M. D. Harrison and
J. C. Torres (eds.)

Design, Specification and Verification
of Interactive Systems '97

Proceedings of the Eurographics Workshop
in Granada, Spain,
June 4–6, 1997

Eurographics

SpringerWienNewYork
Contents

Do interactive systems need specifications? ........................................... 1
A. Hall

PAC-ing the architecture of your user interface .................................... 13
J. Coutaz

DMVIS: Design, modelling and validation of interactive systems .......... 29
B. Fields, N. Merriam, A. Dearden

Users as rational interacting agents: Formalising assumptions about cognition and interaction .................................................. 45
A. Blandford, R. Butterworth, J. Good

Establishing a link between usability and utility: Validation of task-based dialogue using a semantic prototype ......................... 61
M. F. Sanz, E. J. Gómez

Evaluating narrative in multimedia ..................................................... 77
B. Mallon, B. Webb

Interactors and Haggis: Executable specifications for interactive systems ... 93
M. Sage, C. Johnson

Formally verifying interactive systems: A review .............................. 109
J. C. Campos, M. D. Harrison

Investigating the behaviour of PREMO synchronizable objects ........... 125
G. P. Faconti, M. Massink

Formal transducers: Models of devices and building bricks for the design of highly interactive systems .................................... 143
J. Accot, S. Chatty, S. Maury, P. Palanque

From text to Petri nets: The difficulties of describing accident scenarios formally .............................................................. 161
J. C. Hill, P. C. Wright

Unifying toolkit programming layers: A multi-purpose toolkit integration module ................................................................. 177
A. Savidis, C. Stephanidis, D. Akoumanakis

Editing MAD* task descriptions for specifying user interfaces, at both semantic and presentation levels ............................... 193
F. Gamboa Rodriguez, D. L. Scapin

Formal aspects of task based design ................................................... 209
P. Markopoulos, P. Johnson, J. Rowson
Reusable structures in task models ........................................ 225
  I. M. Breedvelt-Schouten, F. D. Paterno, C. A. Severijns

The interaction specification workspace: Specifying and designing the
interaction issues of virtual reality training environments from within .... 241
  C. N. Diplas, A. D. Kameas, P. E. Pintelas

The notion of trajectory in graphical user interfaces ........................ 257
  D. Gorgan, D. A. Duce

A representational approach to the specification of presentations .......... 273
  G. Doherty, M. D. Harrison

On biasing behaviour to the optimal ...................................... 291
  R. J Butterworth, D. J. Cooke

Modelling in Action. Reports from the DSVIS’97 working groups ........ 307
  R. E. Fields, N. A. Merriam
