CONTENTS

Preface xi
Program Committee xii

FOUNDATIONS AND EPISTEMOLOGY

Epistemic Autonomy in Models of Living Systems 2
Erich Prem

Cognition’s Coming Home: The Reunion of Life and Mind 10
Michael Wheeler

In Defence of Functional Analysis 20
Joe Faith

“Why Are There So Few Biologists Here?”—Artificial Life as a Theoretical Biology of Artistry 28
Lars Risan

BASIC MODELS AND RNA EVOLUTION

Rediscovering Computational Autopoiesis 38
Barry McMullin and Francisco Varela

An Attempt for Description of Quasi-Autopoietic Systems Using Metabolism-Repair Systems 48
Tatsuya Nomura

Symbolic and Global Dynamics in Coupled Genetic Networks: Evolution of Artificial Cell Populations at the Edge of and within Chaotic Transient Behaviour 57
Franco A. Bignone, Roberto Livi and Marco Propato

Time Out of Joint: Attractors in Asynchronous Random Boolean Networks 67
Inman Harvey and Terry Bossomaier

Insights into Evolution of RNA-Structures 76
Stephan Kopp, Christian M. Reidys and Peter Schuster

Molecular Evolution of Catalysis 83
Christian V. Först

Evolution of Random Catalytic Networks 92
S. M. Fraser and C. M. Reidys

Optimization Criteria for Design of Serial Transfer Evolution Experiments 101
Klausdieter Weller
### EVOLUTIONARY DYNAMICS

1. **Competition in a Fitness Landscape**  
   *Franco Bagnoli and Michele Bezzi*
   
2. **Information Analysis of Fitness Landscapes**  
   *Vesselin Vassilev*
   
3. **A Comparison of Evolutionary Activity in Artificial Evolving Systems and the Biosphere**  
   *Mark A. Bedau, Emile Snyder, C. Titus Brown, and Norman H. Packard*
   
4. **Guiding or Hiding: Explorations into the Effects of Learning on the Rate of Evolution**  
   *Giles Mayley*
   
5. **Adaptation toward Changing Environments: Why Darwinian in Nature?**  
   *Takaiiro Sasaki and Mario Tokoro*
   
6. **Models for Interacting Populations of Memes: Competition and Niche Behavior**  
   *Michael L. Best*
   
7. **N-Sex Reproduction in Dynamic Environments**  
   *Paul Coker and Chris Winter*

### MORPHOGENESIS

1. **Emergence of Differentiation Rules Leading to Hierarchy and Diversity**  
   *Chikara Furusawa and Kunihiko Kaneko*
   
2. **Recursive Mappings and the Complexity Catastrophes**  
   *Stephen Hill*
   
3. **On the Evolution of Multicellularity**  
   *Larry Bull*
   
4. **Emergence of Structure and Function in Evolutionary Modular Neural Networks**  
   *Sung-Bae Cho and Katsunori Shimohara*
   
5. **Evolving Morphologies of Simulated 3D Organisms Based on Differential Gene Expression**  
   *Peter Eggenberger*
   
6. **Formation of Neural Structures**  
   *Jari Vaario, Akira Onitsuka and Katsuo Shimohara*
   
7. **Activity-based Pruning in Developmental Artificial Neural Networks**  
   *Alistair G Rust, Rod Adams, Stella George and Hamid Bolouri*

### EMULATION OF NATURAL BEHAVIOR, AND ROBOTICS

1. **Homing by Parameterized Scene Matching**  
   *Matthias O. Franz, Bernhard Schölkopf and Heinrich H. Bülthoff*

Temperature in Natural and Artificial Systems
Adrian Thompson

VLSE: Very Large Scale Evolution in Hardware
J. S. McCaskill, U. Tangen and J. Ackermann

Lossless Image Compression by Evolvable Hardware
Mehrdad Salami, Masaya Iwata and Tetsuya Higuchi

A Colony of Ant-like Agents for Partitioning in VLSI Technology
Pascale Kuntz, Paul Layzell and Dominique Snyers

Evolutionary Signal Processing: A Preliminary Report
Tony Hirst

COMMUNICATION, COOPERATION AND COLLECTIVE BEHAVIOR

Too Many Love Songs: Sexual Selection and the Evolution of Communication
Gregory M. Werner and Peter M. Todd

The Truth Is Out There: The Evolution of Reliability in Aggressive Communication Systems
Peter de Bourcier and Michael Wheeler

An Exploration of Signalling Behaviour by Both Analytic and Simulation Means for Both Discrete and Continuous Models
Seth Bullock

Social Coordination and Spatial Organization: Steps towards the Evolution of Communication
Ezequiel A. Di Paolo

Grounding Adaptive Language Games in Robotic Agents
Luc Steels and Paul Vogt

Usage-based Structuralization of Relationships between Words
Takashi Hashimoto

Learning, Culture and Evolution in the Origin of Linguistic Constraints
Simon Kirby and James Hurford

Generating Vowel Systems in a Population of Agents
Bart de Boer

Cooperation without Genes, Games or Cognition
Charlotte K. Hemelrijk

Interaction, Uncertainty, and the Evolution of Complexity
Anil K Seth

Stochastic Simulation of Ants That Forage by Expectation
Carl Anderson, P. G. Blackwell and C. Cannings
Chorusing and Controlled Clustering for Minimal Mobile Agents 539
Owen Holland, Chris Melhuish and Steve Hoddell

ARTIFICIAL WORLDS

Studying Evolution with Self-Replicating Computer Programs 550
Tim Taylor and John Hallam

Self-replication in a 2D von Neumann Architecture 560
Florent de Dinechin

The Garden of Chances: An Integrated Approach to Abstract Painting and Reactive DAI 566
Guillaume Hutzler, Bernard Gortais and Alexis Drogoul

An Adaptive Approach for Reactive Actor Design 574
Daria E. Bergen, James K. Hahn and Peter Bock

Author Index 585
