CONTENTS

KEYNOTE PAPERS

Real-Time Control of Unconventionally Sampled Data Systems
P. ALBERTOS, A. CRESPO

Real-Time Control in Factory Automation
P. KOPACEK

SPECIAL SESSION: PROCESSOR ARCHITECTURES FOR CONTROL

Software Design and Operation Challenges in the Automotive Environment
B.J. CHALLEN, R.K. STOBART

A Multi-Processor Computer Architecture for Active Control
E.P. DARBYSHIRE, C.J. KERRY

Design of Neural Network Controllers for a Two-Mass-Oscillator using Genetic Algorithms and Implementation in a Real-Time Environment
K. SCHMIDT, R. SCHÖNFELD

Targeted Processor Architectures for High-Performance Controller Implementation
M. GOOCH, S. JONES, R. GOODALL

System Design Considerations for an Application Specific Control Processor
P. NAUBER, J. WINKLER

TRANSPORT APPLICATIONS

A Fuzzy Logic Application for Traffic Actuated Signal Control
O. CZOGALLA

A Real-Time Architecture for Development and Control of Unmanned Underwater Vehicles
R. BONO, G. BRUZZONE, M. CACCIA, G. VERUGGIO, P. VIRGILI

Fuzzy Control System of Diesel Engine - Example Problems of Architectures
R. KLAUS, A. URBANIAK

Real-Time Number Plate Reading
J. BULAS-CRUZ, J. BARROSO, A. RAFAEL, E.L. DAGLESS

Relationship Between Fault Propagation Time and Execution Time of Fault Diagnosis Program
I. AJTONYI, G. TERSTYÁNSZKY

LATE BREAKING PAPERS: NEURAL NETWORKS

Neural Network Assisted Autotuning of Industrial PID Controllers
R. MAMAT, P.J. FLEMING, A.E.B. RUANO

A Neuro-Adaptive Active Control Algorithm for Noise Cancellation and Vibration Suppression
M.O. TOKHI, R. WOOD
Time Series Modelling using Neural Networks with Autoregressive-Moving Average Structure
C.W. CHAN, W.C. CHAN, K.C. CHEUNG

LATE BREAKING PAPERS: EMBEDDED SYSTEMS

Automated Generation and Scheduling of ADA95 Hard Real-Time Control Code
D.C. LEVY

Hardware-in-the-Loop Simulation of Diesel Engines for the Development of Engine Control Systems
R. ISERMANN, S. SINSEL, S. SCHAFFNIT

DSP-Based Structure for Visual Tracking
M. VARGAS, F.R. RUBIO

Modeling and Designing a Real-Time Event Manager in a Heterogeneous Distributed System
T. ARIZA, F.R. RUBIO

Large Scale Embedded Systems Engineering: A COTS-Based Approach
J.K. STROSNIDER, D.C. LEVY

PID CONTROLLERS

QUICKTUNE: A Reliable Automatic Strategy for Determining PI and PPI Controller Parameters using a FOPDT Model
C.S. COX, P.R. DANIEL, A. LOWDON

Autotuning of Phase Lead Controllers
D.P. ATHERTON, A.F. BOZ

Implementation Issues for Discrete PID Algorithms using Shift and Delta Operators Parameterizations
R.H. ISTEPANIAN

SCHEDULING

Static Scheduling using Clustering and Task Duplication
C. GINIS, D.I. JONES

Fuzzy Concepts Applied to Preemptive Real-Time Tasks Scheduling
L. MENDONCA, C. CARDEIRA, P.M. MEDINA

ESTIMATION

Real-Time Parameter Estimation of Dynamic Temperature Models for Greenhouse Environmental Control
J. BOAVENTURA CUNHA, C. COUTO, A.E.B. RUANO

A Delta Approach Adaptive Observer for On-Line Tool Wear Estimation in Turning
F.J. CARRILLO, M. ZADSHAKOYAN

PARALLEL AND DISTRIBUTED SYSTEMS

A Mechatronics Test-Bed for Embedded Distributed Control Systems
M. TÖRNGREN, O. REDELL, R. SNEDSBÖL, R. JOHANSSON
Automatic Program Generator for Customized Fuzzy Logic Controllers
N. ACOSTA, J.-P. DESCHAMPS, G. SUTTER

FUZZY METHODS

A Fuzzy Multiple Model Approach to Manoeuvring Target Tracking
S. McGINNITY, G. IRWIN

Fuzzy Adaptive Force Control of Robot Manipulators
S.J.C. MARQUES, L.F. BAPTISTA, J.M.G. Sá da COSTA

Real Time Fault Detection and Diagnosis of an Industrial Process
J.M.F. CALADO, J.M.G. Sá da COSTA

SPECIAL SESSION: PARALLEL ARCHITECTURES FOR REAL-TIME SIGNAL PROCESSING AND CONTROL

Performance Evaluation of DSP, RISC and Transputer Based Systems in Real-Time Implementation of Signal Processing and Control Algorithms
M.O. TOKHI, D.N. RAMOS-HERNANDEZ, C. CHAMBERS, M.A. HOSSAIN

Comparative Study of Different Doppler Spectrum Estimator Implementations
M.M. MADEIRA, M.O. TOKHI, M.G. RUANO

Implementation of an Adaptive Generalized Predictive Control Algorithm over an Heterogeneous Parallel Architecture
H.A. DANIEL, A.E.B. RUANO, P.J. FLEMING

Parallel Processing in Real-Time Ultrasonic Imaging
D.F. GARCÍA NOCETTI, J.S. GONZÁLEZ, M.F. CASIQUE, R.O. RAMÍREZ, E.M. HERNANDEZ

LATE BREAKING PAPERS: ROBOTICS AND AUTOMATION

A Conceptual Approach to Behaviour Based Architectures for Robot Control
J. SEQUEIRA, M.I. RIBEIRO, J.G.M. GONÇALVES

Job-Shop Scheduling with Limited Buffers
T. LILJENVALL

A Predictive Control Application to Force Control of Robotic Manipulators
M.A. BOTTO, L.F. BAPTISTA, J.M.G. Sá da COSTA

An FPGA Based Configurable I/O System for Real-Time AC Drive Controllers
D.R. WOODWARD, D.C. LEVY, R.G. HARLEY

LATE BREAKING PAPERS: “SOFT COMPUTING METHODS”

Fuzzy Logic and its Application on the Design of Supervised Real-Time Control Systems
A. FERNÁNDEZ, M. MARCOS, F. ARTAZA, N. IRIONDO, D. ORIVE

Stability of Fuzzy Controllers Subject to Actuator Saturation

Fuzzy Rules Based Qualitative Modelling: Application to Fault Diagnosis of Dynamic Processes
M. OUASSIR, C. MELIN
SOFTWARE TOOLS AND ARCHITECTURES

Wuzzy: A Real-Time Fuzzy Control Tool and its Application
J. VICTOR, A. DOURADO

Software Architecture for a Robot Teleoperation System
A. ALONSO, B. ÁLVAREZ, J.A. PASTOR, J.A. de la PUENTE, A. IBORRA

A Real-Time Simulation Tool for Real-Time Control
W.H. KWON, K.B. KIM, S.Y. MOON, S.-G. CHOI, Y.S. KIM

P.T. WOOLLEY, J.B. LEVY

ALGORITHMS

Variable Structure Position/Force Hybrid Control of Manipulators
J.A.T. MACHADO, A. AZENHA

Parallel Algorithms for the Block Hessenberg Form and Applications
E.S. QUINTANA-ORTI, G. QUINTANA-ORTI, V. HERNANDEZ

A Discrete-Time Algorithm for Simple Adaptive Control
H. SHIBATA, T. FUJINAKA, Yu. SUN

Behaviour Selection in the YAIR Architecture
J. SIMÓ, A. CRESPO, F. BLANES

NEURAL NETWORKS

Learning Control: Some Basic Design Approaches
R. FERREIRO GARCIA, X.C. PARDO MARTÍNEZ, J. VIDAL PAZ, J. COEGO BOTANA

Neural Modelling and Control of a Synchronous Generator
D. FLYNN, S. McLOONE, G.W. IRWIN, E. SWIDENBANK, B.W. HOGG

Hybrid Impedance Control of Robot Manipulators with Neural Networks Compensation
S.J.C. MARQUES, L.F. BAPTISTA, J.M.G. Sá da COSTA

A Quality Control System for Direct Hardened Steel Components Based on Neural Networks
A. BULSARI, E. HOCKSELL

DISCRETE EVENT AND HYBRID SYSTEMS

Mixing Statecharts and Signal for the Specification of Control
H. GUÉGUEN

A Building-Block Approach to the Temporal Modelling of Control Software
A.R. BROWNE, J.M. BASS, P.J. FLEMING

Implementation of a Non-Autonomous High-Level Petri Net Model for Reactive Real-Time Systems
J.P. BARROS, L. GOMES, A. STEIGER-GARCAO

Optimized Processing of Complex Events in Discrete Control Systems Using Binary Decision Diagrams
V. VIATKIN, K. NAKANO, T. HAYASHI
