## Contents

*About the Second Edition* ix  
*Preface* xi  
*Acknowledgments* xiii

### Chapter 1. Introduction to Light Scatter  
1.1 The Scattering of Light 4  
1.2 Scatter from a Smooth Sinusoidal Surface 5  
1.3 Scatter from Other Surfaces 12  
1.4 Scatter from Windows and Particulates 15  
1.5 Bidirectional Scatter Distribution Functions 19  
1.6 Total Integrated Scatter 22  
1.7 Summary 26

### Chapter 2. Surface Roughness 29  
2.1 Profile Characterization 29  
2.2 The Surface Power Spectral Density and Autocovariance Functions 44  
2.3 Summary 57

### Chapter 3. Scatter Calculations and Diffraction Theory 59  
3.1 Overview 59  
3.2 Kirchhoff Diffraction Theory 66  
3.3 The Rayleigh Approach 77  
3.4 Comparison of Vector and Scalar Results 81  
3.5 Summary 83

### Chapter 4. Calculation of Smooth-Surface Statistics from the BRDF 85  
4.1 Practical Application of the Rayleigh-Rice Perturbation Theory 85  
4.2 Roughness Statistics of Isotropic Surfaces 91  
4.3 Roughness Statistics of One-Dimensional Surfaces 95  
4.4 Roughness Statistics for the General Case 103  
4.5 The K-Correlation Surface Power Spectrum Models 103  
4.6 The TIS Derivation from the Rayleigh-Rice Perturbation Theory 107  
4.7 Summary 109
Chapter 5. Polarization of Scattered Light 111
  5.1 A Review of Polarization Concepts 112
  5.2 The Polarization Factor $Q$ 121
  5.3 Scattering Vectors and Matrices 126
  5.4 Summary 132

Chapter 6. Scatter Measurements and Instrumentation 133
  6.1 Scatterometer Components 133
  6.2 Instrument Signature 137
  6.3 Aperture Effects on the Measured BSDF 139
  6.4 Signature Reduction and Near-Specular Measurements 143
  6.5 The Noise-Equivalent BSDF 152
  6.6 Measurement of $P_i$ and Instrument Calibration 155
  6.7 Measurement of Curved Optics 157
  6.8 Coordinate Systems and Out-of-Plane Measurements 158
  6.9 Raster Scans 161
  6.10 Measurement of Retroreflection 164
  6.11 Alternate TIS Devices 169
  6.12 Error Analysis of the Measured BSDF 170
  6.13 Summary 174

Chapter 7. Scatter Predictions 177
  7.1 Optical Surfaces: Using the Rayleigh-Rice Equation 178
  7.2 Rough Surfaces 188
  7.3 Partial Data Sets 197
  7.4 Scatter from Diffuse Samples 200
  7.5 BRDF Standard Surfaces 206
  7.6 Software for Prediction of Scatter in Optical Systems 208
  7.7 Summary 209

Chapter 8. Detection of Discrete Surface and Subsurface Defects 211
  8.1 Polarization Effects Associated with Defect Scatter 212
  8.2 Bulk Defects in Transparent Optics 220
  8.3 Near-Point-Scatter Sources and Differential-Scattering
      Cross Section 225
  8.4 Nontopographic Defects in Opaque Materials 229
  8.5 Summary 230
