Contents

1. Adaptive Optimization Techniques

Incremental Update of the Visibility Map as Seen by a Moving Viewpoint in Two Dimensions
S. Ghali, A.J. Stewart

Adaptive Sampling of Very Large Particle Systems Using an Incremental Self-Organizing Feature Map: an Application in Molecular Dynamic
L. Balmelli

Adaptive Refinement for Mass/Spring Simulations
D. Hutchinson, M. Preston, T. Hewitt

2. Animation of Deformable Objects

A Fire Model for 2-D Computer Animation
J. Yu, J.W. Patterson

Smoothed Particles: a New Paradigm for Animating Highly Deformable Bodies
M. Desbrun, M.P. Gascuel

3. Human Motion Capture and Simulation

A Real Time Anatomical Converter for Human Motion Capture
T. Molet, R. Boulic, D. Thalmann

A High Level Control Mechanism for Human Locomotion Based on Parametric Frame Space Interpolation
S. Guo, J. Robergé

Simulating Human Movements Using Optimal Control
X. Zhao, D. Tolani, B.-Y. Ting, N.I. Badler

A Biomechanical Musculoskeletal Model of Human Upper Limb for Dynamic Simulation
W. Maurel, D. Thalmann, P. Hoffmeyer, P. Beylot, P. Gingins, P. Kalra, N. Magnenat Thalmann
4. Plant Development

Interactive Modelling and Animation of Branching Botanical Structures.............139
B. Lintermann, O. Deussenn

An Efficient Estimation of Light in Simulation of Plant Development.............153
B. Benes

5. Motion Control and Motion Management

A Planning Algorithm for Dynamic Motions..........................................................169
P.S. Huang, M. van de Panne

Plausible Motion Simulation for Computer Animation........................................183
R. Barzel, J.F. Hughes, D.N. Wood

Motion Synthesis by Example.................................................................199
A. Lamouret, M. van de Panne

Appendix: Colour Illustrations.................................................................213
