TABLE OF CONTENTS

PREFACE

ix

I ELECTRONIC STRUCTURE AND QUANTUM DYNAMICS

1. **From First Principles to Predictions
of New Properties**
J. C. Phillips 1
2. **Density Functional Theory and
Computational Materials Physics**
L. Sham 13
3. **Modeling Materials by Ab Initio
Molecular Dynamics**
R. Car 23
4. **Empirical Pseudopotentials for
Semiconductors**
J. R. Chelikowsky 39
5. **Total Energy Calculations of Solids
Using Pseudopotentials**
C. Hwang, S. Jhi and J. Ihm 53
6. **Quantum Monte Carlo Methods**
S. Fahy 67
7. **Quasiparticle Theory of Electron
Excitations in Solids**
S. G. Louie 83
8. **Ab Initio Statistical Mechanics**
J. D. Joannopoulos 101
9. **First Principles Molecular Dynamics
with Variable Cell Shape**
R. Wentzcovitch 113
10. **New Approach to Pseudopotential
Construction**
D. Hamann 129

**II SEMICONDUCTORS, INSULATORS
AND METALS**

11. **Raman Scattering in Semiconductors
with Reduced Translational Invariance**
M. Cardona 141
12. **New Prospective in Molecular Beam
Growth**
*M. Balkanski, M. Eddrief and
Le Thanh Vinh* 165
13. **First Principles and Second Principles
(Semiempirical) Pseudopotentials**
A. Zunger 173
14. **Microscopic Theory of the Properties of
Semiconductor Heterojunctions**
M. Hybertsen 189
15. **Total Dielectric Function Treatment of
Electron and Phonon Response in Solids**
D. Penn, S. P. Lewis and M. L. Cohen 201
16. **Unusual Properties of Impurities and
Defects: Challenges and Opportunities**
J. Chadi 211
17. **Boltzmann Theory and Resistivity of
Metals**
P. Allen 219

III SURFACES, INTERFACES AND CLUSTERS

18. **Origins and Consequences of Surface
Stress**
D. Vanderbilt 251
19. **First Principles Quasiparticle Calculations
for Semiconductor Surfaces**
J. Northrup 261
20. **Metal Surface Reconstructions**
C. T. Chan and K. M. Ho 273

21. **Shell Structure in Metal Clusters**
M. Y. Chou 287
22. **Electronics Properties in Quantum Dots**
C. Y. Fong, B. M. Klein and J. Nelson 299
23. **Chemical Reactivity Theory for Physicists: A Work in Progress**
M. H. Cohen, M. V. Ganduglia-Priovano, V. Natoli and J. Kudrnovsky 315

IV MATERIALS UNDER PRESSURE

24. **High Pressure Phase Diagram of Silicon: A Model System in Condensed Matter Physics**
G. Martinez 335
25. **Charge Transfer Gap Closure in Transition Metal Halides Under Pressure**
A. L. Chen and P. Yu 349
26. **High Pressure Phases of Semiconductors**
K. J. Chang 363
27. **Metallic Hydrogen**
T. Barbee 377
28. **Ab Initio Pseudopotential Methods for Oxides: α -Quartz Near the Amorphous Transition**
N. Binggeli and J. R. Chelikowsky 387

V SUPERCONDUCTIVITY

29. **The Unusual High Temperature Superconductors: $\text{HgBa}_2\text{Ca}_{n-1}\text{Cu}_n\text{O}_{2n+2+\delta}$ with $n=1,2,3\dots$**
P. Chu 411
30. **Intercalating High T_c Oxide Superconductors**
A. Zettl, W. A. Vareka and X.-D. Xiang 425

31.	Regularities Among the Classes of High Temperature Superconductors: <i>Questions of Pressure</i> <i>W. Pickett and D. J. Singh</i>	449
32.	Electronic Structure of Hole-Doped Copper Oxides and a New Mechanism of High Temperature Superconductivity <i>H. Kamimura</i>	465
VI	FULLERENES, SUPERHARD MATERIALS AND OTHER NOVEL MATERIALS	
33.	Electronic Structure of Fullerenes and Fullerides <i>S. Saito</i>	491
34.	Superconductivity in Alkali Fullerenes <i>J. L. Martins</i>	503
35.	Photoemission and Optical Properties of C₆₀ Fullerites <i>E. L. Shirley and S. G. Louie</i>	515
36.	Predicting New Hard Materials <i>A. Liu</i>	531
	INDEX	545
