4 Monolayer materials  63
   4.1 Fatty acids and related compounds  65
   4.2 Simple substituted aromatic compounds  65
   4.3 Dyes  69
   4.4 Porphyrins and phthalocyanines  73
   4.5 Fullerenes  75
   4.6 Charge-transfer complexes  76
   4.7 Polymers  77
   4.8 Biological compounds  83

References  91

5 Structure of multilayer films  95
   5.1 Organization in long-chain materials  94
   5.2 X-ray reflection  98
   5.3 Neutron reflection  104
   5.4 Electron microscopy  106
   5.5 Infrared spectroscopy  112
   5.6 Scanning tunnelling and atomic force microscopies  121
   5.7 Surface analytical techniques  124
   5.8 Film thickness measurements  126
   5.9 Other methods  127

References  128

6 Electrical phenomena  131
   6.1 Basic ideas  131
   6.2 Practical considerations  134
   6.3 Quantum mechanical tunnelling  139
   6.4 Space-charge injection  141
   6.5 Schottky and Poole–Frenkel effects  143
   6.6 Dielectric processes  145

### Appendices

| A Electronic energy levels in organic solids | 197  |
| A.1 Bonding in organics                    | 197  |
| A.2 Band theory                            | 203  |
| Further reading                            | 206  |

| B Interaction of electromagnetic radiation with organic thin films | 207  |
| B.1 Electromagnetic radiation               | 207  |
| B.2 Interaction with solids                 | 208  |
| B.3 Linear optics                           | 209  |
| B.4 Nonlinear optics                        | 211  |
| B.5 Reflection and transmission from thin films | 212  |
| B.6 Absorption processes                    | 216  |
| B.7 Emission processes                      | 220  |
| Further reading                             | 221  |

| C Crystallography                          | 222  |
| C.1 The crystal lattice                    | 222  |
| C.2 Crystal systems                        | 222  |
| C.3 Miller indices                         | 224  |
| C.4 Distance between crystal planes        | 225  |
| Further reading                            | 226  |
