CONTENTS

KEYNOTE PAPER
Towards Constructive Modelling and Control with Neural Networks
K. HUNT

INTELLIGENT CONTROL
Parallel Off-Line Training of Multilayer Perceptrons
S. McLOONE, G. IRWIN

GA Approach to Multiple Objective Optimization for Active Noise Control
K.S. TANG, K.F. MAN, C.Y. CHAN, S. KWONG, P.J. FLEMING

Oscillation-Resisting in the Learning of Backpropagation Neural Networks
X.S. DENG, D. POPOVIC, G. SCHULZ-EKLOFF

Parallel Genetic Algorithms in Spectral Estimation of Doppler Signals
J. SOLANO GONZALEZ, D.F. GARCIA NOCETTI, K. RODRIGUEZ VAZQUEZ

The Application and High Speed Real Time Implementation of Continually Online Trained Artificial Neural Networks for Adaptive System Identification and Control
B. BURTON, J.L. RODGERSON, R.G. HARLEY

ROBOTICS
Parallel Computation of a Control Algorithm for a Robot Manipulator
R. CARELLI, C. GINIS, E. ZAVALLA, D.I. JONES

Signal Processing and Parallel Processing in the Real-Time Simulation of a Flexible Manipulator System
M.O. TOKHI, M.A. HOSSAIN, A.K.M. AZAD

Distributed Parallel Algorithms for the Inverse Dynamics Control of Robot Manipulators
L. PENALVER, J.C. FERNANDEZ, V. HERNANDEZ, J. TORNERO

A Methodology of Robot Controller Development Using the SA-RT-Method
H. JORDAN, G. ABBA, E. OSTERTAG, A. MATSUMOTO

COMRADE: Compliant Motion Research and Development Environment
W. WITVROUW, P. VAN DE POEL, J. DE SCHUTTER

An Algorithm for the Inverse Kinematics Problem of a Calibrated Robot
A. KORZUN, J. RONING

Implementation of Sliding Mode Control for SCARA Robot
M.C. LEE, J.M. LEE, K. SON, D.S. AHN, S.H. HAN, M.H. LEE

Transputer Based Real-Time System for Multisensor Robotics
T. RUTSCHKE, G. ABBA, H. JORDAN, M. DE MATHELIN
SOFTWARE DESIGN

Methods and Standards in the Design of Control Information Systems
N. BAKER, W. HARRIS, R. McCLATCHEY, J.-M. LE GOFF, C. WALLACE

Abstract Object State in Real-Time Control
J. BOSCH

Using Object-Oriented Programming Standards for Developing Distributed Real-Time Control Applications
R. KROEGER

A Co-Design Methodology for Dependable Real-Time Systems
C.W. CHAU, S. KWONG, K.F. MAN, W.A. HALANG

A Real-Time Kernel Integrated with an Off-Line Scheduler
C. ERIKSSON, K.-L. LUNDBACK, H. LAWSON

Automated Generation of Hard Real-Time Control for a CSI-fed Induction Machine
M.C. RANDELHOFF, C.E. KLEINHANS, R.G. HARLEY, D.C. LEVY

Issues in Development Models of Real-Time Process-Control Software
G. FRENSEL, P.M. BRUIJN

Implementing Real-Time Scheduling in a Time-Sharing Operating System
G.A. WAINER

Time Requirement Specification in Graphical Design of Real-Time Software
J.J. SKUBICH, J.J. SCHWARZ, M. MARANZANA, T. SZMUC

ADAPTIVE CONTROL

Sensitivity Minimisation for the Class of Self-Tuning Control Systems
A. TARCZYNSKI

A Simple Autonomous Adaptive Controller
Y. TAN, A.R. VAN CAUWENBERGHE

A New Algorithm for Real Time Adaptive State Estimation
L. BOILLEREAUX, J.M. FLAUS

PLC's

State Machine Based Deadline Analysis of a Programmable Controller for Real-Time Sequential Control Systems
NAEHYUCK CHANG, SEUNGKWEON JEONG, WOOK HYUN KWON

Using a Real-Time Framework to Verify the Properties of Grafcet
J. ZAYTOON, P. DE LOOR, G. VILLERMAIN-LECOLIER

Modeling Distributed PLC Control
T. KOUTHON, G. NOUBIR, P. RAJA, C.P. FUHRMAN, J.D. DECOTIGNIE

SCHEDULING

Development of a Multiprocessor Scheduling Toolbox
D.I. JONES, C. GINIS
On-Line Scheduling Algorithms for Over-Loaded Real-Time System
P. MARTINEAU, M. SILLY

Preemption characterization in Real-Time Multimedia Scheduling
J. ECHAGUE, I. RIPOLL, J.J. SERRANO, A. CRESPO

Automated Hard Real-Time Scheduling
A.R. BROWNE, J.M. BASS, P.R. CROLL, P.J. FLEMING

A Dynamic Scheduling Algorithm for Sporadic Tasks under Resource and Timing Constraints
M. SILLY

Scheduling Intelligent Tasks with Optional Parts in Real-Time Environments
H. HASSAN, A. CRESPO

Scheduling I/O Requests and Periodic Tasks with Random Execution Time
H. CHETTO

An Approach for Scheduling Tasks with Precedence Constraints Based on Similarity Relations
E. POLI

Schedulability-Driven Implementation Selection
J.R. NAWROCKI

SOFTWARE PACKAGES

TCE: A Software Environment for Real-Time Control
J. BANENS, B. DE JAGER

PC-Based CAE Platform for Fuzzy Control System Design
QINQIN JIANG, SHAOHUA TAN, XUQIANG LIAO, CHANG-CHIEH HANG, HO-CHUNG LUI, LOONIN TEOW, MINGKUN GU

MatDSP: A DSP-Based Matlab Toolbox for Rapid Prototyping of Digital Control Systems
S. CARABELLI, C. GRECO, F. MANNINO

A General Instrument for Real-Time Control and Data Acquisition
F. ALTPETER, C. SALZMANN, D. GILLET, R. LONGCHAMP

APPLICATIONS

Satellite Control System Architectures
S. MOSTERT, W.A. HALANG

Estimation and Control of Fouling in Heat Exchangers
D. PEEL, P. WHEELDON, G.S. VIRDEE

Mode Management in a Distributed Intelligent Automated Production System
M. BAYART, M. STAROSWIECKI, A.L. GEHIN

The Analysis of the Real-Time Frequency Control in the Interconnected Power Systems
V. FUSTIK, G. COGELJA, M. IVKOVIC

MULTIPROCESSING

Verification of Parallel Architectures for Real Time Feedback Controllers
D. BROWN, Y. LI, E. ROGERS, O.R. TUTTY
Remote Procedure Call for Real-Time Multi-Processor Applications
M. MOREAUX, J.-D. DECOTIGNIE, C. FUHRMAN

Progress on the Development of Generic Tools for Real-Time Simulation and Control of Complex Systems
A. TULLY, M. SURRIDGE, P. GORDON, E. ROGERS

Priority-Based Totally Ordered Multicast
L. RODRIGUES, P. VERISSIMO, A. CASIMIRO

**PID-CONTROL**

PIDCONA - A Complete Autotuning PID Controller
P.E. MODEN

Expert PID Controller with Fuzzy Self-Tuning
M. PETROV, T. PROYCHEV, A. TOPALOV

The Real-Time Control of Uncertain Systems by Combining Nonlinear PID Control with Binary Control
W. WANG, J.-Q. HAN

**TRAFFIC CONTROL AND AUTONOMOUS VEHICLES**

Design and Traffic Control of Automatic Guided Vehicle Systems
H. CHETTO, P. CASTAGNA, C. PLOT

A Knowledge Based Approach to Real Time Traffic Data Analysis
H. REHBORN, W.A. HALANG

**HARDWARE/ARCHITECTURES**

Real-Time Software Architecture: Application to FIP Fieldbus
P. LORENZ, Z. MAMMERI

Architecture of Real-Time Programmable Digital System and Matrix Algorithms for Control of R-Dimensional Space Random Vibration
A.A. PETROVSKY

Reduced Algorithm Set Control
J.G. McCULLOCH

Evaluation of Communication Latency in VMEbus-Based Real-Time Control Systems
JAEHYUN PARK, K.G. SHIN

Optimal Structures for Real-time Implementing Linear Digital State-Space System
S. HADRI, C. IUNG

**FUZZY CONTROL**

Fuzzy Petri Net Model for Real-Time Control
L. GOMES, A. STEIGER-GARCAO

Computational Complexity of Fuzzy Controllers and Its Application to a Real-Time Loop Controller
SANG CHUL AHN, YONG HO KIM, WOOK HYUN KWON

The Design of Fuzzy Logic Controlled SISO Processes with Step Response Constraints
J.R. JORDAN, J. WANG
Distributed Fuzzy Control of Multivariable Processes
A. GEGOV, H.-J. NERN

PARALLEL ALGORITHMS

A Parallel Distributed Memory Algorithm for the Single-Input Pole Assignment Problem
M. CASTILLO, V. HERNANDEZ, R. MAYO

Real-Time Requirements and Parallelisation in Fault Diagnosis
I. AJTONYI, G. TERSTYANSZKY

The Systolic Design of a Linear Quadratic Controller Using Hierarchical Signal Flow Graphs
D.W. BROWN, F.M.F. GASTON

Fast Computation of Stabilizing Predictive Control Laws
L. CHISCI, A. GARULLI, G. ZAPPA

Parallel Algorithms for Solving the Algebraic Riccati Equation via the Matrix Sign Function
E.S. QUINTANA, V. HERNANDEZ

MOTOR CONTROL

Smooth Continuous Path Motion Generation for Stepping Motors
W. STEIGER, N. SHERKAT, P.D. THOMAS

Phase Angle Estimation Algorithms for Detecting Faults by Synchronous Analysis of Rotating Machines
F. CRAPART, H. FENNIRI, A. MOINEAU, G. DELAUNAY

HETEROGENEOUS ARCHITECTURES

HEDRA: Heterogeneous Distributed Real-Time Architecture
L. DEMEESTERE, H. THIELEMANS, H. VAN BRUSSEL

Mapping Real-time Control Algorithms onto Heterogeneous Architectures
M.J. BAXTER, M.O. TOKHI, P.J. FLEMING

Improving Signal Processing Performance Using a Transputer-DSP parallel Architecture
D.F. GARCIA NOCETTI, J. MARTINEZ FLORES, J. SOLANO GONZALEZ

Performance Evaluation of Homogeneous and Heterogeneous Architectures in Real-Time Signal Processing and Control
M.O. TOKHI, M.A. HOSSAIN, M.J. BAXTER, P.J. FLEMING

FAULT-TOLERANT AND DEPENDABLE SYSTEMS

Modelling Real-Time Behaviour of Parallel and Distributed Systems Under Failure Conditions
P.R. CROLL, P.M. GRIFFITHS

Fault Tolerance with Multiple Task Modular Redundancy
C.P. FUHRMAN, S. CHUTANI, H.J. NUSSBAUMER

The Determinism Insurance in The Sceptre 2 Fault Tolerance Model
S. BESTAOUI

Towards a Fault-Tolerant Linda Scheme: Issues and Current Status
F. TAM, M. WOODWARD, G. TOPPING
INDUSTRIAL CASE STUDIES

Specification and Automated Verification of Real-Time Behaviour - A Case Study
C.H. KRISTENSEN, J.H. ANDERSEN, A. SKOU

Aspects of the Hard- and Software Environment of Transputer Based Non Linear Real Time Observers for Control and Diagnostics of Large Turbo Generator Sets
H.-J. NERN, F. FISCHER, H.A. NOUR ELDIN

Control of Bakers' Yeast: Quantity and Quality
D. PEEL, S. RAWLING, S. KEITH, B. BUXTON

Design and Rapid Prototyping of a Knowledge Based Controller Module
C. RAHDER, J. WINKLER

Author Index
