LINEAR AND NONLINEAR SPIN WAVES IN MAGNETIC FILMS AND SUPERLATTICES

Editor
Michael G Cottam
Univ. Western Ontario
CONTENTS

Preface v

Chapter 1. Fundamentals of Linear and Nonlinear Spin-Wave Processes in Bulk and Finite Magnetic Samples 1
   M. G. Cottam and A. N. Slavin

Chapter 2. Dipole-Exchange Spin-Wave Spectrum of Magnetic Films 89
   B. A. Kalinikos

Chapter 3. Spin Waves in Multilayers 157
   J. Barnaś

Chapter 4. Spin-Wave Polaritons in Films and Multilayers 207
   D. R. Tilley

Chapter 5. Green’s Functions in Magnetic Multilayered Structures 237
   R. E. Camley and R. L. Stamps

Chapter 6. Light Scattering and Microwave Resonance Studies of Spin Waves in Metallic Films and Multilayers 287
   J. R. Dutcher

Chapter 7. Spin-Wave Instabilities, Auto-Oscillations, Chaos, and Control of Chaos in YIG Spheres 335
   S. M. Rezende, A. Azevedo, and F. M. de Aguiar

Chapter 8. Parametric Instabilities and Auto-Oscillation Behavior of Magnetostatic Modes in Magnetic Films 375
   P. E. Wigen
Chapter 9. Nonlinear Dynamics of Propagating Spin Waves in Magnetic Films

A. N. Slavin, B. A. Kalinikos, and N. G. Kovshikov
