Monte Carlo and Quasi-Monte Carlo Methods in Scientific Computing

Proceedings of a conference at the University of Nevada, Las Vegas, Nevada, USA, June 23-25, 1994
Contents

Preface v
Contributors ix
Conference Participants xi

Invited Papers

Modified Monte Carlo Methods Using Quasi-Random Sequences 1
RUSSEL E. CAFLISCH AND BRADLEY MOSKOWITZ

Simulated Annealing: Folklore, Facts, and Directions 17
BENNETT L. FOX

Two Approaches to the Initial Transient Problem 49
PETER W. GLYNN

Tables of \((T, M, S)\)-Net and \((T, S)\)-Sequence Parameters 58
GARY L. MÜLLEN, ARIJIT MAHALANABIS, AND HARALD NIEDERREITER

New Developments in Uniform Pseudorandom Number and Vector Generation 87
HARALD NIEDERREITER

Quasi-Monte Carlo Methods for Particle Transport Problems 121
JEROME SPANIER

Contributed Papers

Non-Adaptive Coverings for Optimization of Gaussian Random Fields 149
JAMES M. CALVIN

The Method of Fundamental Solutions and the Quasi-Monte Carlo Method for Poisson's Equation 158
C.S. CHEN

Implementation of a Distributed Pseudorandom Number Generator 168
JIAN CHEN AND PAULA WHITLOCK

On the Lattice Test for Inversive Congruential Pseudorandom Numbers 186
WUN-SENG CHOU AND HARALD NIEDERREITER

Discrepancy Lower Bound in Two Dimensions 198
HENRI FAURE

Stable Estimators for Self-Adjusting Simulations 205
BENNETT L. FOX AND GEORGE W. HEINE

A Comparison of Random and Quasirandom Points for Multidimensional Quadrature 213
FRED J. HICKERNELL
A Simulation Study of a Change-Point Poisson Process Based on Two Well-known Test Statistics  
CHIH-HSIANG HO 

228

A Quasi-Monte Carlo Algorithm for the Global Illumination Problem in the Radiosity Setting  
ALEXANDER KELLER 

239

Multivariate Walsh Series, Digital Nets and Quasi-Monte Carlo Integration  
GERHARD LARCHER AND WOLFGANG CH. SCHMID 

252

Parallel Pseudorandom Number Generation Using Additive Lagged-Fibonacci Recursions  
MICHAEL MASCAGNI, M.L. ROBINSON, DANIEL V. PRYOR, AND STEVEN A. CUCCARO 

263

Quasirandom Diffusion Monte Carlo  
BRADLEY MOSKOWITZ 

278

Randomly Permuted \((t,m,s)\)-Nets and \((t,s)\)-Sequences  
ART B. OWEN 

299

Quantum Monte Carlo Simulation: Algorithm and Applications  
TAO PANG 

318

A Coupled Monte Carlo/Explicit Euler Method for the Numerical Simulation of a Forest Fire Spreading Model  
ANTONINI PUPPIN MACEDO AND ANTONIO C.P. BRASIL JUNIOR 

333

Microcanonical Monte Carlo  
O. SCHAPIRO, D.H.E. GROSS, AND A. ECKER 

346

Computational Investigations of Low-Discrepancy Point Sets II  
TONY T. WARNOCK 

354

Estimates for the Volume of Points of \((0,s)\)-Sequences in Base \(b \geq s \geq 2\)  
YI-JUN XIAO 

362
