Contents

Generation and transport of ions: ICP-MS from single drops and microsecond time scales to practical measurements 1
J. W. Olesik, J. A. Kinzer and M. P. Dziewatkoski

Ion optics for ICP-MS: modeling, intuition or blind luck 13
Scott D. Tanner

Interface studies in the ICP-MS spectrometer 28
P. Turner, T. Merren, J. Speakman and C. Haines

A computer simulation of the current distribution in an electron multiplier 35
J. H. Batey and M. Liezers

The effect of high uranium matrix concentration on plasmascram torch: an evaluation of the improvement of iron analysis in actinide compounds 44
F. Pilon, D. Koller and A. Raith

A routine approach to the multielement analysis of small sample volumes by ICP Mass Spectrometry 51
R. J. Thomas, T. J. Gluodenis Jr., S. A. Beres and E. R. Denoyer

Simultaneous reduction of polyatomic ion interferences in quadrupole ICP-MS using ultrasonic nebulization and directed optimization 61
J. L. M. de Boer

Early results for the direct analysis of concentrated acids by ICP-MS using a desolvated micro-concentric nebulizer 70
D. R. Wiederin, P. Krause, R. Hutton, B. Grote and C. W. McLeod

Spectral interpretation and survey analysis in ICP-MS 77
E. H. van Veen and M. T. C. de Loos-Vollebregt

A study of random and systematic errors for the determination of molybdenum by inductively coupled plasma source mass spectrometry using on-line isotope dilution analysis 85
J. M. Marchante-Gayón, J. I. García Alonso and A. Sanz-Medel
Quality control in the multi-element analysis of foods using ICP-MS 95
M. J. Baxter, H. M. Crews, P. Robb and P. R. Strutt

Coupling of GC with ICP-MS for trace metal speciation 109
T. De Smaele, L. Moens and R. Dams

On-line separation and determination of bromate in waters using flow injection inductively coupled plasma mass spectrometry 124
A. R. Elwaer, C. W. McLeod, K. C. Thompson and D. Wiederin

Speciation of protein-bound cadmium in biological materials by size-exclusion and reversed-phase HPLC with ICP-MS detection 131
J. Szpunar, H. Chassaigne, O. F. X. Donard, J. Bettmer and R. Lobinski

Rapid on-line separation and determination of arsenic (III) and (V) in waters by inductively coupled plasma mass spectrometry 145
A. G. Cox, C. W. McLeod, M. Nishikawa and D. Wiederin

Determination of As, Hg and Se in coals by means of FI-HG-ICP-MS. Comparison with other techniques 152
M. Bettinelli, S. Spezia, U. Baroni and G. Bizzari

Microcolumn field sampling for determination and speciation of organo-tin in seawater 159

Microcolumn preconcentration and flow injection ICP-mass spectrometry for determination of plutonium in seawater: initial studies 166
A. E. Eroglu, C. W. McLeod, K. S. Leonard and D. McCubbin

Gold determination in human blood serum by flow injection inductively coupled plasma mass spectrometry 175
G. Doner, C. W. McLeod and D. Bax

Determination of Butyltin compounds by means of hydride generation-cold trapping-gas chromatography coupled to ICP-MS detection 182
E. Segovia García, J. I. García Alonso and A. Sanz-Medel
Flow injection sorbent extraction preconcentration for ICP mass spectrometry with ultrasonic nebulisation and membrane desolvation

R. Ma, C. W. McLeod and K. C. Thompson

Uranium in urine and serum of "normal" populations: a FIAS-ICP-MS study

A. Lorber, L. Halicz, Z. Karpas, E. Elish, J. Roiz and R. Marko

Multielement characterisation of lichens and vegetable materials by ICP-MS

M. Bettinelli, S. Spezia, U. Baroni and G. Bizzari

Plant material decomposition methods and determination of selected elements by ICP-MS Elan 6000

E. Čurdová, J. Száková, R. Koplík and M. Suchánek

Glow discharge optical emission spectrometry: use of plasma sources in characterisation of electronic materials and devices

I. M. Dharmadasa, M. Ives, C. Breen, G. Hill, C. C. Button, J. S. Roberts and M. Hopkinson

Contamination of drinking water caused by mixer taps

P. Fecher, A. Nagengast and R. Sperk

Determination of rare earth elements in Antarctic lakes and streams of varying ionic strengths

E. Y. Graham, L. A. Ramsey, W. B. Lyons and K. A. Welch

Assessment of the potential risks of landfills by determination of trace metals in groundwater by ICP-MS

A. Ulrich, H. -R. Zweifel and A. C. Johnson

Simultaneous quantification of α- and β-emitting radionuclides in concrete samples by inductively coupled plasma mass spectrometry (ICP-MS)

M. Rupprecht and T. Probst

Application of ICP-MS to steel samples

K. Pettersen and I. Gustavsson
Determination of arsenic in solid extracts using high resolution inductively coupled plasma mass spectrometry (HR-ICP-MS) 291
*T. Prohaska, C. Latkoczy, G. Stingeder and W. W. Wenzel*

New instrumental developments and analytical applications in ICP-MS 298
*N. Jakubowski and D. Stuewer*
