Chapter 1  Delta-Doping of Semiconductors: Electronic, Optical, and Structural Properties of Materials and Devices

E. F. Schubert

I. Introduction 2
II. Crystal Growth of δ-Doped Semiconductors 3
III. Electronic Structure 6
IV. Spatial Distribution of Dopants in δ-Doped Semiconductors 27
V. Electronic Properties of δ-Doped Semiconductors 80
VI. Field-Effect Transistors 85
VII. Properties of δ-Doped Doping Superlattices 106
VIII. Optoelectronic Devices 132
IX. Concluding Remarks 145
Acknowledgments 146
References 146

Chapter 2  Wide Graded Potential Wells

A. Gossard, M. Sundaram, and P. Hopkins

I. Introduction 153
II. Epitaxial Growth of Graded Wells 158
III. Electronic Structure and Optical Properties of Undoped Wells 167
IV. Modulation-Doped Wide Parabolic Wells 176
V. Electron Transport 184
VI. Electron Excitations 195
VII. Superlattices in Parabolic Wells 207
VIII. Conclusions 212
Acknowledgments 214
References 214
Chapter 3  Direct Growth of Nanometer-Size Quantum Wire Superlattices

P. Petroff

Abstract .......................... 219
Introduction ......................... 220
I. Growth Kinetics and Interfaces in Conventional Superlattices and Quantum Wells 221
II. The Growth of Lateral Superlattices .......................... 235
III. The Serpentine Superlattice Growth .......................... 241
IV. Remaining Issues in the Epitaxy of Lateral Superlattice Type Structures: Segregation and Size Uniformity .......................... 244
V. Optical Properties of Lateral Superlattice Based Structures .......................... 247
VI. Other Lateral Superlattice Based Structures .......................... 253
VII. Another Direct Growth Method of Quantum Wire Structures .......................... 254
VIII. Conclusions .......................... 255
Acknowledgments .......................... 255
References .......................... 255

Chapter 4  Lateral Patterning of Quantum Well Heterostructures by Growth of Nonplanar Substrates

E. Kapon

I. Introduction ................................ 259
II. Lateral Patterning Mechanisms ................................ 264
III. Lateral Patterning by MBE on Nonplanar Substrates ................................ 274
IV. Lateral Patterning by OMCVD on Nonplanar Substrates ................................ 288
V. Device Applications ................................ 310
VI. Conclusions and Future Directions ................................ 327
Acknowledgments ................................ 330
References ................................ 331

Chapter 5  Optical Properties of Ga_{1-x}In_xAs/InP Quantum Wells

H. Temkin, D. Gershoni, and M. Panish

I. Introduction ................................ 338
II. Computation of Energy Levels in Quantum Wells ................................ 340
III. Optical Properties of Quantum Wells and Superlattices ................................ 345
IV. Dynamic Effects ................................ 361
V. Quantum Wires and Boxes ................................ 363
