CONTENTS

Introduction v
Contributors xiii

INVITED LECTURES

Eye movements and cognitive processes in reading, visual search, and scene perception.

K Rayner 3-22

Models of oculomotor function: an appraisal of the engineer's intrusion into oculomotor physiology.

W Becker 23-46

The sensing of optic flow by the primate optokinetic system.

F Miles 47-62

The functions of eye movements in animals remote from man.

M F Land 63-76

PURSUIT AND CO-ORDINATION

Human eye muscle proprioceptive feedback is involved in target velocity perception during smooth pursuit.

J L Velay, R Roll, J L Demaria, A Bouquerel & J P Roll 79-85

Variability of sinusoidal tracking characteristics in children.

A P Accardo, S Pensiero, S Da Pozzo, P Inchingolo & P Perisutti 87-97

Ocular tracking of self-moved targets: role of visual and non-visual information in visuo-oculo-manual coordination.

J-L Vercher, D Quaccia & G M Gauthier 99-108

Eye movements evoked by leg-proprioceptive and vestibular stimulation.

F M Botti, G Schweigart & T Mergner 109-118
Effects of prediction on smooth pursuit velocity gain in cerebellar patients and controls.

G U Lekwuwa, G R Barnes & M A Grealy

119-130

SACCADE AND FIXATION CONTROL

The relationship between the initial direction and landing position of saccades.

C J Erkelens & I M C Vogels

133-144

Mechanisms for fixation in man: evidence from saccadic reaction times.

M Biscaldi, H Weber, B Fischer & V Stuhr

145-155

Saccade latency towards auditory targets.

D Zambarbieri, I Andrei, G Beltrami, L Fontana & M Versino

157-164

Retinal eccentricity and the latency of eye saccades.

P E Hallett & R P Kalesnykas

165-176

Is saccadic adaptation context-specific?

H Deubel

177-187

Fast disconjugate adaptations of saccades: dependency on stimulus characteristics.

T Eggert, Z Kapoula & M-P Bucci

189-198

Visual mislocalization in moving background and saccadic eye movement conditions.

H Honda

201-212

OCULOMOTOR PHYSIOLOGY

A neural mechanism subserving saccade-vergence interactions.

L E Mays & P D R Gamlin

215-223

Eye position effects on pursuit related responses in area LIP of macaque monkey.

F Bremmer & K-P Hoffmann

225-236
CLINICAL AND MEDICAL ASPECTS OF EYE MOVEMENTS

Problems in modelling congenital nystagmus: towards a new model.

C M Harris 239-253

Eye movement behaviour in human albinos.

R V Abadi & E Pascal 255-268

Smooth pursuit responses to step ramp stimuli in patients with discrete frontal lobe lesions.

N A R Munro, B Gaymard, S Rivaud, J F Stein & Ch Pierrot-Deseilligny 269-280

Smooth pursuit eye movement abnormalities in patients with schizophrenia and focal cortical lesions.

T J Crawford, M C Lawden, B Haegar, L Henderson & C Kennard 281-289

Peak saccade velocities, short latency saccades and their recovery after therapy in a patient with a pineal tumor.

L J Bour, D van't Ent & J Brans 291-302

EYE MOVEMENTS AND COGNITION

Evidence relating to premotor theories of visuospatial attention.

T L Hodgson & H J Müller 305-316

Visual attention and saccadic eye movements: evidence for obligatory and selective spatial coupling.

W X Schneider & H Deubel 317-324

Why some search tasks take longer than others: using eye movements to redefine reaction times.

G J Zelinsky & D L Sheinberg 325-336

Eye movements and response times for the detection of line orientation during visual search.

S Mannan, K H Ruddock & J R Wright 337-348
Contents

Chronometry of foveal information extraction during scene perception.

P M J van Diepen, P De Graef & G d’Ydewalle 349-362

Trans-saccadic integration of biological motion: overview and further evidence based on reaction times.

K Verfaillie, A De Troy & J Van Rensbergen 363-377

EYE MOVEMENTS AND LANGUAGE

A challenge to current theories of eye movements in reading.

F Vitu & J K O’Regan 381-392

Effect of luminance and linguistic information on the centre of gravity of words.

C Beauvillain & K Doré 393-403

PP-attachment in German: results from eye movement studies.

L Konieczny, B Hemforth, C Scheepers & G Strube 405-420

Individual eye movement patterns in word recognition: perceptual and linguistic factors.

R Radach, J Krummenacher, D Heller & J Hofmeister 421-432

Lexical influences on parsing strategies: evidence from eye movements.

C Frenck-Mestre & J Pynte 433-444

Effects of a word’s morphological complexity on readers’ eye fixation patterns.

J Hyönä, M Laine & J Niemi 445-452

Effective visual field size necessary for proof reading during Japanese text editing.

N Osaka, M Osaka & H Tsuji 453-463
DISPLAYS AND APPLICATIONS

Selection by looking: a novel computer interface and its application to psychological research.

*D M Stampe & E M Reingold* 467-478

Eye movement recordings to study determinants of image quality in new display technology.

*G Deffner* 479-490

Eye-gaze determination of user intent at the computer interface.

*J H Goldberg & J C Schryver* 491-502

Knowledge engineering in the domain of visual behaviour of pilots.

*A Schulte & R Onken* 503-514

Distribution of visual attention revealed by eye movements and neural networks.

*P Krappmann* 515-525

Gaze control in basketball foul shooting.

*J N Vickers* 527-541

Author Index 543-556

Subject Index 557-564
